SHE PATIENTLY BORE DISGRACE

A Sad letter from a lady whose Husband was Dissipated.

How She Cured Him with a Secret Remedy.

"I had for years patiently borne the disgrace, suffering, misery and privations due to my husband's drinking habits. Hearing of your marvelous remedy for the cure of drunkenness, which I could give my husband secretly, I decided to try it. I procured a package and mixed it in his food and coffee, and, as the remedy was odorless and tasteless, he did not know what it was that so quickly relieved his craving for liquor. He soon began to pick up flesh, his appetite for solid food returned, he stuck to his work regularly, and we now have a happy home. After he was completely cured I told him what I had done, when he acknowledged that it had been his saving, as he had not the resolution to break off of his own accord. I heartily advise all women afflicted as I was to give your remedy a trial."

FREE SAMPLE and pamphlet giving full particulars, testimonials and price, sent in plain sealed envelope. Correspondence sacredly confidential. Inclose stamp for reply. Address **The Samaria Remedy Co.** 23 Jordan street, Toronto, Canada.

Also for sale at Strong's Drug Store, 184 Dundas street.

Cruelty to Children.

New York, March 7.—The State Board of Charities will investigate the charges that attendants in the Susquehanna Valley Home at Binghampton have cruelly treated children committed to that institution. The charges are that the children have been beaten with a horsewhip and subjected to other forms of cruel punishment. The trustees of the institution have completed an investigation, and their report will be received by the board of charities in a few days. The board will refer it to a committee which will conduct an investigation.

FROM NEW ONTARIO

Comes the Story of W. J. Dixon—Rheumatism Completely Cured Dodd's Didney Pills.

Barwick, P. O., Rainy River, March 2.—(Special).—Great interest is taken by the settlers in this neighborhood in the case of William John Dixon. He was a familiar figure limping around with a stick, and his Rheumatism was apparently there to stay. Dodd's Kidney Pills fixed him up. He says: "Rheumatism attacked me as an after-effect of typhoid fever. I had pains in my back and right hip so bad I had to use a stick to walk. I could no more than dress myself for three or four months. I could not lace my right boot or put my right leg on my left knee.

"My brother advised me to try Dodd's Kidney Pills, and I did. Three boxes enabled me to walk without pain, and six boxes cured me completely."

Opening of Navigation.

Sault Ste. Marie, March 7.—Nine out of ten old marine men predict that the opening of Lake Superior navigation this year will be but a few days later than last, which was unusually early. The ice is not so thick as usual at this time of year, and a few days of sunshine will work havoc with its solidity.

Two sections of the City of York, England, have a public house to every 30 males over 17 years of age.

NEW ONTARIO RAILROAD

Will Greatly Shorten the Distance Between Toronto and Ottawa.

Toronto, March 7.—Plans for the 34-mile section of the Toronto, Lindsay and Pembroke Railway, which passes through the townships of Raglan, Radcliffe, Brudenell, Hagarty and South Algoma, in Renfrew County, have been received by the department of public works for inspection. This portion of the line passes through part of the corundum section of Ontario. If this is constructed there will remain a gap of only some sixteen miles in this line, the completion of which would materially shorten the route from Toronto to Ottawa.

FOOD SUPPLY QUESTION

The London Times Makes Some Significant Remarks.

London, March 7.—In an editorial on the deputation to Premier Balfour in regard to Great Britain's food supply in time of war, the Times says that so far as grain is concerned, whatever controversy may exist as to the possibility of treating it as contraband of war, it is unlikely, as Mr. Balfour pointed out, that the United States would tolerate for an instant that its grain in its own ships should be captured and sold in some foreign prize court. The Times adds: "At the same time the question must be considered whether if our carrying trade were temporarily paralyzed by war, the mercantile marine of other nations, which we have outdistanced in this field of enterprise, would be sufficient to bring all we want. The addition to the cost of the necessities of life, combined with the deficiency in employment such as occurred in consequence of the cotton famine during the war of secession, would create a very painful situation."

Lord Strathcona, the Canadian High Commissioner, was one of the deputation which waited upon Mr. Balfour on the question of food supply in time of war.

DARLINGS OF OLD MEN

Interesting Statistics on April and December Marriages.

