SERIES 23 STUDEBAKER LIGHT-SIX TOURING CAR - $1375

"Built-in-Canada"

500,000,000 Miles of Service

More than one hundred thousand owners know the sturdiness of Studebaker Light-Six construction. They know that it is powerful and economical, because their Light-Sixes have conclusively demonstrated these qualities in more than 500,000,000 miles of service.

The Studebaker Light-Six is built to stand up. The touring car body is constructed entirely of steel, and like the chassis, is made to withstand hard service. And the Light-Six is unusual for its economy—27 world-wide tests having established an average fuel consumption of 26.9 miles to the gallon.

The value of the Light-Six is high, because it is manufactured complete by Studebaker, thereby eliminating parts-makers' profits.

You can feel secure in the purchase of a Light-Six—because of its proved dependability and economy—and because it is backed by Studebaker's 71-year-old reputation for honest value and fair dealing.

New steel body. Upholstered in genuine leather. One-piece windshield with attractive cowl lights set in base. Quick-action cowl ventilator. Curtains, bound on three sides by steel rods, open with doors. Thief-proof transmission lock. Standard non-skid cord tires.
