AN UNFORTUNATE FALL :—Capt. Ephriam Steele, of the steamer St. Nicholas, went up stairs in one of Mrs Snowball's warehouses on his wharf last Saturday evening to get a coil of rope. He did not take a lantern with him, being familiar with the premises, and in passing along the floor fell through a hatchway, which for the moment had escaped his mind. One of the steamboat hands who had accompanied him was awaiting his return at the warehouse door, when the storekeeper, Mr. Boysen, came along and enquired as to where Capt. Steele was, and being informed that he had not returned from getting the line, went in and discovered the captain moaning where he had fallen. A light being procured it was found that he was in a pretty bad condition. Medical aid was soon procured and he was carried to the store on Water street, where a very large crowd gathered, for Mr. Steele being well and favorably known, has many friends. He was, after receiving treatment from the doctors, taken to his home, where he is now improving, though suffering considerably from the effects of the mishap.

One Lunatic Kills Another.

A Bridgetown, N. S. despatch of 9th inst. says :—"A terrible tragedy was enacted last night in the Annapolis County Insane asylum in Bridgetown. An inmate of the asylum named Jacob Bain was murdered in his bed by a maniac named Walter Beveridge.

"When the keeper this morning entered the sleeping apartment occupied by both men Beveridge apprised him of the fact that there was a dead man in the room, and upon examination Jacob Bain was found lying in his bed dead with his skull fractured, the result of a couple of blows dealt him by Beveridge with a slat taken from the bedstead. When questioned upon the subject Beveridge admitted that he had committed the deed, saying that Bain was about to kill a person named Melissa, and he was obliged to kill Bain to prevent him doing so.

"Neither of the men have been inmates of the asylum over a year. They were both considered perfectly harmless and were allowed to occupy the same room. They both belong to Yarmouth county and are aged between forty and fifty years."

High-handed Smuggling.

MONCTON, July 8.—Two important seizures were made in Albert county yesterday by Collector of Customs Binney of Moncton. The department having received advice that an iron clipper from Greenock, Scotland, had sold a large quantity of stores to different parties in Alma parish, the collector visited the scene. When he arrived there he found that the ship had sailed, but that a quantity of sugar, molasses and peas had been loaded from this British vessel which had laid in stream and was taken ashore in Albert by the schooner Silena. The latter was seized and her owners paid promptly over a fine of four hundred dollars.

At Herring Cove, a few miles further on, a subordinate official found a quantity of sugar and molasses which had been brought ashore in a large boat by Stevedore McKinley and taken to his camp. Having made the seizure the officer went away for a cart and when he returned the barrels of sugar and molasses had disappeared. This of course added a criminal offence to the customs violation. Collector Binney then ordered seizure of the boat, upon which a $50 fine was demanded. Those who took away the seized goods are known, and their arrest will probably follow special instructions by the department.

The Greenock vessel lay between two customs jurisdictions, and a double fine of $800 will be imposed. The owners in Scotland are being notified, as the vessel has sailed.

Heart Burn.

DR. AGNEW'S CURE FOR THE HEART DEFIES THE MOST INTENSE PAINS—NO MATTER HOW LONG STANDING THE TROUBLE, IT MASTERS DISEASE IN HALF AN HOUR, AND IN THE CASE OF JOHN CROW FIVE BOTTLES CURED HEART DISEASE OF TEN YEARS' STANDING—HERE'S HIS TESTIMONY UNSOLICITED :—

John Crow, son of Mr. George Crow, farmer, near the village of Tara, Ont., writes : "I was alarmingly afflicted with palpitation and enlargement of the heart for nearly ten years. I doctored with best physicians and tried numerous remedies with very little benefit. In our local papers I noticed Dr. Agnew's Cure for the Heart advertised, and I determined to give it a trial. Inside of half an hour I had relief. I have taken about five bottles, and feel today that I am as well as ever I was. I am completely cured." Sold by J. D. B. F. Mackenzie.