For the Wellesley graduate, aged 22, who has married the octogenarian Marquis of Donegall there is the excuse, admittedly valid by even captious members of her sex, that she married a title. For the elderly bridegroom, apart from sentimental considerations, there is the incentive of longevity. The statistics prove that old men live longer if married than if single.

Dr. Zilz's figures for Europe indicated that among men past 70 the death rate is 45 per 1,000 for the married, as against 71 for the single. Dr. Schwartz instancing the fact that of 50 centenarians examined by him not one was a bachelor or spinster, showed that of men who live to be 90 the ratio is nine married to three single. Among individual examples of matrimonial longevity that of James Nicholas Lann Goshen, N. Y., may be cited. The doctor-preacher-author married thirteen wives and lived to be 99. To what extent did each of his helpmeets contribute to his length of years? Presumably an amiable wife would add a year where a Xantippe might cut off one.

It is a normal act for a man to marry a woman younger than himself. Statistics collected in Germany show that of 1,000 bridegrooms only 89 chose women older than themselves. A difference of 60 years is, of course, wholly abnormal. In New York City in one year the number of couples married in whose ages there was a disparity of 20 years or more was 818; but among these there were few in whom the difference exceeded 40 years.

Doubtless the controlling impulse with women who marry men greatly older than themselves is money; an examination of some sixteen cases reported in the World indicates as much. Yet there have been important sentimental exceptions. Sentiment was the motive that led Ida Kriebel, 16, of Allentown, Pa., to marry Jacob Dorsey, 60, though by so doing she became her own grandmother. Agnes May, 20, who married William Cheney, 70, of Bowling Green, O., was the grandchild of his first love, and for that reason romantically inspired toward him. Nellie White, 22, who became the wife of Zerah Pomeroy, 89, of Meridon, Conn., was a grandchild of his first sweetheart's sister. The way of the man with the maid in these cases was an appeal to the romance in her nature.—New York World.

GALT FREE OF SMALLPOX

There Were 86 Cases and 6 Deaths—Quarantine Is Removed.

Toronto, March 7.—Reports received by Dr. Bryce, secretary Ontario board of health, indicate that Galt has finally emerged from its baptism of smallpox. The epidemic resulted in 86 cases, with 6 deaths, but it is entirely cleaned up now, and the last quarantine has been removed.

CELEBRATE WITH DANCE

McClary Baseball Club Will Hold Annual Hop.

Workmen are working day and night to complete the new building of the McClary Company on King street, that is, that portion which is to be used this year for the annual hop of the McClary Baseball Club. The hop this year, it is expected, will outdo all previous efforts, and the company are sparing no pains to render every assistance.

The ball is to take place next Tuesday evening, with the grand march at 8 o'clock sharp, and for this purpose the company have put at the disposal of the employes the large new flat, that is to be used for the manufacture of pieced tinware. This flat is replacing part of the building that was burned in the fire, and the floor is therefore new. Hard maple is the material that has been used, and this is, of course, admirably adapted for dancing upon, and being three inches thick it will be perfect in every way.

Two special staircases have been constructed by the company, so that the guests will be able to enter from King street, and at present the workmen are engaged in completing the room in whatever way it is needed. For instance, a gaspipe has been put all around the room, where temporary lights will be placed at various intervals, while a ladies' cloak-room has been arranged, where the company will have two lady assistants to see to the comforts of the lady guests. The decorations will be on a larger scale, the bunting that was used at the time of the Duke of York's visit being still available, and this will be utilized. A stand will be erected in the center of the room for the orchestra, which will be of five pieces. The room in which the dancing will take place is 200 feet long and 60 feet in width.

When the flat which this new room replaces was opened some years ago, the occasion was also celebrated by a dance, and at that affair there were about a thousand people present, as many of the citizens will remember. Besides the dance being the annual hop of the baseball club, it also marks a special event in the history of the company, the opening of a new portion of their immense plant. The prospects are that on Tuesday night there will be a crowd there larger than has attended any similar function for some time.

The officers of the club are: Mr. J. H. Herrick, president; Mr. James Pirie, manager; Mr. George Baxter, secretary, and the following is the committee assisting in the arrangement of the hop: Messrs. Rose, Jackson, Eccleston, Wilson, Delaney, Steel, Samwells, Logan, Layman and Peacock.

BURNED IN FURNACE

Horrible Accident in a New Jersey Steel Foundry.

