Deserve Success and you shall Command it.

VOL. 17.--NO. 51. SACKVILLE, N. B., THURSDAY, MAY 5, 1887. WHOLE NO. 884.

Legislative Library

FARM AND HOUSEHOLD.

—Florida farmers are barrelling new potatoes for the Northern States.

—Farmers are reported to consume 35,000 tons of twine per year on reef binding harvesters.

—It is well to varnish an oil-cloth twice a year, if you do, a good one will last as long as you will want it to.

—Put camphor on cold-sores when they first come, and that may heal them, or prevent them from developing.

—Cloths dipped into hot potato water are recommended for immediate and complete relief in the severest cases of rheumatism.

—A tablespoonful of powdered alum sprinkled into a hogshead of water and stirred will precipitate to the bottom all the impure particles.

—A piece of charcoal laid upon a burn will case it almost immediately and if kept there about an hour, it is said, the wound will be entirely healed.

—For those suffering from weak lungs or a hacking cough, a few drops of tar taken on a lump of sugar will give relief; five or six drops should be sufficient for a grown persons.

—A farmer in Kennebec county, Maine, recently dressed three lambs, the meat of which weighed 100 pounds, and for which he received a check from the commission men in Boston for $36.

—Manure is one of the incidental products of sheep raising, and its careful saving and intelligent application would do much to add to the profit. It is undoubtedly the best manure made on the farm.

—Milk may be canned just as you would can fruit. Bring the milk to the boiling point and fill your jars to the brim with it; then shut airtight. This will keep any length of time, and be just as good when opened as when it was put up.

—To preserve goods from moths, do not use camphor in any form. Pieces of tar paper laid in fur boxes and in closets are a better protection. Five cents will buy enough to equip all the packing boxes and closets of a large house for a year.

—The river thyme, which has been generally voted a nuisance, choking up ponds and rivers with its rapid growth, is now thought to be a remarkable health plant. A German doctor has discovered that in his district malaria and diarrhœa have decreased since the water thyme began to infest the streams. The plant feeds on decayed vegetable matter, etc., which are supposed to breed disease germs.

—A bottle of turpentine should be kept in every house, for its uses are numerous. A few drops sprinkled where cockroaches congregate will exterminate them at once; also ants, red or black. Moths will flee from the odor of it. Besides, it is an excellent application for a burn or cut. It will take ink stains out of white muslin, when added to soap, and will help to whiten clothes if added to them while boiling.

—The Canadian export trade in cattle is steadily growing, according to the chief inspector of cattle for the Dominion. The trade dates from 1877, when 7,000 head were shipped to Great Britain. In 1885, Montreal shipped 58,598 head of cattle and 80,000 sheep. A considerable number, he states, are sent to the United States, so that the figures above do not represent the total shipments. The total exports to all countries in 1885 were 143,003 cattle, and 335,043 sheep.

—The best way in which to clean hair brushes, says the *Popular Science News*, is with spirits of ammonia, as its effect is immediate. No rubbing is required, and cold water can be used just as successfully as warm. Take a teaspoonful of ammonia in a quart of water; dip the hair part of the brush without wetting the ivory, and in a moment the grease is removed; then rinse in cold water; shake well and dry in the air, but not in the sun. Soda and soap soften the bristles, and invariably turn the ivory yellow.

—Wood oil is made on a large scale in Sweden from the refuse of timber cuttings and forest clearings and from stumps and roots; and, although it cannot well be burned in common lamps on account of the heavy proportion of carbon it contains, it furnishes a satisfactory light in lamps especially made for it, and in its natural state is said to be the cheapest of illuminating oils. Thirty factories produce about forty thousand liters of the oil daily; turpentine, creosote, acetic acid, charcoal, coal tar oils, and other useful substances are also obtained from the same materials.

—James Stuart, of Conway, Mass., promised a neighbour that if his next child was a girl, he would vote against granting liquor licenses at the coming election. He kept his word and voted "No license," and the town went "No licenses" by one vote. Little Miss Stuart starts in life with a strong record as a temperance worker.