A Slander.

The vindictiveness of the editor of the World against his former employer of the St. John Telegraph, because that gentleman discovered his true character and treated him accordingly, took a very petty turn last Saturday in a World editorial, which dealing in a pretentious way with the subject of poetry said:—

"We once knew an able St. John editor, who had been a clergyman, to reject Burns' 'Man was made to Mourn,' when it was offered to him as an original contribution, not because he recognized it as having been previously published, but because he did not think it possessed merit enough to have a place in his paper. And he was a scholar and an orator, and a Scotchman likewise. He was everything except poetical, and the two distinguished Doctors who judged the competitors for the Globe's prize are like unto him."

The foregoing alleged incident, is, of course, without any foundation of fact. The late Hon. William Elder is the editor slandered. Being dead, he cannot resent the imputation of ignorance of one of Burns' best known poems, or correct the singular blunder of his traducer in the matter of his nationality, for Mr. Elder was an Irishman, and graduate of Trinity College, Dublin. He was, as his friends well know, always proud of both the land of his birth and his alma mater. Why is it that people of the World writer's class will pretend to knowledge of matters of which they are entirely ignorant?

A Lame Back.

ONE OF THE MOST PAINFUL OF MALADIES.

MR. PETER MILLAR SUFFERED FOR YEARS, AND EXPERIMENTED WITH MANY MEDICINES BEFORE FINDING A CURE.

From the Brockville Recorder.

Perhaps no prettier place is to be seen in Ontario than that at Newman's upper lock on the Rideau Canal. At this station for a quarter of a century resided Mr. Peter Millar, who during that period acted in the capacity of lockman, and was perhaps the best known man on the canal. Mr. Millar is now a resident of Merrickville, having retired from active life. To a correspondent of the Recorder he related the following experience : "For many years I was troubled with a lame back, which gave me great pain at times, and caused me much loss of sleep. I tried different kinds of medicine but found little or no relief. The spring of 1895 I was assisting at getting out ice one day when I felt something snap or give way in my back, and it was some time before I could straighten myself up. I now became so bad that when I laid down I was unable to rise without assistance, and I fully made up my mind that I had become a chronic invalid, and never expected to see a well day again. A couple of weeks after my back had almost entirely given out, I saw by an article in a paper that Dr. Williams' Pink Pills had cured a person troubled similarly, and I immediately sent and procured a box to test them. Before I had finished the box I found my back somewhat stronger so I procured five boxes more and by the time they were used I found myself completely cured. Since I took the last box I have not had a pain or particle of lameness, and my health has been far better than it had been for years before.

To ensure obtaining the genuine always ask for Dr. Williams' Pink Pills, as there there are many pink colored imitations.

Glenelg parish by Bessie McNaughton; Blissfield by Mr. Sutherland. The Convention then took up the next work on the programme,—"Our needs in the Parish," presented by Miss Bessie McNaughton and Mr. M. A. Kelly. This was followed by a very interesting discussion entered into by Messrs. McLoon, Lucas, Sutherland, Miss Lucas and Mr. Clark. The following were then appointed :

Nominating Committee :—Miss Shirreff, Miss McNaughton, Mr. McLoon, Mr. Sutherland.

Credential Committee :—Miss Anna McLeod, Mrs. B. Rae.

Finance and Audit :—D, P. McLachlan, Mr. McLoon.

Questions were left to Mr. Lucas.

The meeting then closed with prayer led by Mr. Lucas.

EVENING SESSION.

Convention opened with devotional exercises led by Mr. Lucas. Minutes of last session were read and approved. The President, Mr. Clark, then addressed the Convention, speaking very encouragingly of the work in the county during the past year.

The next work on the programme: "Principles of Primary Work" was taken up by Miss Lucas. She brought out seven principles of primary work, making a very interesting address, which was listened to with deep interest. The Teacher's aim is to uplift the child.

1st principle : Know the child. We must not expect too much of the child; the teacher must develop the child—first on the home life, then in the class. How done? By studying works of others who have studied children.

