Scientific American.

PROSPECTUS.

VOLUME FOURTEEN

BEGINS SEPTEMBER 11, 1858.

MECHANICS, INVENTORS, *Manufacturers and Farmers.*

The Scientific American has now reached its Fourteenth Year, and will enter upon a New Volume on the 11th of September. It is the only weekly publication of the kind now issued in this country, and it has a very extensive circulation in all the States of the Union. It is not, as some might suppose from its title, a dry, abstruse work on technical science; on the contrary, it so deals with the great events going on in the scientific, mechanical and industrial worlds, as to please and instruct every one. If the Mechanic or Artizan wishes to know the best machine in use, or how to make any substance employed in his business—if the Housewife wishes to get a recipe for making a good color, &c. If the Inventor wishes to know what is going on in the way of improvements—if the Manufacturer wishes to keep posted with the times, and to employ the best facilities in his business—if the Man of Leisure and Study wishes to keep himself familiar with the progress made in the chemical laboratory, or in the construction of telegraphs, steamships, railroads, reapers, mowers, and a thousand other machines and appliances, both of peace and war—all these desiderata can be found in the Scientific American, and not elsewhere. They are here presented in a reliable and interesting form, adapted to the comprehension of minds unlearned in the higher branches of science and Art.

PERUVIAN SYRUP!

OR, PROTECTED

Solution of Protoxide of Iron.

Having successfully passed the ordeal to which new discoveries in the Materia Medica are subjected, must now be received as an established medicine.

ITS EFFICACY IN CURING

DYSPEPSIA,

Affections of the Liver, Dropsy, Neuralgia, Bronchitis and Consumptive Tendencies, Disordered State of the Blood, Boils, Scurvy, and the Prostrative Effects of Lead or Mercury, General Debility, and all Diseases requiring a tonic, or alterative Medicine, is now beyond question.

The proofs of its efficacy are so numerous, so well authenticated, and of such peculiar character, that suffered cannot reasonably object to such the proofs of it.

The Peruvian Syrup does not profess to be a cure-all, but manifests a remarkable power over many diseases apparently the most opposite in nature, seemingly related, and proceeding from one cause, may be cured by one medicine.

The cures of diseases for which this preparation is recommended, have been published the highest order of medical testimony.

The formulas are published, the ingredients are accessible, and the entire system of the Syrup is open.

Those who may wish an opinion from disinterested parties respecting the character of the Syrup, cannot fail to be satisfied with the following strong testimonials, which speak for themselves. The signatures are those of gentlemen well known in the community of Boston, and of the highest respectability.

CARD.

The undersigned, having experienced the beneficial effects of the "Peruvian Syrup," do not hesitate to recommend it to the attention of the public.

From our own experience, we will confirm the testimony of others whose intelligence and integrity are a guarantee for their statements, no doubt of its efficacy in the cure of Pulmonary Diseases of the Lungs and Bronchial Passages, Dyspepsia, Liver Complaint, Dropsy, Neuralgia, &c. Indeed its effects would be regarded as little short of miraculous by those who have witnessed them, and have volunteered their testimony as we do cordially, to its restorative powers.

CERTIFICATE OF DR. HAYES.

It is well known that the medicinal effect of the Protoxide of Iron is just by even a brief exposure to air, and that to insure the administration of Protoxide of Iron, without further oxidation, has long been a desideratum in pharmacy.

In the Peruvian Syrup this desirable point is attained, and the compositions is in a way to offer to the public a remedy which contains only pure Protoxide of Iron, without any admixture of the Sesquioxide, or any other salts of Iron, such as the proto-carbonate, nitrate and tartrate of the Medicinal Menstrua.