—P. T. Barnum says that during his life as a showman he has received over $80,000,000 from the people.

CORRESPONDENCE.

Bayfield.

—The breakwater men are at work again getting down the timber. Mr. Strachan is expected daily.

—The snow storm of yesterday has not improved the roads which are almost impassible with mud and snow.

—Mr. James McLeod our popular young merchant returned on Monday from St. John, where he had been making his spring purchases.

—The strait is still crowded with ice, which keeps the weather cold. A mail was sent over by the Capes on Friday last, and many passengers continue to come this way.

—Last week was a great week for sportsmen. They say fowl have not been so plentiful for years. Messrs. Henry and Albert Polly got up to a flock of brant in their floats, and with four shots killed forty-two.

—Quite a boom in building operations is anticipated at the breakwater this season. Mr. John Tucker has a large hotel in course of construction. Mr Robt. McGloshing is preparing to build a house, store and barn. Mr. W. B. Walsh a house, and Mr. Theodore Heartly a house.

Calgary.

Extracts from a letter by the Rev. Leonard Gaetz, of Calgary, formerly a student in the Sackville Institutions:

The Red River district is a section of country taking its name from a river of varying dimensions running through it. The aspect of this country may be described as rolling prairie, dotted over with bluffs of spruce or poplar trees, interspersed with lakes and meadows, intersected with numerous small creeks, giving the whole a peculiar park-like appearance, which in point of natural beauty is beyond the possibility of exaggeration. Wood and coal abound to a greater or lesser degree in all the sections of the district, and although timber is not so evenly distributed as to provide every homestead with just the requisite quantity for building fences and fuel, yet on the whole the equality of its distribution is remarkable; and on the slopes of the Red Deer westward to the mountains is a good supply for manufacturing and export for many years to come. Coal is found in drift all along the banks of the river, and in cuttings, seams of good quality have presented themselves, thus settling the question of cheap fuel beyond a doubt. There is also an abundance of the very best water, not only in the main river, but in numerous creeks and springs. The pasture is rich, varied and abundant. Cattle are sometimes not housed at all, and in any case they may be trusted to forage for themselves from six weeks to two months earlier than in the eastern provinces, and much later in the fall. The soil on the "Bench lands" or high prairie, is generally a black loam from 12 to 36 inches deep, resting on a clay sub-soil, and taking the district as a whole I cannot conceive any soil better adapted for the production of all or any of the staple crops of the eastern provinces. Climate—there are probably few matters of greater interest to the intending settler than that of climate. Taking the testimony of settlers who have been here for years and uniting it with my own experience I may say that the winters are milder and more pleasant than in the eastern provinces. Blizzards are almost unknown, snow fall light and seldom drifts, rain a rare occurrence during the entire winter, and the weather mild and clear. Mr. Gaetz adds: I have always been slow to advise, but I had sufficient faith in the future of this country to risk the comfort and welfare of a large dependent family, and spend my all in getting here and starting in a new and untried sphere. The inducements to emigrants are 160 acres of good land free for homestead, and 160 more can be obtained by three successive years' occupancy at the rate of two dollars per acre. Who should come: Not the indolent or incompetent, not the visionary or irresolute, but the man of pluck and perseverance, who is willing to rough it and bound to succeed.

—A circular from Mr. Crockett, Chief Superintendent, says the New Brunswick Board of Education has been pleased to make the following regulation:

"That teachers be authorized with the sanction of trustees to set apart any Friday that may be deemed most suitable during the month of May or June for the purpose of improving the school grounds and planting thereon trees, shrubs and flowers, such day to be known as Arbor Day, and when duly observed credit to be given for it as a lawful teaching day."

The object of the regulation is to encourage the improvement and ornamentation of school grounds and the cultivation of habits of neatness and order and a love for the beautiful in nature among the pupils.

—Most of the birthday presents which the Emperor William received from his relatives were very shabby, and wholly unworthy of the occasion. The best gifts were the Dresden china, presented by the King and Queen of Saxony, and the Black Forest clock of the Grand Duke and Grand Duchess of Baden. The carving of this was a masterpiece of the Schwartzwald art, and it is altogether a most beautiful piece of furniture.

