NEW ADVERTISEMENTS SINCE LAST ISSUE

TO ADVERTISERS—All changes of advertisements must be handed in not later than 4 p.m. on the day previous to be sure of insertion. Advertisements and business notices must be arranged for in the counting-room.

Forest City Business College.
Operators Wanted—185 Dundas street.
Meeting—St. John's Lodge.
Suits and Overcoats—Oak Hall.
Pure Drugs—W. S. B. Barkwell.
Baking Powder—Cairncross & Lawrence.
Servant Wanted—351 Princess avenue.
Wheel Parade—Bicycle Club.
Girl Wanted—185 Mill street.
Card—Dr. Butler.

SMITH'S PATENT HYDRANT.

This hydrant is acknowledged by all mechanics to be far ahead of all others. Its superiority is shown by the popular favor it has attained. The public are warned against other dealers who claim to have a hydrant which can be compared to a straight-way valve. A straight-way valve has no seat to be subjected to the action of any liquid, therefore a hydrant to be compared to a straight valve must have no seat to be subjected to the action of the water, and there is no other hydrant made except Smith's Patent Hydrant without a seat, and we claim to have the only straight-way hydrant. All others have a seat subjected to the action of the water, and the majority of them will have to be dug up inside of a year to be repaired, and at extra cost. This we are prepared to guarantee the users of our hydrants against. For sale by the patentees; price, $5. **SMITH BROS., Plumbers**, 172 King street, London. Telephone, 538.

THE WESTERN FAIR.

(Continued from page 3.)

To-Day at the Fair.

This is Western Ontario's day and from all sections of the Garden of Canada the good people came to London by train loads, wagon loads and afoot. The crowd was as great if not greater than that of previous days, and above and more important than all else the sun shone forth with mid-summer splendor, warmed everybody and put them in good spirits. Nothing was wanting to add to the height of the scene. The cries of the fakirs, the music by the score of brass bands, and the perpetual clanging of the rival dinner bells convinced everyone that the great Western Fair was still in progress, and had not yet attained the acme of its greatness. Among the distinguished visitors of the day were the directors of the Toronto Industrial. They came up in a Pullman sleeper attached to the Globe flyer this morning and registered at the Tecumseh House, where they had breakfast. It was about 10 o'clock when they arrived on the grounds. In the company were Robert Jaffray, President Globe Printing Company; Mr. C. W. Taylor, business manager of the Globe; Wm. Christie, the well-known Toronto biscuit manufacturer and capitalist; Capt. McMaster, who, as acting president of the late big Toronto Fair, won golden opinions; Manager Hill, of the Toronto Exhibition, who is a whole Fair in himself; T. C. Irving, the popular agent of Bradstreet's; Dr. P. H. Bryce, secretary of the Provincial Board of Health; W. F. McMaster, Geo. Booth, M. Hail, W. S. Lee, J. Dilworth, R. L. Patterson, and W. Bell. After a trip through the main building, accompanied by President Porte, Mayor Taylor, Secretary Browne, and Messrs. Geo. Reid and W. J. Reid, and several leading citizens, the company divided into sections and each accompanied by some of the Western Fair directors visited the different departments of the great Fair. A few of them were entertained at the W. C. T. U. refreshment rooms. The company were again united after 1 o'clock and witnessed the parade of the prize stock in the horse ring. Shortly after 3 o'clock the entire company was lunched at the Tecumseh House by the Western Fair directors. They all expressed themselves as delighted with the great Exhibition.

CHATHAM.

uesday C. Bevans had J. Brady up
ault before D. McNaughton, J.P.,
s fined $2 and costs and bound over
the peace.

GUELPH.

Rev. John Gemley, Simcoe, was one of the visitors.

Sampson took in $700 at his tent on Wednesday.

The exhibit of carts shown by J. H. Moran is the finest ever shown at the Western.

