Bark Gier, from Dalhousie for Glasgow, Oct 22, lat 61.12, lon 37.52.

NOTICE TO MARINERS.

Ottawa, Oct 21—Two additional spar buoys have been established by the government of Canada in the eastern entrance of Great Bras d'Or, Cape Breton Island, as follows:

Blackrock Shoal—A wooden spar buoy, painted black, moored in 3½ fathoms water, on the edge of the shoal running north from Blackrock Point; lat 46.18.30 N, lon 60.23.40 W.

Campbell Point—A wooden spar buoy, painted black, moored in 3½ fathoms water, on the northern extremity of the shoal off Campbell Point; lat 46.18.3 N, lon 60.24 W. These buoys will be removed in December of each year for the winter and replaced on the opening of navigation the following spring.

Washington, Oct 25—The United States engineer in charge of the improvements of Pensacola harbor gives notice that on and after Oct. 24, 1895, whenever the United States dredge Gedney, now on duty at Pensacola harbor, is working at night, the two beacons mentioned in a previous notice will carry each two white lights, set so as to appear ten feet apart vertically to a vessel on the range. The range will thus show four lights, arranged in pairs, in a vertical line. The lights of this range will be shielded in such a way as to be invisible from the entrance whistling buoy.

Boston, Oct. 25.—Capt. Bond, of steamer Essex, reports that the buoy at Pollock Rip Slue is gone.