—It will be a mighty fast single sticker that will beat the Thistle for the America's Cup. The Galatea sailed very fast last year and carried 2,000 feet of canvas less than the Mayflower. The Thistle, on account of her beam, will be a veritable mountain of canvas, and our yachtsman will have to get a great yacht to hold the cup here. Perhaps the Mayflower will do, but that is doubtful—*Sporting and Turf Record.*

—The present population of Manitoba is 108,640, an increase of sixty per cent. in five years. Of this number 95,455 are whites, 7,494 half-breeds and 5,691 Indians.

—The Scott Act is being vigorously enforced in Annapolis County. Last week three persons were fined $50 each and costs for violation of the Act.

The Phosphate Industry of Canada.

There are at present eight phosphate mines carrying on active operations in the neighbourhood of the Lievres river, Ottawa Valley. They are situated at a distance of from nine to twenty-three miles north of the village of Buckingham; and are known as the Emerald mine (American company), the Little Rapids mine (Canadian owner), Battle Lake mine (Anglo-Canadian Phosphate Company), McLaren's mine Canadian owner), the North Star mine (American company), High Rock mine (English Company), Union Mine (American company), High Falls mine (Anglo-Canadian Phosphate Company). Between 400 and 500 men in all are employed at these mines. Machinery of some kind is used at most of them, and air compressors are employed at the High Rock, Little Rapids, and North Star mines. Besides these mines several others phosphate localities on the Lievres have been worked at various times, and with varied success.

The deepest mine on the river, the North Star, already sunk to the distance of almost 450 feet from the surface. The second deepest is Battle Lake mine, which has reached almost 250 feet in an inclined shaft. The Anglo-Canadian Phosphate Company, the owners of the Battle Lake and Hige Falls mines, are also working on a large scale a mine in North Burgess, five miles from Perth, and known as the Otty Lake mine. It is one of the very best phosphate mines in Canada. An air compressor, capable of working the rich phosphate veins on the property. The output of phosphate in 1886 was 18,968 tons, as against 23,849 tons in 1885, and 20,747 tons in 1884. This falling off in product was largely due to the low price offered for Canada phosphate, and is only temporary.

The phosphate is shipped down the Lievre in scows in the summer time and loaded at Buckingham on cars for Montreal, whence it is shipped to the various markets in Great Britain and Europe. The quality of the phosphate is very good, some shipments averaging over 85 per cent. phosphate of lime. One shipment from the North Star mine averaged 86,48 per cent.—*Ottawa Journal.*

Great Trotting.

(N. Y. Herald.)

Harry Wilkes, the bay son of George Wilkes and Molly Walker, is a trotter of the improving kind. He came on the turf in September, 1882 and retired for the season with a record of 2.23¼. With the close of 1884 he had reduced his record to 2.15, and the following season cut down these figures to 2.14¾. Last year he started in sixteen races winning fourteen, and was second in one, his winnings in purses being time but failed to beat his $17,848. He started once against record. Late in the fall he was taken to California and was matched to trot Oliver K, record 2.16¼, for five thousand dollars. The race was fixed for April 2, and both geldings were given a special preparation for the struggle. Oliver K. met with a temporary accident which threw him out of training, and his owners, rather than risk perpetual injury paid forfeit. Harry Wilkes was in splendid fettle, and when a purse of two thousand dollars was hung up for him to trot against his record the lovers of good trotting knew that he would be sent for the prize. The trial was made over the Bay District track at San Francisco on Saturday, and, as was reported in the *Herald* of yesterday, the great gelding scored a victory in his first attempt, flashing under the wire in 2.13½. It is stated that the horse finished with something to spare.