Washington, N. J., March 7. — Two men were burned to death at Oxford furnace yesterday. The Empire steel and iron works recently erected a large air compressor plant, by which the mines are supplied with fresh air. At one of the buildings is a large coal bin, recently erected and filled for the first time. The weight of the coal caused one end of the wall to fall into the boiler room, breaking the steam-pipes. The fireman was caught in the ruins and his body was burned to a crisp. A Hungarian laborer was also killed.

Striking resemblance has been pointed out between the remarkable ancient ruins at Zimbabwe, in Rhodesia, and antiquities in Cornwall.

STALLED FOR 100 HOURS

Railway Passengers Suffer From Cold and Hunger in New Mexico.

El Paso, Tex., March 7.—Three passenger trains of the Rock Island system, which arrived here Thursday night, were tied up in the snow nearly 100 hours on the plains 30 miles from Santa Rosa, N. M., and 500 persons on board suffered intensely for want of food for 24 hours before the snowplow and relief train arrived.

The locomotives were imbedded in drifts 15 feet deep. The fires of one locomotive were extinguished and the cars of that train were without heat or light. The passengers of the others were not subjected to that discomfort, but the food supply of all became short a day before the snowbound people were rescued.

The trains were two Golden State Limiteds and one local. They were snowed in on Sunday and arrived here late last night.

BIG PAPER-MAKING MILL

The Harmsworths of London May Build Near St. John, N. B.

St. John, N. B., March 7.—A representative of the Messrs. Harmsworth, of London, proprietors of several British newspapers, have arranged to appear before the New Brunswick officials either on Friday or on next Wednesday to talk over proposed concessions relative to the establishment of a big paper-making factory in Gloucester County.

If satisfactory agreements can be reached it is said that the English firm will expend about $2,500,000 in building the plant on Nepisiquit River, near Grand Falls. An engineer is now testing the water power at that place.

When Harold Harmsworth and several others were here last fall they inspected several sites for water plants in this province. That at Grand Falls suited them the best.

The product of the industry will be solely newspaper stock and will be shipped to England.

POKER FOR CHARITY

Unique Weekly Game That Is Played by Five Sports.

Philadelphia, March 7.—There are five men of wealth and prominence closely identified with a certain uptown church who go once a week to play poker. All are men well along in years, and all have renounced the follies of youth, yet they have never lost their love for the great American game of draw. They realize that it would be incompatible with their position as pillars of the church to gamble, and yet they play a 25-cent-limit game for real money. There is just this difference: The winners turn over to the treasurer all the money they have won from the losers, and every six months this fund is expended on some deserving charity. In that way, while the player who is ahead of the game doesn't really profit, yet he isn't losing anything, and the loser has the satisfaction of knowing that his money is going to a good cause. The element of chance is not eliminated; each man plays his best, there are four hours of excitement, and the players do not feel that they are beating the devil about the bush.

MARTINEAU TOOK $75,000

Shortage in Militia Department Will Approach That Sum.

Ottawa, March 7.—A. Banderus Martineau, the Militia Department defaulter, was again remanded for a week yesterday morning at the request of his counsel, owing to several new charges of forgery being laid. Six new charges were brought before the court this morning by Inspector Hogan, dealing with three checks, on each of which were based charges of forgery and uttering a forged document. The checks were: One for $13,500, dated Oct. 13, 1902, payable to A. Martineau; one for $6,700, dated July 7, 1902, ptyable to Charles D. Cote, and one for $4,355, dated April 26, 1902, payable to Charles D. Cote. The charges previously before the court were of forging and uttering a check for $9,300, dated July 7, 1902, payable to Charles D. Cote. The charge of breach of trust by a public officer has not yet been presented to the magistrate, although it was one of the earliest prepared. Crown Attorney Ritchie gave to the press a memo. of the alleged forgery of Martineau, by which it appears that it amounted to $75,705. Checks for $20,000 were passed through the Quebec Bank, for $30,200 through the Sovereign Bank, and for $25,500 through the Royal Bank. All of these, except those passed through the Royal Bank, were payable to Charles D. Cote, while the Royal Bank checks were payable to A. Martineau.

Car Etiquette in Cincinnati.