A boy belonging to Lambeth saw the man swallow a sword and fell in a swoon. He was carried to the police headquarters and fresh water soon caused him to revive.

Among visitors who took a deep interest in affairs were Mr. W. R. Callaway, Toronto, district passenger agent of the Canadian Pacific Railway, and Mr. W. J. Grant, Hamilton agent of the Canadian Pacific Railway.

The wonderful mastodon skeleton to be seen at the Western Fair is worth visiting by everybody. The vertebræ column is 23 feet long; weight of tusk, 128 pounds; weight of under jaw, 125 pounds. It was discovered near Highgate and goes from here to a leading European museum. The admission is only 10 cents.

Horticultural Hall.

The exhibit in the horticultural hall is a very fine one in most respects. Although in some classes the number of exhibits is small, the quality is very good indeed. In apples, all the different varieties are shown, and considering the great failure of that fruit this year in Ontario, the exhibit is a very creditable one. Pears are good in quality, but short in quantity as compared with former years. Plums and peaches are shown in small lots and are not up to other years in any respect. Grapes are, however, shown in fine lots, both in quality and quantity.

Some good quinces are shown and melons are there in profusion, while from the energetic way in which the judges examined and sampled them, they must be of splendid quality.

In flowers, the display is a magnificent one, and makes the hall appear to good advantage. There is a good exhibit in the cut flower class; the specimens are of a superior quality and look very pretty indeed. Altogether, the interior of the hall makes a fine appearance, and is the center of attraction to large numbers of visitors.

FROM ONTARIO AGRICULTURAL COLLEGE.

The exhibit of grains from the Ontario Agricultural College farm is claimed to be the largest and most complete that can be produced by any one station on the North American continent. It speaks well for Professor Shaw and his assistants. During the last few years the number of varieties of grains and roots experimented with have been greatly increased, and the results of these experiments are now ready for the information of the Ontario farmers. The exhibit comprises 328 varieties of grains alone, of which 56 are fall wheat, 64 barley, 85 spring wheat, 28 pease, 95 oats, and 66 corn. Nearly all the varieties of grain are shown in the ear, and also samples of the same varieties are shown in round top glass jars, all labeled for the information of visitors. The most of these grains are from imported seeds and of the second year's growth. Professor Shaw and his assistants are now ready to scatter the varieties that have proved a success here throughout Ontario. It might be mentioned that the importation of seeds is not confined to any one country. Grain was imported from Europe, Asia, Africa, New Zealand and Australia. Experimenting with roots and potatoes is also largely carried on at the farm, no less than 125 varieties being tried this year.

THE OTTAWA EXPERIMENTAL FARM.

The Central Experimental Farm, near Ottawa, has a fine exhibit, consisting of samples of grain, roots, fruits and vegetables. The different kinds of grains are shown in the ear as grown in the field, while there are also samples of the same kinds of grain shown in glass jars, all neatly labeled with their proper names. There is some excellent fruit shown by this institution, the grapes being very fine and in great variety. Other kinds of fruit are also shown, of good quality.

FROM NEAR CALGARY.

The exhibit of the products of the country around Calgary is under the supervision of Mr. Dobson, who is most attentive to his duties and obliging in answering questions, for the information of visitors. The exhibit is comprised of the various kinds of grains and grasses, produced in that district. There are good samples of wheat, barley, oats and flax in the ear, and also samples of these grains in bags, for the examination of the farmers and their wives. There is also a sample of the coal found in that region, and it appears to be a very good article.

THE C. P. R. EXHIBIT.

Manitoba and the Northwest Territories have a large exhibit. Samples of the different kinds of grains and grasses grown in the districts around Souris, Deloraine, Brandon, Elkhorn, Neepawa, Glenborough, Carman, Selkirk, Emerson and Rock Lake are shown in large profusion. These grains are shown in the ear, and also in sample packages, in bags and jars. It has been generally supposed that there was no fruit in that country, but the representative, Mr. H. McKellar, explained that the samples of crab apples, pin or sand cherry, blueberry, black currant, raspberry, wild plum, etc., shown are being successfully cultivated in the gardens. There are 25 different varieties of grasses common to the prairie. The wild fruits are found all along the spring creeks. The exhibit is well worthy of a visit. Mr. McKeller says he has been in the country ten years and the prospects he considers are very bright.