This performance of Harry Wilkes places him fifth on the record slate, Maud S. standing first with 2.08¾, Jay-Eye-See 2.10, St. Julien 2.11¼, Maxey Cobb and Rarus 2.13¼. Maxey Cobb is dead, St. Julien is out of training, Maud S. and Rarus are not public performers. This leaves Harry Wilkes, Jay-Eye-See and Oliver K. to contest the campaign honors of the current year. The season promises to be a long and trying one and the horse to go through it successfully will need a hardy constitution and strong legs. Jay-Eye-See has been on the complaining list for a long time, but he is now reported as doing well. Should the little black gelding, who for a short time deprived the peerless Maud S. of the trotting crown, score for the word this season it is almost certain that Harry Wilkes and Oliver K. will be thoroughly entended, and not improbable that 2.10 will be beaten.

—A Hungarian band that was to play before the Czar at St. Petersburg had a novel experience. Each horn was taken to pieces and searched for bombs, and even the catgut of the fiddles was minutely examined before the players were allowed to appear before the emperor.

—The Michigan legislature has undertaken to exterminate the English sparrows, and put a price of one cent upon the head of every sparrow that is brought in.

—It has been suggested that a new gold coin to be called the "Victoria" of the value of fifty shillings be struck in commemoration of the Jubilee.

Ocean Greyhounds.

Since the year 1879 the following great ships have been placed upon the Liverpool and New York lines. "Taking them in the order of their fastest passage, out or home, they stand thus:"

	Days.	Hours.	Minutes.
1. Etruria	6	5	31
2. Umbria (sister ship),	slightly longer.		
3. Oregon	6	10	35
4. America	6	13	34
5. City of Rome	6	18	0
6. Alaska	6	18	37
7. Servia	6	23	55
8. Aurania	7	1	1

The time has thus been shortened much more than half since 1840, and has been lessened forty per cent. since 1869.

In addition to the great ships mentioned, there have been placed upon the line from Bremen to New York, touching at Southampton, England, eight new or lately built ships of the North German Lloyd, which form altogether the most compact and uniform fleet upon the Atlantic. Their three last ships, the Trave, Saale, and Aller, are marvels of splendor and comfort, ranking in speed and power very little short of the fastest of the Liverpool ships. They, as were the others of the company's eight "express" steamers, were built by the great firm of John Elder & Co., of Glasgow, their machinery being designed by Mr. Bryce-Douglas, to whose genius is also due that of the Etruria and Umbria, the Oregon, Arizona, and Alaska. That of the Trave, Saale and Aller, however, is triple expansion, these being the only ships of great European lines of this character, besides the new Gascogne, Bourgogne, and Champagne (their equals in speed and equipment), of the French Compagnie Transatlantique, which were built in France, and which reflect so much honor upon the French builders. All these steamers are of steel, with cellular bottoms carefully subdivided, and fitted with a luxury and comfort quite unknown thirty years ago—with more space, better ventilation, and better lighting.

It will be difficult to go beyond them until a further change is accepted to twin screws. That this change will soon come is pretty sure. It will hardly be possible to extend the power with a single screw beyond that of the 14,000 horse-power already in the Umbria and Etruria; with twin screws, however, it may be carried much beyond. Their adoption would mean greater accommodation and comfort and less racing of the machinery at sea, but, above all, it would mean greater safety. Under present circumstances a complete break-down of the machinery of these great ships is a disaster which may entail delay as the least of the difficulties. No sail-power can be given them which would serve to carry them into port; they must lie helpless logs in the water until fortunate enough to find a friend to tow them.

It is scarcely possible that both the engines of a twin-screw steamer should be seriously injured at the same time, so that arrival would be only slightly delayed in case of damage to the one set of machinery. In fact, such a ship would be two vessels in one, divided by a great longitudinal bulkhead from top to bottom; the boilers, engines, and all the appurtenances of the one side being wholly independent of the other.—From "The Development of the Steamship," by Commander F. E. Chadwick, U. S. Navy, in *Scribner's Magazine* for May.

