Port Elgin Times: In conversation with Mr. Malcolm McDougall the other day, he said in the whole Township of Kincardine he only knew of four instances where the husband and wife, the heads of a family of the first settlers, still survive. These are Mr. and Mrs. John Clark, Capt. and Mrs. Rowan, Mr. and Mrs. Kenneth McKenzie, now living on the 2nd of Bruce, and Mr. McDougall himself and wife. Of course, there are cases where the husband or wife still live, but the above are the only cases where they have been both spared the ravages of time.

KENT.

A virulent case of smallpox exists in the Richardson family, three miles up the river from Wallaceburg. One of Mr. Richardson's daughters lately visited a sick sister in Orford Township, who, unknown to the attending physician, was suffering from the disease. The visiting sister returned home feeling very ill, and Dr. Knight, of Wallaceburg, pronounced it smallpox. Dr. Charteris, the medical health officer for Chatham, quarantined three houses, closed two schools and vaccinated twenty people.

POPE LEO XIII. FAILS RAPIDLY

Aged Pontiff Performs His Duties With Difficulty—His Death an Early Probability.

Paris, June 8.—The Temps printed the following dispatch from Rome: Leo XIII. continues to receive, but those who see him notice the gradual decline which, without exciting apprehension that any catastrophe is imminent, does not warrant a continuance of the confident optimism. His recent audiences were extremely fatiguing. Each time the Pope received pilgrims he was obliged to rest, some times for two or three days. During the last few days the Pope has suffered from costiveness, and his diet is being restricted to milk, bouillon and eggs. This regime counts severely against a man 92 years of age. Very little fresh air is admitted to the Pope's apartments in the Vatican. His valet, Centra, opens the windows of the Pontiff's sleeping room momentarily, night and morning, but the air is more or less vitiated and there is a lack of sufficient oxygen, which also counts against a man of his age. The correspondent of the Temps adds: I have had occasion during the last few days to see a number of persons on intimate terms with the entourage of the Holy Father, and I find their opinion is almost unanimous that Pope Leo has been slowly wasting away, atrophying, for some time. The Pope rises late and does not celebrate mass, except on Sunday, when no one assists him except the faithful Centra, who serves him at these masses. The Pontiff appears not to desire that others should see his infirmities. The trembling of his hands has become noticeable. Dr. Lapponi requires the Pope to drink iced medicinal water in the morning. The ice is used mainly because the Pope is subject to slight inflammation of the gums. The correspondent concludes: I do not wish to unduly alarm the devoted friends of Leo XIII., but nevertheless I am compelled to state that the condition of his health actually is far from satisfactory.

SHARP PAINS IN THE KIDNEYS

Another Severe and Painful Case of Kidney Disease Cured by Dr. Chase's Kidney-Liver Pills.

Mr. Amos Carter, Melbourne, Middlesex county, Ont., writes: "I was for over six months troubled with very sharp pains in the region of my kidneys; the spasms lasted for half an hour at a time and left me with great aching soreness and pain. I tried many remedies, but they did me no good. I commenced taking Dr. Chase's Kidney-Liver Pills according to directions. I had not much faith that they would cure me, but after taking but one box I noticed a change for the better. It may seem incredible, but after taking the second box the pains left me entirely and I have not had them since."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto. To protect you against imitations the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box of his remedies.

Machen Liberated.

Washington, June 8. — U. S. Commissioner Taylor Saturday dismissed the case against A. W. Machen, former superintendent of the free delivery service at the postoffice department, which was pending before him. The dismissal is due to the fact that the grand jury indicted Machen on Friday, thus rendering further action before the court unnecessary.

CONGRATULATIONS FOR MR. STRATTON

Widespread Pleasure at His Vindication.

THE REPORT MAY BE DEBATED

Opposition Whip Reported as Saying That Conservative Party Would Support Gamey.

