DEMAND FOR TIMBER BREAKS ALL RECORDS

Never in the History of the Province Have Speculators Been so Keen

Never in the history of British Columbia has there been such a demand for timber land as at present, island property being especially in favor. Every day sales of leases and crown grants of more or less magnitude, are being put through in Victoria. While these sales are taking place, new offerings are constantly being put in the market, as a result of the cruising of new districts. Several parties are out in various parts of the island and when they have completed their work it will mean a further addition to the lands from which intending purchasers may select what they want.

The principal demand is, of course for fir, but there is also a ready market for cedar, spruce and hemlock tracts. No kind of marketable timber is allowed to go a begging, and the result is a stiffening in prices all around.

"There is an active demand for all kinds of timber land, "said Arthur Bell, real estate and timber agent, to a reporter for the Colonist yesterday," and what strikes me particularly about the inquiries is the fact that most of them are from south of the line. As is well known, American investors already hold large tracts of timber land all over the province, but particularly on Vancouver island. Many of those who already are here. Some are buying up timber tracts with the idea of working them, but many are purchasing simply for the purpose of investment, believing that a few years will bring a large increase in value.

"There are several reasons for this action on the part of Americans, but the chief one is that they see the forests in their own country rapidly disappearing and realize that it is only a question of time until the demand for lumber will place a premium on British Columbia timber lands."

London, May 7,—It is understood that the British government has decided to make a grant of $750,000 gratis to Jamaica and to guarantee the island a loan of $5,000,000 to assist in its rehabilitation.