Dairy Products.

With present arrangements, lack of refrigerators, etc., the Western Fair on a hot day is a poor place for fancy butter, hence the show in this particular was decidedly slim, only three lots of private dairy butter being shown and a couple of creamery lots. Creamery butter is bound to come to the front in Ontario. As might be expected from the grand cheese dairying country surrounding London this department was well filled up, there being some 80 boxes of white cheese shown and 60 colored. The bulk of it was extra fine in quality. Some 24 boxes unfortunately arrived too late to receive a place in the exhibition. Cheesemaking is now recognized as one of the most substantial and important industries of the country and is likely to so continue.

The Swine Show.

The hog, though regarded by some in the light of a somewhat despised animal, is, nevertheless, a substantial friend of the farmer. Many of the most intelligent men in the Province have devoted themselves for years with great profit almost exclusively to the work of breeding. Of the perfection to which hogs of different breeds may be brought, the display at the Western is a very good example. Breeds, long recognized as of standard merit in the Province, such as the Berkshires, were there along with those whose fortunes have begun to be vigorously pushed in recent years. Sweeping declarations that this or that is the coming hog destined to displace all competitors are wide of the mark. Of course the old-time popular hog that would dress 400 or 500 pounds is not in demand nowadays. In the main a smaller hog (London dealers like one dressing about 140 or 150 pounds) with plenty of lean meat is called for. Markets vary, however. The lumber woods will take heavier and fatter pork than a city trade. South of England may like one class of meat and the north or Scotland another. There is therefore room for considerable variety. It is assuming a good deal to say that one breed is absolutely the best. Besides this the skillful breeder can develop desirable points in his animals, lengthening out the sides, reducing the weight of the head and modifying other parts. The effect of different rations is also held to be very great in the production of fat or lean meat. Berkshires made the strongest display, Chester Whites and Yorkshires, Suffolks and Poland Chinas being also well represented. The first two of the quartet mentioned oppear to be enjoying a streak of special popularity at present. Among the exhibitors were J. G. Snell, Simmons & Quarrie, J. Featherstone, R. Dorsey, H. J. Davis, J. Ackland, H. George & Son, E. D. George & Son, Thos. George, Wm. Goodger & Son, Hill and others. Mr. Jas. Mathers was superintendent of this department.

SPECIALLY MENTIONED

AUTOMATIC FIRE EXTINGUISHER.

In fire above all things prevention is most readily recognized as better than a cure. In the center of the main building the Canadian Fire Protection Company, of Toronto, has on exhibition a most efficient fire extinguisher. This apparatus, known by the name of the American Automatic Fire Extinguisher, has made a remarkable reputation for itself. The principal feature which stamps this extinguisher as superior to all others is that no matter what length of time elapses before it is required for use its strength and extinguishing power remain unimpaired, and the work of extinguishing is accomplished instantaneously. The machine is a model of simplicity, while its durability and non-liability to be set in motion by careless handling commend it to all thoughtful business men. The composition of the fluid is of such a nature that it is perfectly harmless to furniture, carpets or garments. It is the most valuable patent which has been taken out in Canada for several years. A long list of testimonials from several of the leading business houses of the Dominion is shown in which the merits of the extinguisher are set forth, and this, together with the trials made upon the grounds yesterday, should convince the most credulous of its merit. The spectators who saw the test yesterday were more than satisfied. When the match was set the fire ran quickly over the close board fence, which had been specially prepared. When the fence was completely enveloped in flame the faucet of the extinguisher was turned on, and in a few minutes the flames died away as if by magic. The extinguisher has found its way into most of the leading buildings of the large cities of the Province. Mr. R. Prior, who has charge of the exhibit, will be pleased to explain the merits of the extinguisher to all who desire to become acquainted with it.

