mounted by guns, and how severe were the assaults on the watch-tower at that time was attested by the large number of human skulls and bones which were found during the excavations for the Shropshire Union Canal, which runs just outside the walls. A fine view of the surrounding country is obtained from this point. At a short distance is Hawarden, the place of residence of the late Rt. Hon. W. E. Gladstone, the grand old man of British politics. The twistings and twinings of the Dee can easily be traced, as the river threads its way towards the estuary. In the distance we can distinguish Flint Castle, the Point of Ayr lighthouse at the mouth of the Dee, and the Clwydian hills

We next reach Pemberton's Parlour, or the Goblin Tower, formerly a turret, which is circular in shape, and was partially rebuilt in 1894. A little beyond this point is a spot which it is impossible to look upon without feeling a strange mixture of curiosity and reverence. It is the Barrowfield, a green spot just within the city walls. In the days of the Roman occupation, it was the drill ground of the Roman legions; at the time of the Great Plague it became the burial ground of the victims of that awful visitation; and as one stands and looks upon the now peaceful scene, one seems to hear the heavy tread of Roman feet, and the clank of Roman armour, alternating with the dreadful cry, "Bring out your dead," as the plague cart goes its nightly round. At the turn of the walls in the direction of the West, or Water Gate, we see the Water Tower, erected in the year 1322. In reality there are two towers, an inner and an outer one, the latter being intended for protection from the maritime foes at the time when the waters of the Dee washed the base of the walls. The inner tower is known as Bonewaldes-

King Charles Tower, Chester,

thorne's Tower, and the outer as the Water Tower. A small museum has been established here, where there may be seen many interesting relics found in the city.

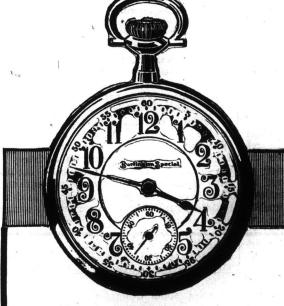

Passing the Water Gate, the next point of interest is the Roodee, the famous race-course of Chester. It lies close under, and outside, the city walls, and is bounded on the further side by the waters of the Dee, which here sweep round in a semi-circle. Right down from the days of the Roman occupation, it has served as a training ground for troops and a place of recreation. Away across the course we have a good view of Curyon Park, a residential district beyond the Dee.

Leaving the barracks on our left, we pass in quick succession the Grosvenor Bridge, a fine stone structure, having an arch with a span of 200 feet; the

Castle, a modern erection, which stands on the site of the original Norman building; the old Dee bridge, and Bridge Gate, and on to Eccleston Ferry, from which steamers sail to Eaton Hall, the residence of the Duke of Westminster. Close by the ferry is the Suspension Bridge, an elegant piece of work, which spans the Dee, and leads to Queen's Park, on the southern bank. A little beyond this point is another old watch tower, known as Thimbleby's Tower, immediately after which we arrive at the East Gate. Crossing the gate, we pass several buildings of considerable interest, and presently come upon the Cathedral of St. Werburgh, the finest view of which is to be obtained from the walls at this point. Near at hand is the Kale Yard Gate, a short passage which formed a near approach to the kale-yard, or kitchen garden, of the monks. Two or

three minutes' walk brings us to the next and last point of interest, which all but completes our circle of the walls. This is the Phoenix, or King Charles' Tower, by which latter title it is more popularly known. The tower is entered by a flight of stone steps leading up to the entrance, over which is the figure of a phoenix (the crest of an old city guild) carved in stone. Beneath this figure is a stone tablet containing the following inscription: "King Charles stood on this tower, September 24th, 1645, and saw his army defeated on Rowton Moor." Thus did he witness the downfall of all his hopes.

But the interest of Chester is by no means confined to its walls. It has ar ecclesiastical history dating back to the 11th century, the See being removed from Lichfield in the year 1075 to the Church of St. John the Baptist, which

Our very finest watch and the absolute peer of any watch made in the world today. It is, of course, impossible to give a full description here, but we submit this short outline so that you may have some idea of how this perfect masterpiece is constructed.

ADJUSTED TO TEMPERATURE The watch is put into a refrigerator and run for 24 hours, then it is put into an oven of 100 degrees temperature and run for 24 hours. Then it is run in normal temperature for 24 hours. This process is continued until the watch runs the same in all temperatures. Not 10 per cent of all watches made are adjusted to temperature.

ADJUSTED TO ISOCHRONISM A careful adjustment so that the speed of a watch when it is fully wound up is the same as when it is almost run down. Not more than four watches out of every one hundred watches made in the United States have this adjustment.