2nd principle : The teacher must realise the importance of the early years of the child's life. It is harder to teach children than some think. We must plant the seed when the child is young and help it grow strong. Habits form in early years.

3rd. The teacher must begin on some common ground; we must get down to their level, beginning with what they know, and work up.

4th. Teaching must be simple. Children's minds can only take in a little at a time. We must, therefore, adapt the work to the children.

5th. Surroundings should be made attractive; teachers should try and be cheerful, thus acting on the children.

6th. The teacher must appreciate the relationship between class and home. Parents can do much by helping children prepare lessons, and teachers can do much by visiting the homes of the children.

7th. Importance of the teacher's preparation. We cannot deceive the children with unprepared work.

Mr. Lucas then addressed the Convention for ten minutes on "Seeking results of S. S. work." We should look for results early in the life of the child.

The following were then appointed on the Committee of Resolutions, Mr. Abbott, Mr. D. P. McLachlan.

The Convention closed by singing "Nearer my God to Thee." Although this session was not well attended on account of the state of the weather, it was most interesting, and much was learned in regard to the work.

THIRD SESSION 9.30 A.M., JULY 13.

Convention opened with devotional exercises, led by Dr. A. L Brown. Minutes of last session were read and approved. The county secretary, Miss Shirreff then submitted her statistical and financial report, which was accepted.

Executive committee :—Mr. D. P. McLachlan, Mr. McLoon, Bessie McNaughton, Mr. T. A. Clark, Miss Mowatt; and Mrs. Woods and Dr. Brown on Home Department. Dr. Brown then led a conference on the Home Department.

4TH SESSION—2 O'CLOCK, 13TH.

Convention opened with devotional exercises led by Rev. Mr. Sutherland. Minutes were read and approved. The next subject on the programme "Conference of Primary Teachers" was taken up and led by Miss Lucas and discussed by several teachers. A hymn was then sung, after which Miss Lucas took up the subject "Methods of work in the Primary Class." She emphasized the needs of a room at least curtained off from the rest of the school, of the use of a blackboard and of symbols, and showed how these needs could be met in a simple way by all.

Another hymn being sung, Miss Sheriff read an address from the S. S. Association to Rev. Mr. Steel, expressing their appreciation of his painstaking and very helpful assistance in S. S. work, their regret at his removal from this county, and wishing him the divine blessing in future work.

Mr. Steel, in reply, thanked the association and told of the great help and pleasure he received from the work.

The conference of normal work was then taken up by Dr. Brown, Rev. A. Lucas and Rev. Geo. Steel.

Two question slips were passed, both referring to primary work and were answered by Miss Lucas.

Nomination of delegates was referred to nominating committee.

Dr. Brown again asked cooperation in Home Department work, requesting assistance from all parishes, as this is a new work and, especially in this part of the Province, much energy is needed.

5TH SESSION—TUESDAY EVENING 13th.

Convention opened by half hour praise and prayer service, led by Rev. J. D. McKay.

The committee on Resolutions reported the following, which were adopted,

1st. Your committee observe the greater possibility of teachers when they are students of systematic lessons, and recommend that Convention commit to some one person the work of promoting the formation of normal classes in the county.

The carrying out of this was left in the hands of the Executive Committee.

2nd. It is important that some one be appointed to promote the extension of the Home Department.

Dr. Brown was appointed to this work.

3. That the committee recommend that the thanks of the Convention be tendered to the Pastor and Trustees of this church for use thereof.

4. We remember with gratitude the deep interest which our friend Dr. McKay has always taken in S.S. work; therefore assure him of our heartfelt sympathy in his bereavement and our united prayer for divine blessing upon him.

5. We regret that two of the best known and earnest workers of our Association are about to leave the County—Miss Shirreff who for several years has filled the offices in Parish and County Associations; and Rev. G. Steel who during his residence amongst us has been so intimately connected with all departments of the work,

Therefore, resolved, that this committee tender its sincere thanks for their services and pray they may have God's blessing wherever they go.

