Continued from page 1 UofC fee hike

year, and an increase for all Albertan students the year after."

President Wolf was asked about a rumoured $300 increase for all students.

"I can't confirm it, but I think it's in the wind," he said.

The advent of the Test of English as a Foreign Language (TOEFL), an English competency test which the University of Calgary will adopt in January 1976, has made the argument about quotas and fee hikes redundant to some, the gathering was told.

"TOEFL would do the job of the fee increase and quotas. It would cut down the number of international students by 50 percent," said James Chung, a member of the international student economic committee.

Wolf said he had heard of TOEFL at an earlier meeting but couldn't "speculate" if he would have presented the proposal had he known that the test was to be introduced at U of C.

The TOEFL test was condemned at the fall NUS conference because it discriminates against certain international students, and discontinuance of the test was recommended.

Wolf said he had no further plans for the proposal at this time.

"I really don't think the proposal could ever be construed as racist," he said, but "I'm not bitter" about the defeat of the fee increase.

The third resolution passed at the meeting calls upon the Students' Union to lobby the government for Alberta Heritage fund money.

Referring to this Wolf said, "My heart isn't in it. Going after the Heritage fund sounds great, but isn't realistic. Actually I hope it doesn't antagonize the government."

-B of G

Board of Governors," given the powers of interpretation the Act would create for the Ministry.

Another counsellor recommended "that the whole damn Draft should be dumped" and general consensus was reached over the statement that: "We disagree with the system of post-secondary education and massing the power in the hands of the minister." And, "We disagree with the whole intent to centralize education and the flow of manpower."

Agreement with the stand of the Federation of Alberta Students was also reached and it was decided that the Students' Council would back up the outstanding points of the FAS submission.

Counsellors felt there wasn't enough time given to do an adequate investigation since all reviews of the Act were expected by Dec. 1. It was therefore decided that the Council Executive would prepare a letter rejecting the Act and calling for a redraft of government education policy.

If you are an engineer, this chair could be yours.

This is where you could find yourself if you become a Maritime Engineering Officer in today's Canadian Armed Forces. The Master Engineering Control centre of one of our new DDH 280 Destroyers.
No boilers. No stokers. No sweat!
The power within these beautiful ships comes from jet turbine engines. The machinery that heats, cools, ventilates and provides water throughout these ships is the latest.
Maritime Engineering Officers on these ships work with some of the most sophisticated equipment in the world...with expertly trained men who are as proud of their work as they are of their ships.
If you're studying engineering, think about this Officer's job. It's a very special one. It could take you anywhere in the world!
GET INVOLVED WITH THE CANADIAN ARMED FORCES.