We are told that in Cincinnati the street car straps are hung so high that women of average inches cannot reach them. This obliges them—the women, of course—to hang on to the seats or the men passengers. Of course, the seats can't object, but the Cincinnati men are very indignant over such a flagrant disregard of their dignity. They don't like to be grabbed by the hair, or yanked around by the collar. In fact, some of them are disposed to be so much disgruntled by it that at times they have thought of getting up and resigning their seats to the impertinent women. But they haven't done it yet. —Cleveland Plain Dealer.

Artificial Lightning.

Prof. Trowbridge, of Harvard University, says that with his battery of 20,000 cells, a voltage of about 6,000,000 is obtained, which is at least comparable with that of lightning. With this large battery he is able to get an electric spark about seven feet long. In his experiments he found that a spark of this length, instead of striking water, invariably jumped to some adjacent object. A spark a few inches in length will, however, strike water, but such a spark is not to be compared to lightning. Beyond 1,000,000 volts the initial resistance of atmospheric air to electrical discharges becomes less, and the discharges, therefore, are shunted through the air instead of upon the water. Prof. Trowbridge thinks it doubtful, if the testimony of those who claim to have seen lightning strike the sea is to be accepted; they have mistaken the reflection of lightning in the water for the flash itself.—New Sork Sun.

Spotting Bad Ones.

As a result of the introduction of the Bertillon system by the Zurich police the town has practically cleared out all its bad characters. Even tramps give the place a wide berth, for as soon as a person is arrested, he is photographed and his measurements taken, even if the charge is not serious. Of late the police have so little to do that there is talk of reducing the number of the force. So few crimes are committed in the town that Zurich is considered to be the most moral town in Switzerland.

WOMEN OF THE UNITED STATES

Regard Pe-ru-na as Their Shield Against Catarrh, Coughs, Colds, Grip and Catarrhal Diseases.

Miss Lenore Allen, 407 Dowell street, San Francisco, Cal., writes:

"I consider Peruna an infallible remedy for catarrhal diseases. For several years I have been troubled with influenza, especially during our rainy season. I used to catch cold so easily that I was afraid to be out when the weather was the least bit inclement, or in the evening air. But since I have used Peruna I have nothing whavever the matter with me. I am in perfect health, and find that Peruna acts as a tonic, and seems to throw all sickness and disease out of the body. I go anywhere now and in all kinds of weather, seem to have an iron constitution and enjoy life because I enjoy perfect health."---Lenore Allen.

Enthusiastic Letters from Grateful Women Who Regard Peru-na as Their Safeguard.

Miss May Stevenson, 110 Hamilton avenue, Brooklyn, N. Y., writes:

"One half the world little knows what the other half suffers. Little have my friends known of the humiliation and worry I suffered for years on account of catarrh of the head and throat.

"I used inhalers, snuffs and catarrh remedies until I hated the sight of medicines and grew discouraged. Last fall one of my friends said, 'Why don't you use Peruna? It cured me and it will cure you.' I decided to try it almost as a last resort, and it was lucky that I did, for in less than three weeks I was entirely well. Accept a happy and grateful girl's thanks."---May Stevenson.

Pe-ru-na Protects Against Colds.

Miss Flora Wilson, 2472 Seventh avenue, New York city, writes:

"For anyone who is as susceptible to coughs and colds as I am, Peruna is a blessing. I am never too careful, and am always catching cold, which sometimes develops into an annoying catarrh of the head. Peruna I have found is excellent for this, being very quick in its action, besides being a most excellent tonic."—Miss Flora Wilson.

Pe-ru-na Cured a Bad Cold in Three Days.

Miss Helen Sauerbier, St. Joseph, Mich., writes:

"Last winter I caught a sudden cold which developed into an unpleasant catarrh of the head and throat, depriving me of my appetite and usual good spirits. A friend who had been cured by Peruna advised me to try it and I sent for a bottle at once, and I am glad to say that in three days the phlegm had loosened, and I felt better, my appetite returned, and within nine days I was in my usual health."—Miss Helen Sauerbier.

Mrs. Leslie Carter Says: "Pe-ru-na is Sure to Prevent a Cold

Mrs. Leslie Carter, probably the most prominent actress in America, says the following of Peruna:

Mrs. Leslie Carter.

"Peruna is sure to prevent a cold. It will stop a cough before it becomes settled. It cures all catarrhal affections like magic. No money could tempt me to be without this remedy for even a day. It is just the remedy all women need, especially such women that are exposed to the vicissitudes of climate as I am.