THE DOHERTY ORGAN.

A perfect organ is the result of years of study and experience on the part of more than a score of skilled workmen, who make use of about twenty different kinds of materials, on which about 40 different operations and manipulations have been carefully performed. It is an assemblage of about 3,000 pieces, each complete in itself, all working together with a mathematical exactitude and a precision as wonderful to contemplate as it is difficult to attain. Such an organ as the Doherty Organ, made with conscientious skill and liberal outlay of time, material and capital—such a standard instrument as the Doherty—friend in many thousand happy homes, a delightful and joy-giving present, and a future of usefulness and blessing. Cheaper organs have come and gone and leave no trace except ill-will; others have come and stayed and proved inferior in money's worth than "The Doherty," built "on honor" and sold at a fair profit. The exhibit of W. Doherty & Co., Clinton, Ont., reflect credit on the industry. Their instruments are unexcelled.

FINE PIANOS.

See the exhibit of Williams pianos in the main building. The offices and salesrooms at 229 Dundas street, London, and 143 Yonge street, Toronto, have always been known to the Canadian public as the proper places to go for musical instruments of all kinds, while the reputation of their pianos is acknowledged by most jealous competitors to be world-wide. It is hardly necessary to refer to their splendid reputation. The numerous prizes they have received during the past quarter of a century wherever they have been placed in competition with the productions of other makers, is a sufficient proof of their excellence. Their manufactory is famed as the most extensive on this continent and is unsurpassed for turning out the highest class of work. The Williams' experience and capital enables them to secure the best talent and machinery as well as the most suitable lumber, which is properly cut and stored for years before being used. Their display at this year's Western Fair is situated in the main building, and, as during former years, is ever the center of the attention of many people. Those who take an interest in their instruments should procure one of their handsomely illustrated catalogues, which contain elaborate descriptions of their various styles of pianos as well as minute details of how they are constructed and pictures of the instruments as they appear in the household. The catalogue contains a large number of testimonials from among the many in their possession. After over 40 years' successful manufacturing (since 1849) and supplying many thousands of customers with pianos and organs, the best testimonial they can show is their record of fine work and fair dealing and the large number of instruments of their manufacture in every part of Canada.

CHOICE SOAPS.

The London Soap Company show at the Western Fair their "World" soap, absolutely pure and equal to any imported soap. 37-n

Do not fail to see the monster twin cakes of Castile, Prairie Flower and Oatmeal soaps in the London Soap Company's exhibit at the Western Fair. 37-n

(Continued on Page 1.)

Pimples, boils and other humors are liable to appear when the blood gets heated. To cure them take Hood's Sarsaparilla.

Conversazione—Monkey dash, L. P. Italic Head.

No one need fear cholera or any summer complaint if they have a bottle of Dr. J. D. Kellogg's Dysentery Cordial ready for use. It corrects all looseness of the bowels promptly and cause a healthy and natural action. This is a medicine adapted for the young and old, rich and poor, and is rapidly becoming the most popular medicine for cholera, dysentery, etc., in the market.

"EL PADRE" CIGARS have no rival. The millions sold annually fully demonstrates their superiority over all others. 94-tf yt

Rheumatism,

BEING due to the presence of uric acid in the blood, is most effectually cured by the use of **Ayer's Sarsaparilla.** Be sure you get Ayer's and no other, and take it till the poisonous acid is thoroughly expelled from the system. We challenge attention to this testimony:—

"About two years ago, after suffering for nearly two years from rheumatic gout, being able to walk only with great discomfort, and having tried various remedies, including mineral waters, without relief, I saw by an advertisement in a Chicago paper that a man had been relieved of this distressing complaint, after long suffering, by taking Ayer's Sarsaparilla. I then decided to make a trial of this medicine, and took it regularly for eight months, and am pleased to state that it has effected a complete cure. I have since had no return of the disease."—Mrs. R. Irving Dodge, 110 West 125th st., New York.

