SATURDAY, OCTOBER 26, 1850.

A correspondent, writing to the *Gazette*, complains, with some little asperity, that no one has noticed a most ingenious attempt at the solution of a long-vexed mathematical problem, the Quadrature of the Circle, sent for exhibition to the Bonsecours Hall. How in the world can any man suppose that such a thing as this could have been examined, tested, and its merits decided on, during the time the Exhibition was open? Why, it hung in a position in which we defy the sharpest sighted man in the world to have read the figures and references, and even had the Judges of the various classes been inclined to have examined a production, certainly not within the province of this Exhibition, how many of them were competent to express an opinion on a subject which has baffled the most profound Mathematicians for two thousand years? How many men are there in Montreal, in Canada, who are competent to examine such a work?

It is not many months since Mr. Fleming, also a resident of Montreal, put forth an elaborate work, in which he also assumes to have solved this knotty problem. We have been anxiously on the look out, taking some little interest in such matters, but we have not yet seen this work of Mr. Fleming noticed in any scientific publication of the day. Now, for reasons not necessary to mention, we have an interest in the work sent to the Bonsecours Market, and should be glad to know that the venerable gentleman, who sent it there, has succeeded in his laborious attempt; but his warmest friends may be sure that the examination of such a question is not the work of a few days or hours. The elaboration of the problem is said to have taken him seven months of close application; but here is a writer who expects a decision on its truth to be come to in six days—the tablet on which it is described being all that while hung up, out of sight, on the wall of a room in which a public Exhibition is held! Verily, there are unreasonable people in this world!

It is stated that Mr. Vice-Chancellor Jamieson has tendered his resignation to the Government. Mr. Jamieson is entitled to a large retiring pension under Mr. Blake's Chancery *Reform* Bill.

It is said that the Government, on the unanimous vote of the Corporation of Toronto, will appoint Mr. George Duggan Recorder of that city.

We learn that the Bishop of Exeter has refused to accept from Clergymen coming into his Diocese [illegible] Archbishop of Canterbury. The *Examiner* tells us, that a gentleman, just returned from New York, saw Mr. Hoople, while in that city, and Mr. Hoople declared to him that he had nothing whatever to do with the Toronto Road Company!—yet £36,000 of Stock is registered in his name! When are we to get at the bottom of the mystery in which this Road business is involved? Who is the real owner of this Stock?

A grand dinner has been given by the electors of Norfolk to their member, the Honble. H. J. Boulton.

A correspondent, writing to the Kingston *News*, endeavors to account for the great prevalence of desertion in the Army in Canada, by saying that in this country the soldier has to submit to a stoppage of *six-pence* per diem for one pound of bread and one pound of beef, being the same sum that is deducted in England for the same amount of provisions, whereas in Canada the beef may be bought for one-third the price that it can be in England. After this deduction, the soldier has but seven-pence a day, out of which he has to find himself in vegetables, salt, tea, sugar, milk, and beer, (if he can get any,) and all his necessaries, as they are termed, that is shirts, flannels, stockings, forage cap, stock, pocket handkerchiefs, towels, brushes for hair, clothes, boots, and brass; comb, razors, knife, fork, spoon, canteen, oil, soap, blacking, heel ball, pipeclay, rotten stone, and a dozen other things, by which it will be seen that he can have very little left out of his seven-pence to spend. This correspondent states that the discontent is owing to the fact, that the soldiers believe their rations of bread and beef might, in this country, be had, either by contract or private arrangement, for three-pence sterling, all the year round, which would leave them three-pence a day more to spend. If this be the case, the Home Government certainly ought to enquire into it, for desertion is so base a crime, that every means ought to be taken to put an end to it.

The *New Brunswicker* says—A number of discharged convicts from the hulks of Bermuda have arrived in Halifax, and commenced their operations by robbing clothing from private residences. The Mayor cautions the inhabitants to have their doors locked, as the only means of keeping out the intruders. These convicts are the most adroit thieves in the world, and their landing on these shores cannot but be looked upon as a great evil.

Newfoundland.—The following items are from files to the 9th instant:—

The Protestant Episcopal Cathedral at St. Johns has been opened with great ceremony. It is described as a plain but substantial edifice. The interior fittings are of oak, and although immense sums of money have been expended on the building, it will yet require a large amount to complete it.

