GRAIN QUOTATIONS INCLINED TO SAG

Plentiful Moisture Thruout Winter Wheat Area Influences Market.

CHICAGO, Feb. 19.—Showers and light snow as far east as the Missouri River this afternoon eased off the price of wheat. At the close the market ranged from 1-4 net decline to a shade advance. Latest trading left corn 1-4c to 3-4c down, oats 1-8c to 1-4c under last night, and provisions less expensive by 2 1-2c to 5c.

Wheat showed its best strength at mid-day. Support at that time and earlier in the session was due largely to the temporary failure of predicted moisture for the winter crop belt. A little export business in Baltimore and from Gulf cities had a bracing effect also on the bull sides. Plenty of selling orders came out when Kansas City sent word that a drizzling rain had begun. Smallness of receipts northwest were forgotten, and so, too, were other bullish factors of more doubtful significance. Except in the case of the May option, final transactions gave no evidence of any power to rally. Primary receipts were 519,000 bushels, against 575,000 bushels a year ago. Export clearances of wheat and flour equalled 706,000 bushels.

Good Weather in Corn Belt.

Springlike weather led to considerable speculative pressure on corn. The market, however, wavered a good deal owing to the stubbornness with which the bulls upheld wheat.

Oats followed other grain downward notwithstanding fairly influential buying on weak spots.

Hog receipts furnished a surprise, being for the first time recently above the total of the corresponding day a year ago. Holders of provisions unloaded freely, but shorts and new investors brought about a steadier feeling in the end.