"One year ago I was taken ill with inflammatory rheumatism, being confined to my house six months. I came out of the sickness very much debilitated, with no appetite, and my system disordered in every way. I commenced using Ayer's Sarsaparilla and began to improve at once, gaining in strength and soon recovering my usual health. I cannot say too much in praise of this well-known medicine."—Mrs. L. A. Stark, Nashua, N. H.

Ayer's Sarsaparilla,

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Price $1, six bottles, $5. Worth $5 a bottle.

THOS. BEATTIE & CO.

NOVELTIES

Owing to the large increase in this department we have enlarged it to double its former space. Facts speak for themselves. "ASSISTANCE"

Is all nature needs in nine cases out of ten to remedy sickness. The old idea of bleeding, blistering, purging, ecc., has been superseded by that of assisting nature, that is, seeing to diet and sanitary surroundings and giving medicine to act gently but just as certainly as the old style. In all cases of Stomach Troubles, Indigestion, Dyspepsia, etc.,

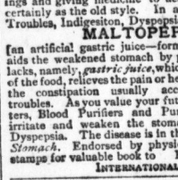
MALTOPEPSYN

[an artificial gastric juice—formula on every bottle] aids the weakened stomach by putting into it what it lacks, namely, *gastric juice*, which assists the digestion of the food, relieves the pain or heavy feeling, and cures the constipation usually accompanying stomach troubles. As you value your future health *avoid* Bitters, Blood Purifiers and Purgatives, which only irritate and weaken the stomach, aggravating the Dyspepsia. The disease is in the *Stomach*, so aid the *Stomach*. Endorsed by physicians. Send 2 cts. in stamps for valuable book to HAZEN MORSE, INTERNATIONAL BRIDGE, ONTARIO.

A Call for Pearline

brings the best washing compound in the world, and the original one—all others are imitations. It costs no more than common soap. It does more than soap's work, and half of your own besides. Anything that needs cleaning can be washed with it—without scouring, rubbing and scrubbing, and with absolute safety. Make its acquaintance; millions of women call it their best friend. Every grocer keeps it, because he has constant calls for it.

Beware of imitations. 184 JAMES PYLE, N.Y.



AVOID GIVING OPIUM to children if you wish for their future welfare. *Morse's Glycerole of Celery Compound*, Exact formula on every label, is a safe remedy for teething infants and nervous adults. Endorsed by physicians. Send two cent stamp for descriptive circular to *Hazen Morse, Buffalo, N. Y.*

"EL PADRE" PINS.
Remarkably fine. Try them.

CARTER'S LITTLE LIVER PILLS.

CURE
Sick Headache and relieve all the troubles incident to a bilious state of the system, such as Dizziness, Nausea, Drowsiness, Distress after eating, Pain in the Side, &c. While their remarkable success has been shown in curing

SICK
Headache, yet Carter's Little Liver Pills are equally valuable in Constipation, curing and preventing this annoying complaint, while they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if only once cured

HEAD
Ache they would be almost priceless to those who suffer from this distressing complaint; but fortunately their goodness does not end here, and those who once try them will find these little pills invaluable in so many ways that they will not be willing to do without them. But after all sick

ACHE
is the bane of so many lives that here we make our great boast. Our pills cure it while others do not.

Carter's Little Liver Pills are very small and very easy to take. One or two pills make a dose. They are strictly vegetable and do not gripe or purge, but by their gentle action please all who use them. In vials at 25 cents; five for $1. Sold by druggists everywhere, or sent by mail.

CARTER MEDICINE CO., New York.

Small Pill. Small Dose. Small Price.