It is feared that the attempt on the part of Newfoundland to procure specimens for the Great Industrial Exhibition, in 1851, will prove a total failure.

It is feared that the entire crop of potatoes in Prince Edward's Island will prove a failure.

The frame of a new Temperance Hall, in course of erection in Charlottetown, was blown down during the recent gale.

Angry discussions among the newspapers of the Island are still the order of the day.

The Legislature, P. E. Island, has again been prorogued until the 27th November.

Seventh Year's Annual Report of the "University Lying-in Hospital."

The Committee of the University Lying-in Hospital, in reviewing the events of the past year, cannot but express their thankfulness to the Giver of Good, at having been enabled to maintain the Hospital in all its efficiency.

Unfortunate and untoward events have, from time to time, deprived the Committee of efficient members, and within but a short period, they have had to deplore the loss by death of two of the most untiring and zealous, whose exertions contributed most materially to the well-doing of the Institution, and whose lovely and christian dispositions had endeared them to the hearts of every member.

With the intention of making this Report public, the Committee will recapitulate the benefits derived by the community at large, through the medium of the University Lying-in Hospital.

1st,—In the efficient and satisfactory instruction of advanced Medical Students in Obstetrics, previous to taking their degree, making the medical education complete within the Province.

2nd,—Properly instructing females as Midwives and Nurse tenders.

3rd,—Rescuing the poorer classes of women from such suffering and misery in child-bed, as often proves the fruitful source of malignant fevers in large cities, carrying their scourge even into the dwellings of the rich.

These women may be arranged into four classes:—

1st,—The poor man's wife, perhaps the mother of a helpless family.

2nd,—The Widows, (and they have been numerous during the past year,) they who, but lately, had the strong arm of affection to supply their wants, have to seek that supply from a public charity and Public Institution.

3rd,—The houseless emigrant—also numerous this year—the stranger in her hour of peril and great destitution, who can refuse their aid to her? Think of him who has made her cause his own; "I was a stranger and ye took me not in, I was sick, and ye visited me not."

4th,—Last, but not the least sufferer, is the "fallen sister," who has here found refuge from death, and shame, and sin, and greatly do the Committee rejoice in their belief that the refuge afforded them has been the means of saving all, with but one or two exceptions, from total ruin. With these facts repeatedly urged and laid before the public, can any close their hearts to the daily increasing wants of this charity? All would lay false reasoning aside if they would consider in their hearts our Saviour's reply to those who charged him with keeping company with sinners:—"I came not to call the righteous, but sinners to repentance."

The Committee regret that Mrs. Buchanan, the resident Midwife, under whose superintendance much good has been effected, has found it necessary to tender her resignation, and will leave next May. Her loss will be greatly felt by the Institution, but care will be taken to supply her place by a properly instructed and well principled person.

By the proceeds of a Soiree, held on the 29th January last, the handsome sum of £73 7s. 6d. was most opportunely added to the funds of the Institution—the late lamented Secretary and Treasurer, Mrs. Gilbert Griffin, having greatly contributed to this success; and the Ladies have to thank Dr. Barber, for the sum of £3 10s., the proceeds of a Lecture kindly given by him in aid of the Institution.

Although the supporters of the University Lying-in Hospital have not materially increased, the benefactors of former years have not withheld their liberal contributions, to whom the Committee gratefully record their thanks; also to the gentlemen of the Seminary, for a handsome donation of £12 10s.; and to the constant patrons, whose gifts of Groceries and other useful articles have been of very material assistance to the Hospital.

The Committee are thankful for the annual grant of £50 from the Government, yet the Ladies regret that the amount allotted is not sufficient for the increasing wants, and they consider it not commensurate with the importance and claims of this valuable Institution, which is open alike to [illegible] preceding year.

The total number of patients admitted during the seven years since the opening of the Hospital in November, 1843, now exceeds one thousand, of whom only one died of child-birth—facts which the Committee adduce in proof of the benefits rendered by this Institution.

The Directrss and Lady Managers of the University Lying-in Hospital, thankfully acknowledge from Dr. McCulloch, the amount of the prizes awarded to him at the Industrial Exhibition, being £5 for the best collection of Stuffed Birds, £5 for the best collection of Stuffed Animals, and £1 10s. for the best collection of Indian curiosities.