Advice to Mothers.—Are you disturbed at night and broken of your rest by a sick child suffering and crying with pain of Cutting Teeth? If so send at once and get a bottle of "Mrs. Winslow's Soothing Syrup" for Children Teething. Its value is incalculable. It will relieve the poor little sufferer immediately. Depend upon it, mothers; there is no mistake about it. It cures Dysentery and Diarrhœa, regulates the Stomach and Bowels, cures Wind Colic, softens the Gums, reduces Inflammation, and gives tone and energy to the whole system. "Mrs. Winslow's Soothing Syrup" for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States, and is for sale by all druggists throughout the world. Price twenty-five cents a bottle. Be sure and ask for "Mrs. Winslow's Soothing Syrup," and take no other kind.

—John Chalmers, a mail carrier at Belledune, was killed by a freight train yesterday afternoon, about three miles from Belledune station. He was in a stooping position on the track when first noticed, and the driver thinking it was a trackman at work did not slow up. He was apparently in a stupor, for he made no effort to get out of the way. He was struck by the engine and instantly killed.—*Newcastle Advocate.*

—A piece of property at the corner of Lispenard street and Broadway, New York, which was sold in 1824 for $5,500, changed hands the other day for $225,000. Another in Chambers street which sold for $12,000 in 1850, brought $83,350.

—The Lord Mayor of Dublin has called a meeting for the purpose of taking steps towards the erection of a national memorial to Mr. Gladstone.

—It is claimed that sanitary science in England and Wales has reduced the death rate in fifty years from 22.07 per thousand to 19.62.

—A sharp shock of earthquake has been experienced in the Islands of Jersey and Guernsey. No damage was done.

—The annual consumption of lager beer in New York city is set down at about 6,000,000 barrels.

—The drink bill of the United States is more than $400,000 a day for every day in the year.

Perfect Hair

Indicates a natural and healthy condition of the scalp, and of the glands through which nourishment is obtained. When, in consequence of age and disease, the hair becomes weak, thin, and gray, Ayer's Hair Vigor will strengthen it, restore its original color, promote its rapid and vigorous growth, and impart to it the lustre and freshness of youth.

I have used Ayer's Hair Vigor for a long time, and am convinced of its value. When I was 17 years of age my hair began to turn gray. I commenced using the Vigor, and was surprised at the good effects it produced. It not only restored the color to my hair, but so stimulated its growth that I have now more hair than ever before.—J. W. Edwards, Coldwater, Miss.

Ayer's Hair Vigor,

Sold by all Druggists and Perfumers.

If you are suffering from debility and loss of appetite; if your stomach is out of order, or your mind confused; take Ayer's Sarsaparilla. This medicine will restore physical force and elasticity to the system, more surely and speedily than any tonic yet discovered.

For six months I suffered from liver and stomach troubles. My food did not nourish me, and I became weak and very much emaciated. I took six bottles of Ayer's Sarsaparilla, and was cured.—Julius M. Palmer, Springfield, Mass.

Ayer's Sarsaparilla,

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Sold by Druggists. Price $1; six bottles, $5.

Sackville Book Store.

The subscriber offers at amazingly low low prices a large assortment of

WALL PAPERS,

From 4c. a roll upward, fully 25 p. c. below usual prices.

Also, just received, a large stock of Elegant Mouldings, in Gold, Copper, Bronze, Gilt, and lower grades.

Staple and Fancy Goods

as usual in full variety. Jubilee and Canvas Papeteries Novelties.

TO ARRIVE:

A selected assortment of Curtain Poles, all lengths, with fixtures complete; Breech-loading Gun Cartridge Shells, Wads, Reloaders, Caps, Rimmers, etc., sizes 10 and 12.

A full line of American Wall Papers and Borders, including "Mica" Papers, now for the first time introduced here—just lovely.

APPLE TREES.
THE subscribers have for sale at their Nursery, near Colonial Copper Mine, Dorchester, a large number of choice APPLE TREES, of varieties best adapted to this climate. The trees are all of native growth, and are guaranteed to give better satisfaction than stock raised in warmer localities. Prices on application. Orders by mail carefully filled.
A discount of 20 per cent. will be given to purchasers who personally take their trees from the Nursery.