Toronto, June 8.—The finding of the judges in the Gamey bribery charges is the main topic of conversation in all circles. There was only one idea to be found regarding the merits of the document. It is recognized as a most thorough and exhaustive delivery. Surmises about the future outcome of the whole event were freely made. It is admitted that much of the Opposition thunder has been forestalled, and that they can do nothing now but exhibit their disappointment.

The course of events is largely in the hands of the Opposition. The House has practically reached the end of its work. The report now before the House is the one subject left upon which debate is expected. It may be brought on at any moment by a motion to adopt the report. The expectation is that Tuesday is the earliest day upon which such an event, if this course be taken by the Government, would occur.

The length of the subsequent debate will depend solely upon the persistency of the Opposition members.

Dr. Willoughby, Opposition whip, was reported as saying that it was the intention of the Conservative party to stand by Mr. Gamey.

The Hon. J. R. Stratton, Provincial Secretary, has accepted an invitation to be present at the picnic of Rev. Father Kehoe, of Kenilworth, at Kenilworth village, Wellington county, on Thursday, June 25. On Friday afternoon, on his return from luncheon, Mr. Stratton was delightfully surprised to find upon his desk a magnificent mass of roses, literally a tree of American Beauty roses, a yard at legst in height, and of proportionate circumference. An accompanying card indicated that this beautiful floral gift was sent by the staff of one of the branches of his department as a tangible expression of congratulation, and of esteem and loyalty to their chief. Mr. Stratton has had many evidences of the sympathy of his friends in all parts of the province and Dominion, and even from across the seas, with the vindication brought by the report of the commission, but few have been so valued by him as the tree of roses coming from those whose daily contact in personal and official relations with their chief warranted so complimentary and to the recipient so agreeable a form of expression.

TO PUNISH MOORS

The French Punitive Expedition is Ready to Start.

Paris, June 8.—The French commander, Gen. O'Connor, has arrived at Ain-Sefra, Algeria, to take charge of the police operations against the rebels at Figuig, Morocco, who recently attacked Gov.-Gen. Jonnart, of Algeria, and an escort of French troops on the border. The French operations against the rebels began yesterday. Five thousand troops will take part in the expedition. Meanwhile squadrons of French cavalry are engaged in reconnoitering.

A CHAPTER OF ACCIDENTS

Blazing Load of Hay Causes a Heap of Trouble.

Kingston, June 8. — One of the strangest accidents ever recorded occurred near Harrowsmith on Thursday afternoon about 4 o'clock. Edmund Pixley, residing about one mile east, started for the village with a load of hay. About half way there he met Arthur Ward going in the opposite direction. Before the two vehicles met Mr. Ward tried to draw Mr. Pixley's attention to the fact that his load of hay was afire. Before he succeeded the fire had run around the load, completely igniting it, and frightening the horses, which ran away, colliding with Mr. Ward's team. Mr. Pixley was forced to jump from the load in order to save his life. When the rigs came together the load of burning hay upset, scattering the burning hay over the vehicle and horses of Mr. Ward. At the same time the pole of the hay wagon broke, liberating the horses, which made a dash for the village. It was found impossible to cut loose Mr. Ward's horses, which were severely burned. The hay and both rigs were destroyed. The fire originated from friction, one of the rear wheels of the hay cart rubbing against the side of the rig, setting it afire.

TORTURED THE NEGRO

Horrible and Disgusting Scenes at an Illinois Lynching.

Belleville, Ill., June 8.—The lynching of W. T. Wyatt, the negro school teacher, who shot Supt. Hertel Saturday night for refusing to renew his teaching certificate, was attended with exhibitions of savagery seldom seen in a civilized country. The mob hanged Wyatt to a telephone pole in the public square. While his body was jerking in the agonies of death men built a fire at the foot of the pole. The flames flared up and licked at the feet of the victim, but this did not satisfy the mob, and another and larger fire was started. When it had begun burning briskly the negro, still half alive, was cut down, and after being covered with coal oil, he was cast into the fire. Moans of pain were heard from the half dead victim of the mob, and these served further to infuriate his torturers. They fell upon him with clubs and knives, and cut and beat the burning body almost to pieces, and not until every sign of life had departed did they permit the flames to devour the body. As the fire lighted up the scene the members of the mob stood around the funeral pyre hurling more faggots of wood in the flames. After the body had been reduced to ashes the mob departed. Hertel was removed to the hospital, where the physicians say there is no chance for recovery.