"I never neglect an opportunity to recommend this remedy to my friends. It is America's greatest remedy for America's greatest enemy, catarrh and catarrhal affections. I would not have catarrh for a million dollars, and as long as I have Peruna at hand to check the slightest symptoms of its approach, I feel perfectly safe from this disease."—N. Leslie Carter.

Anyone who wishes perfect health must be entirely free from catarrh. Catarrh is well-nigh universal; almost omnipresent. Peruna is the only absolute safeguard known. A cold is the beginning of catarrh. To prevent colds, to cure colds is to cheat catarrh out of its victims. Peruna not only cures catarrh, but prevents it. Every household should be supplied with this great remedy for coughs, colds and catarrhal diseases.

A Woman of National Fame Use Pe-ru-na In Her Family.

Mrs. Belva Lockwood, the eminent barrister of Washington, D. C., is the only woman who has ever been a candidate for the Presidency of the United States. She is the best known woman in America. As the pioneer of her sex in the legal profession she has gathered fame and fortune. In a letter to the Peruna Medicine Company she says:

"I have used your Peruna both for myself and my mother, Mrs. Hannah J. Bennett, now in her 88th year, and I find it an invaluable remedy for cold, catarrh, hay fever and kindred diseases; also a good tonic for feeble and old people, or those run down, and with nerves unstrung."---Belva A Lockwood.

A cold is the beginning of catarrh. It may cause catarrh of any of the internal organs—the head, throat, lungs and stomach, especially. A remedy that will cure a cold, then, would cure all these direct effects of colds. Peruna is such a remedy. We have letters from all over the United States attesting to this fact. The poor and rich alike use and recommend it. A book of testimonials in the exact words of the writer sent to any address free of charge by The Peruna Medicine Co., Columbus, Ohio.

Colds are considered one of the necessary ills of life. One is liable to catch cold both summer and winter. Very often a cold is the starting point or cause of a lengthy and dangerous catarrhal disease. Colds are always dangerous and should never be neglected a day.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

The Passenger Pigeon.

Mr. L. H. Smith, Strathroy, writes: "I was pleased to read in the editorial columns of the Globe, some very pertinent remarks on the passenger pigeon, and hope that it will be the means of reports being made by farmers, lumbermen and others who may be so fortunate as to find the nests or see any of those now almost extinct beautiful birds. I am a bird student, but have not had the pleasure of seeing a passenger pigeon for many years. The cause of the almost total extinction of these birds, which in my time swarmed here in countless millions, is a puzzle to naturalists. My own theory is they were slowly starved. The natural food of the passenger pigeon was beechnuts, acorns, wild fruits of many kinds, and mast, of which there was an endless supply in the thousands of miles of forests which were never touched by the axe till the white man came. Settlement commenced at the Atlantic seaboard, and it took many, many years, but the time came when this immense Atlantic-slope forest of deciduous trees was all destroyed, and the passenger pigeon's fate was sealed.

"My bird record, which I have kept since 1869, shows that the passenger pigeon began to dwindle in numbers in this part of Ontario in the sixties, and the last I saw here was in 1882. Perhaps the cause of the extinction of this beautiful bird will never be positively and satisfactorily settled, but I think my theory is a possible and a very reasonable one."—Toronto Globe.

IT IS AN OFFICER OF THE LAW OF HEALTH.—When called in to attend a disturbance it searches out the hiding-place of pain, and, like a guardian of the peace, lays hands upon it and says, "I arrest you." Resistance is useless, as the law of health imposes a sentence of perpetual banishment on pain, and Dr. Thomas' Eclectric Oil was originated to enforce that sentence.

Church Growth in England.

The statistics of the Evangelical Free Churches of England, as compiled by Mr. Howard Evans, show an increase of 37,000 members over those of last year. Sunday school teachers have increased 5,000, and Sunday school scholars 45,000. The membership of the Free Churches, taken together, is 1,982,801, which estimates given by the local clergy of the Established Church give it a membership of 2,004,293, only 21,692 more than that of the Free Churches. The Established Church has 2,851,656 Sunday school scholars, while the Free Churches have 3,321,539. So there are 469,880 more scholars in the Sunday schools of the Free Churches than there are in those of the Church of England. The membership of the Free Churches, taken separately, is as follows:

Wesleyans	573,876
Primitive Methodists	190,149
Calvinistic Methodists	162,865
United Methodist Free Churches	83,590
Methodist New Connexion	30,355
Bible Christians	20,145
Baptists	357,066
Congregationalists	414,218
Presbyterians	78,024
Society of Friends	17,115
Seven smaller bodies	37,398
Total	1,982,801

A Dangerous Flower.