Dr. Brown read an address from Convention, which was presented to Miss Shirreff, expressing their appreciation of her services.

The following were appointed as delegates to Provincial Association Convention :—Mr. M. A. Kelly, Mrs. B. Rae, Mrs. A. C. Woods, Miss Bessie Creighton, Mr. McLoon.

Miss Lucas gave a very spirited address on the primary work and recommended, to further this work, a County Secretary. Miss Anna McLeod was appointed to that position.

The Convention was addressed by Rev. Mr. Lucas, the Field Secretary, who appealed to S. S. workers for the several crying needs in the work, particularly the grading of schools. An address was given by Rev. J. D. McKay, recommending systematic work, and Convention closed with prayer.

The Convention in point of members was not up to the usual mark, but the conferences of teachers, and the addresses were highly appreciated, and the teachers were given many points in the line of S. S. work. The presence, addresses and advice of Miss Lucas who, for some time past, has been training for primary work in Massachusetts, were of the greatest practical value to the conference and most highly appreciated by all.

Things that Fatten.

A writer on obesity says: "The safest way to reduce obesity is to begin by eating and drinking less, and to take as much exercise as possible, increasing it gradually day by day. Butter, fat, oil, sauces, haricot, beans, peas, vermicelli, rice, tapioca, macaroni, all fatten. Bread should be eaten in moderation, and stale or toasted. All sweets are forbidden. Plainly roasted or boiled meats, taken in moderation with fruit, apples and oranges especially. Gooseberries and currants are good when in season, and for drink take lemonade unsweetened, weak tea and black coffee.—Philapldea Record.

The Choir and the Minister.

The New York Journal is responsible for the following "yarn," which although untrue, is, nevertheless, interesting as a story invented to illustrate clerical trials from a well known source. The Journal says:—

"A New Brunswick minister has introduced the phonograph into his church to do the singing. Now this is a practical solution of the choir difficulty. The phonograph can be worked from the pulpit. The soprano couldn't. She always ran with the music committee, and sang the arias that the rich old deacon liked because he paid the salaries. When the cornet was first introduced into the church by Talmage it was thought to be a squelcher for the soprano, but the lady contrist got to be as imperious as the soprano, and got to winding her mellow horn down whole operose scores in the voluntaries and offertories. The phonograph squelches her completely. There is only one modern convenience needed in the church now, and it is to supersede the preacher with the kinetoscope. This is a suggestion that is made by the soprano herself."

Insanity In Summer

Brought on by Nervous and Mental Troubles.

Paines' Celery Compound the Great Tower of Safety.

Nervous diseases when aggravated by mental disturbances produce more cases of insanity in the hot weather than at any other season of the year.

Nervous headache, nervous dyspepsia, sleeplessness, and chronic constipation induce depression of spirits, extreme weakness, morbid fears, despondency and languor; from these dread insanity comes slowly and surely.

Nervous sufferers have a dread of hot weather. Finding themselves deeper in the pit of misery than they were in the spring and early summer they are in utter despair. Thousands whose cases have not been met by treatment they are now under are loudly calling for help.

There is hope and rescue for you, reader, if you are one of the sufferers. You are in need of Paine's Celery Compound, that great builder of the nervous system. Its vitalizing action commences with the first bottle you use. You soon begin to realize that you are daily drinking health. The volume of blood immediately increases in the arteries, and the body is fully fed and nourished. Your appetite becomes keen and natural, the tired nerves and brain are strengthened, and you feel impulses of health that cheer the soul.

The power of Paine's Celery Compound over nervous summer diseases is admitted by tens of thousands who have used the marvellous medicine. This remarkable remedy will most assuredly meet your case and give you a new life; it will lay the foundation for future happiness and long years. Weak wretched, and infirm reader, we counsel you to make use of this life-restorer at once, and enjoy the true blessings of health.
