PREFACE

Working Papers, the result of research work in progress or the summary of a conference, are often intended for later publication by the Institute or another publisher, and are regarded by the Institute to be of immediate value for distribution in limited numbers — mostly to specialists in the field. Unlike other Institute publications, Working Papers are published in their original language only.

The opinions contained in this paper are those of the author and do not necessarily represent the views of the Institute and its Board of Directors.

Dr. George Lindsey is a visiting senior research fellow at CIIPS and was formerly the Director of the Department of National Defence Operational Research and Analysis Establishment (ORAE).

Acknowledgements

The author would like to acknowledge the helpful comments on earlier drafts of this study by Fen Hampson, Ronald Purver, and others interested in the subject. He is grateful for the support of the Canadian Institute for International Peace and Security, and deeply regrets its deplorable termination.