At a meeting of the Gardeners' Society of Berlin, held recently, a solemn warning was read by a member against the Primula obconica, a pale lilac variety of the popular winter flower. It seems that this particular variety, which is very prolific in bloom, has tiny hairs underneath the leaves, and when these hairs come in contact with the human skin they cause inflammation. A member said that his daughter had suffered for three years from this inflammation, which also affected her hair so much that she became bald. The only alleviation known for the inflammation is a decoction of creotin.

A Guaranteed Cure for Piles.

Itching, Blind, Bleeding and Protruding Piles. No cure, no pay. All druggists are authorized by the manufacturers of Paxo Ointment to refund the money where it fails to cure any case of piles, no matter of how long standing. Cures ordinary cases in six days; the worst cases in fourteen days. One application gives ease and rest. Relieves itching instantly. This is a new discovery and it is the only pile remedy sold on a positive guarantee, no cure, no pay. Price 50c. If your druggist hasn't it in stock send 50 cents in stamps to the Paris Medicine Co., St. Louis, Mo., who also manufacture Laxative Bromo-Quinine, the celebrated Cold cure.

Vienna is threatened with a strike of chimney sweeps.

THE HEALTHY GLOW disappearing from the cheek and moaning and restlessness at night, are sure symptoms of worms in children. Do not fail to get a bottle of Mother Graves' Worm Exterminator; it is an effectual medicine.

Dick Turpin's pistol was sold in London recently for $26.

A Sure Cure for Constipation.

Some remedies cure this distressing complaint in a day, some in a month, but Nerviline never fails to cure in a few minutes. Just ten drops of Nerviline in sweetened water—that's enough, and away goes the dysentery, cures to stay cured. Nerviline also cures cramps, colic, pain in the stomach and sick headache. It has five times the strength and curative properties of ordinary remedies, and should be in every household. Better buy a 25c bottle and try it. Nerviline is all right.

Thirty tons of cauliflowers from Italy are now being landed daily at Folkestone for the London market.

MINARD'S LINIMENT CURES BURNS, ETC.

Let Me Convince You

You who are sick and discouraged—
You who are doctoring without result—
Be fair with yourselves—ask me for the facts—
Learn how half a million others got well.

What Proof Do You Want?

I have 65,000 letters from cured ones, and will send you all you care to read.

I have a circular giving the names and addresses of one thousand people in one city, whom my Restorative has cured in just the past six months. Do you want it?

I have actual records of over half a million chronic cases which I have cured in the past 12 years. Almost every neighborhood in America has its living witnesses to what my Restorative will do. Just ask for evidence and I can overwhelm you with it, for the evidence is everywhere.

My Restorative has made these cures by strengthening the inside nerves. It will do that with you. It will bring back the nerve power which alone operates the vital organs. It will give the weak organ power to do its duty.

It does that invariably, and the results are permanent. I speak from a lifetime's experience with diseases that no common treatment cures. It will make you well all over.

A Month on Trial.

Simply send me this coupon or write me a postal card, stating which book you need. I will then mail you an order on your druggist for six bottles Dr. Shoop's Restorative. You may take it a month at my risk. If it succeeds the cost is $5 50. If it fails I will pay the druggist myself. And your mere word shall decide it.

That offer itself is the best evidence of merit that a remedy ever had. Those who accept it are those who doubt that their cases are reachable. Yet you must know that I cure them, else the offer would ruin me.

Now if you are not well, you need that help. A postal will secure it. All the proofs you want are waiting. Won't you write today?

Cut Out This Coupon.

For we all resolve to send for something, but forget. Mark the book desired and mail this with your name and address to

Dr. Shoop, Box 41, Racine, Wis.

Book 1 on Dyspepsia.
Book 2 on the Heart.
Book 3 on the Kidneys.
Book 4 for Women.
Book 5 for Men (sealed).
Book 6 on Rheumatism.

Mild cases, not chronic, are often cured by one or two bottles. At all druggists.

Dr. Shoop's Restorative on Trial.