ADJUSTED TO POSITIONS Adjusting a watch to positions its adjusting it so it runs the same in any position. You can can easily see if a watch is to run absolutely accurate the friction of the bearings must be exactly the same for all positions. This adjustment is never attempted on more than a very, very minute percentage of all watches made in the United States.

THE JEWELS used are the finest grade of selected genuine imported ruby and sapphire jewels, absolutely flawless. Nineteen of these chosen gems protect every point. It is well understood in the railroad business that 19 jewels is the proper number for maximum efficiency. Nineteen jewels is regarded by experts as the best number for a perfect watch, more jewels often being a source of complication rather than service. The smaller size ladies' watch has 17 jewels, giving this watch the protection needed for a lifetime of service.

DOUBLE JEWELS—that is, bearings with two jew-ton. A watch so jeweled requires very much less attention than watches jeweled in any other way.

MAIN SPRING The two points in which Americans have yet to compete with the Swiss are mainspring and hairspring. Although watch springs are made now in almost all parts of the world, no one has ever been able to equal these Swiss springs. The strain is almost absolutely constant, no matter whether the watch is fully wound or is nearly run down. The Swiss springs used in the Burlington Watch do not crystalize with usage and breakage is very rare. These springs will run a watch from 32 to 36 hours.

SWISS BREGUET HAIRSPRING are imported for the same reason as the important mainspring. They are far better than any other hairspring made.

THE U SPRING REGULATOR allows adjustments to the smallest fraction of a second.

FACTORY FITTED Every Burlington Special move-ment is fitted into the case right at the factory where the movement was made—into a case made for that watch. No looseness or wearing of parts against the sides of the case. No rattle or jar.

OUR DIRECT GUARANTEE means that we will complaint either as to workmanship or material, in either watch or case, at any time, without red tape or formality. Note, we do not say within ten or twenty years, but at any time. Our guarantee, of course, does not include cleaning or breakages caused by carelessness or accidents, or tinkering with the watch; but, if anything is found wrong with the watch in any way, we will replace the part complained of, or we will repair the watch free of charge, or we will give you a new watch absolutely free, as you may elect. Note; This guarantee is good for 25 years, yes, and longer than 25 years; for any length of time if anything is found wrong with the material—absolutely without restriction.

SMASHING WATCH OFFERS

Our great fight against the Watch Trust is Now on. We are determined to maintain our independent Burlington line. And so we are making this offer—the most startling, the most overwhelming offer ever known in the whole history of the watch industry. A more liberal offer to you, the consumer, than any other concern would dare to make to the biggest wholesalers.

Trust Prices Smashed

At last! An absolutely perfect watch, the magnificent Burlington Special, at a price and on terms within the reach of all. For we are waging the fiercest battle against trust methods ever known in the history of this country. We will NOT be bound by any system, no matter how powerful. We call the great factories a trust because they have perfected a system of contracts and agreements with dealers everywhere, which enables them to fix prices and control trade. We do not say that the Watch Trust is illegal. But we do insist that their system of "quiet" agreements and price-boosting contracts is very, very unfair.

The Watch Trust has cornered the dealers, but we are determined to win this fight no matter what it costs. So we have decided to offer our very finest watch, the unparalleled Burlington Special, direct to the public on a staggering offer which must simply annihilate unfair competition.

Here Is Our Offer You may get our finest watch at the anti-trust price and besides, if you act at once, you may secure the splendid Burlington Special at the no-dealer price, without profits added—exactly the same price which the wholesale jeweler himself must pay. Think—the quality watch, the world's masterpiece of watch manufacture, for less than half the price usually asked for watches even approaching this one in quality.

AND WITHOUT MONEY DOWN—We will send the watch to any responsible person without asking you for a single cent in advance. There are no formalities. There is not the slightest obligation on your part of any kind or nature except to compare it carefully with any watch you ever saw, no matter what the price. Then, if not satisfactory, you may return it to us at our expense. But if you find this watch the most stupendous bargain you ever dreamed of, just slip the watch into your pocket and pay us the Rock-Bottom price, either in cash or on terms of \$2.50 a month, just as you prefer.

You pay exactly the same price whether you buy for cash or on time. We allow the public the advantage of these 12.50 a month terms, in order to quickly attract national attention to our great anti-trust fight. So that everybody can afford to get a Burlington watch at once. Watch Book Free Our remarkable Watch Book Free Book now sent free on request. We are determined that the public shall be posted on the startling conditions existing in the watch industry throughest the entire country. We want the public to know the real truth, the inside truth about watch prices and watch values. The Secret selling methods, price-boosting contracts, "quiet" agreements to uphold prices—all are completely explained in this book.