MOB STORMS BRIDGE

Exciting Scene at the Brooklyn Suspension Bridge.

New York, June 8. — Impatient over the impeded traffic, a crowd of seven thousand at the Manhattan end of the Brooklyn bridge yesterday rushed the guards and ticket choppers, and tore up the ticket boxes in an effort to gain the train platform. For more than an hour the mob held possession of the bridge, and it is estimated that 8,000 passed through the gates in absolute freedom. The police reserves were called out, and succeeded in restoring order. The cars were stopped for half an hour. The delay was caused by two slight accidents.

RADIUM BASIS OF THE ELEMENTS

Professor Crookes Says We May Once More Become Formless Nebulae.

Berlin, June 8. — Professor Sir Wm. Crooks before the International Chemical Congress yesterday dwelt upon the possibility of reducing all the elements of matter to one, by finding the resolvable in a single form of energy. The subject was "Modern Views on Matter: The Realization of a Dream." Sir William cited the utterances of Sir Humphrey Davy and Faraday as anticipating the possibility of reducing the elements to simpler bases, and sketched the significance of the Roentgen rays and Boquerol rays, and the experiments of Currie and others, and said: "All these observations find internal connection in the discovery of radium, which is probably the basis of the coarser chemical elements here. Probably masses of molecules dissolve themselves into the other waves of the universe, or into electrical energy. Thus, we stand on the border line where matter and force pass into each other. In this border land lie the greatest scientific problems of the future. Here lie the final realities, wide-reaching and marvelous. Will we be content to see matter dissolving into a multitude of revolving electrodes? Although the whole range of human experience is too short to form a parallel whereby we can foretell the disappearance of matter, nevertheless it is possible that formless nebulae will again prevail when the hour glass of eternity has run out."

THE WELCOME RAIN

Brisk Showers Drown Out the Fores Fires.

New York, June 8.—Brisk showers which began in the small hourse of the morning Saturday and continued throughout the day cleared away the dense pall of smoke-laden fog that overhung the city for three days and permitted the fog-bound fleet of incoming Atlantic liners that lay off the bar to pass in Sandy Hook. The weather bureau reported that thunderstorms had been general in the lower lake region, the upper Ohio valley, and on the Atlantic coast, with the exception of New England. Reports from Long Island, New Jersey and New York State showed that the rain had to a great extent checked the progress of the forest fires.

Some people avoid facts simply because they are stubborn things.

SPECIAL FROM NORWICH, ONT.—The recovery of Mr. Norman Batty, hardware merchant, one of Norwich's oldest and most successful citizens, has excited much comment. For years Mr. Batty has been an unceasing sufferer from catarrhal asthma, and although no end of time and money was spent, relief was not obtained until Mr. Batty commenced Catarrhozone treatment, which perfectly cured him. This case is only equaled by that of Mrs. Bannon, wife of J. J. Bannon, druggist, who was also cured of asthma and hay fever by Catarrhozone after thirty years' suffering. Fully a hundred persons in this town have been cured of catarrhal troubles by Catarrhozone, which is a remarkable proof of its value. Two months' treatment, price $1; small size, 25c. Sold by all druggists or by mail from Polson & Co., Kingston, Ont.

It is a poor joke that won't stand revamping every few weeks.

IMPURITIES IN THE BLOOD.—When the action of the kidneys becomes impaired, impurities in the blood are almost sure to follow, and general derangement of the system ensues. Parmelee's Vegetable Pills will regulate the kidneys, so that they will maintain healthy action and prevent the complications which certainly come when there is derangement of these delicate organs. As a restorative these Pills are in the first rank.
