The sheet was started a few years ago by several colored men, who were practical printers, working during the week in another office, and in spare time writing and setting up their own articles. BY four months' use of Charles Cluthe's Latest Spiral Truss. Patented in U. S. and Canada. POINTS OF EXCELLENCE: 1st, Weighs only one ounce. 2d, Perfect ventilation, air circulates freely under pad. 3d, Constant pressure. It is made of best brass, therefore rusting is impossible. The pad when pressed (as above shown) has a clamping pressure, the same as by placing the hand upon the leg, extending the thumb and drawing together. This truss is the result of a life's study and 18 years' material experience. Twenty-four thousand adjusted in the last seven years by the inventor. Recommended by leading physicians. I defy the rupture I cannot hold with ease. Spinal instruments, most improved. A new apparatus for straightening Crooked Feet, without cutting or pain.