Erratum.—In the list of prizes, published in our paper of Thursday—Class D, Section 4—for "Assistant" hair work, to D. Bansley, 129, Notre Dame Street, read "Best Assortment."

The *Canadian*, in recording the death of the Governor of Prince Edward's Island, remarks that, with the except on of Canada, it is rare that a Governor dies at his post. Out of fifteen Civil or Military Governors who have held office in this Province within the last forty years, thirteen have died, and if we recollect rightly five of the number have left their bones in this country.

Buffalo, October 22.

Flour Market.—Fair enquiry to-day, and we notice sales, 2,400 barrels, principally at $3,87½ for ordinary brands. Ohio and Michigan, 300 barrels, common article, sold at $3,75, and 200 favorable Michigan $3,94—200 fancy at $4.

Grain.—There is a firm miller's demand for wheat; sales, 6,000 Upper Lake Spring, at 53 cents, 14,600 bushels Cleveland and Wash, and 6,000 Michigan, at 52 cents. Corn in good demand; sales, 14,500 bushels, at 52 cents.

Hamilton, October 22.

As we anticipated, and have repeatedly warned our readers during the last month, a decline has taken place in the grain market, and there is every probability that this unsatisfactory state of things will continue. Prices have evidently reached their maximum, and those who sold at 4s. or as low as 3s. 9d., have reason to congratulate themselves on their foresight. Yesterday the highest price offered was 3s. 9d., and we learn that buyers are dissatisfied with this rate, and will probably fall another penny to-day. We understand that wheat has been coming in pretty freely during the week, but the competition has fallen off, by the withdrawal from market of purchasers for Montreal and Quebec. This has been caused by the anticipated advance in freight and insurance at the close of the present month—the most serious drawback against which the Canadian farmer has to contend.

Barley is rather scarce, and buyers would willingly advance a trifle on last week's price—2s. 6d.

The common market is well supplied with vegetables, fowls, &c., at a moderate price, and fuel begins to make its appearance in the farmers' waggons.

The weather for several days has been fine; but at the time of writing there is every prospect of another storm.

We learn that the Assistant Commissioner of Public Works is desirous of obtaining Spencer Wood House, the property of Henry Atkinson, Esq., as a residence for His Excellency the Governor General.—*Quebec Chronicle.*

Arrived per schr. *St. Laurent*, the Rev. Mr. De La Maze and the Rev. Mr. Smith,—Protestant Missionaries. The former to be stationed at Gaspe Basin, and the latter at Point St. Peter. A great display of colors from the shipping and the firing of cannon took place as soon as it was ascertained that the above gentlemen were on board.—*Gaspe Gazette Oct. 10.*

DIED.

[illegible] in the 42nd year of his age. Friends and acquaintances are respectfully requested to attend his funeral, on Saturday, the 26th instant, at 3 o'clock, P. M., from his late residence, Main Street, St. Lawrence Suburbs, to the place of interment.

At LaChute, on the 20th instant, after four days severe suffering, which was endured with exemplary resignation to the Divine will, Mr. Thomas Lockie, Senior, aged 79 years; deeply and deservedly regretted by a large circle of friends, by whom he was much respected and beloved for his many Christian graces.

Dr. Sherwood's Galvanic Embrocation—It is now generally admitted by the learned and scientific, that the mysterious power called *Galvanism* or *Magnetism* is, in fact, the principle of Vitality or Life, and that disease, in many of its most painful forms, is entirely owing to the absence of this Galvanic or Magnetic power in its healthy proportions. If, then, we can readily supply this vendicous Power, when it is thus deficient, we can successfully combat disease, and this has been fully and perfectly attained by this most wonderful scientific discovery, of combining Magnetism or Galvanism with a Fluid which has cost the inventor of this Remedy years of study and labor.

There is not an intelligent physician, who has kept pace with the progress of science, that does not readily approve of the use of the Magnetic power in various diseases, and there is scarcely a medical journal, either in this country or in Europe, which makes its appearance without the statements of various cases, showing some new effects of these wonderful agents, or corroborating previous experience of their beneficial use. The inventor of the *Galvanic Embrocation* has great pleasure in being able to state, that a majority of the most distinguished physicians of New York constantly recommended this Embrocation in their practice, and from many of them he has received the kindest testimonials of approval and commendation.
