At Chicago July wheat closed ½c higher than yesterday, July corn ¼c higher and July oats ⅛c lower.

Chicago cars: Wheat 3, contract 0; corn, 150, contract 70; oats, 115, contract 37.

Northwest receipts to-day, 151 cars, week ago 229, year ago 199.

Primary receipts wheat 260,000 bushels, against 308,000; shipments 152,000, against 655,000. Receipts corn 542,000, against 590,000; shipments 405,000, against 441,000.

Chicago: Snow's monthly report makes the condition of winter wheat condition 88.8 per cent., against 91.1 on May 1. The condition is much less than usually occurs during May and is indicative of high crop possibilities. The decline is confined to the southwest. Previous high conditions maintained elsewhere. Present promise is for fully 465,000,000 bushels.

Spring wheat area estimated at 20,500,000 acres, against 19,700,000 last year. Condition is 95, against 90 last year.

Modern Miller, St. Louis: More favorable weather conditions, including less moisture and more warmth and a beneficial effect on the winter wheat crop in sections where the growth of the plant has been backward on account of low temperatures which had prevailed for some time. No serious damage is indicated where rust is prevalent and there is little injury by fly. The harmful effects of unfavorable weather conditions are more evident in localities where deterioration had previously been reported; general condition of crop was materially reduced during May in the territories in the soft winter wheat section of Kansas and in Missouri and Tennessee. Harvest has commenced in southern states and is advancing rapidly.

Chicago Gossip.

Marshall, Spader & Co. wired J. G. Beaty, King Edward Hotel, at the close of the market to-day:

There was a fairly large professional trade, with fluctuations spasmodic and news factors plentiful. Missouri crop report very bullish compared with month ago, but not with year ago, while Snow and Modern Miller reports very bearish. Former makes wheat condition 88.8 for winter vs. 95.1 as his report month ago and predicts 465,000,000 bushels winter. Spring wheat area 800,000 acres larger than year ago and condition 95 vs. 90. Crop reports from private sources of both sorts southwest claimed heavy rains not good in Southern Kansas, while others claimed fine conditions, Kansas and Oklahoma crops near harvest and large yields prospective in Kentucky. Duluth reported sales of 200,000 bushels. Cash wheat to east today, mainly No. 1 and 4 northern, and prices claimed to be good. Speculators held cash wheat here above buyers' views. Southwestern markets to-day were weak. There was an early bulge in wheat and corn on wet weather west and advance in Liverpool markets, prices there up ¾c, spot and futures.

Ennis & Stoppani wired to J. L. Mitchell, McKinnon Building:

Wheat—The situation in wheat is one which presages continued activity with sharp turns. Devotees of both sides of the market are not without arguments in their favor, some of which the casual observer fails to understand. In favor of the bulls we note the small stock of wheat in local houses, 2,600,000 bushels, in all positions, a good demand for cash wheat and the ever-present "prominent trader," who is always ready to take advantage of a temporary bullish situation. Added to this is the concentration of July wheat in the hands of a very strong element in Minneapolis, which exerts some influence over all domestic markets. On the other hand we are on the eve of a new crop that promises to more than meet all requirements and provide a splendid surplus. Just how eager the millers will be for the first run of new wheat is problematical, but we opine that there will be no stampede. Only a low price can tempt foreigners to procure their supplies here. In view of prospects, prevailing prices are above the average even for a crop below the normal. In view of these facts, while the market will be susceptible to rapid changes and temporary high prices, we predict that a lower level will surely follow later on. There was a good trade to-day, but market kept within a range of about one cent and displayed a rather steady tone all day.

Corn and oats were very active, with a large trade and strong undertone. The buying of old July corn continues on the part of strong people in the trade. The situation is very favorable to higher prices.

Provisions—Strong and higher on good support by packers; should be further advance.

Silverware for the Bride

We'll make up a wedding set of 54 pieces of silver-plated tableware for $10.95, and the plate will bear the

Famous Name of Wm. A. Rogers.

This is a value that represents more—far more—than the actual money we ask you to pay. If you figure it up you will find that we allow you about 70% discount on the manufacturer's list prices at which silverware is presumably sold. Our dealings with the Wm. A. Rogers firm are so big that we can **undersell the Canadian market on silver-plated tableware.** Those who have wedding presents to buy this June should take note of this very noteworthy fact.

The pattern on this set for to-morrow is a neat scroll—"Helena" we call it—and we can always match it with any piece you may want some future time.

And in conclusion our well-known challenge—money back if not satisfied—stands behind Wm. A. Rogers' own strong guarantee.
