FARMER MURDERED HIRED MAN HELD

Arthur Marriot, Carrying Two Revolvers, Arrested by Detective Reburn.

VICTIM SHOT IN BACK

Inquest Was Opened at Goderich and Adjourned for Week.

Special to The Toronto World.

GODERICH, Ont., April 26.—Detective Reburn of Toronto tonight arrested a young man, Arthur Marriot, in connection with the murder of Robt. Bean, a farmer of Colborne Township, who was found dead on a sideroad north of Goderich. Bean had been shot in the back. Marriot formerly worked for a farmer near Carlow, the home of Bean, and had just returned to the neighborhood. He is wanted in Detroit on a charge of stealing $100 and had two revolvers when arrested.

The motive of the crime was evidently not robbery, as no attempt had been made to rifle the victim's pockets which contained a sum of money.

An inquest was opened today by Coroner A. C. Hunter of Goderich and was adjourned until Monday, May 3. The murdered man is survived by his widow, four sons and three daughters.

ITALY AND GREECE STILL HOLD ALOOF

Agreement Between Rome and Triple Entente is Reported Reached.

CONVERSATIONS GO ON

British Action in Cutting Off Dutch Traffic Not Yet Explained.

LONDON, April 26.—The diplomatic situation with respect to Italy and Greece remains obscure. It is known, however, that conversations are still proceeding between the Germanic allies and Italy, and it is reported that an agreement has been reached between Rome and the triple entente.

The position of Greece may be cleared up after the visit which Prince George is paying to Paris and London, altho nothing is likely to happen until after the general election which is about to take place.

Holland's Isolation.

Holland, another neutral country deeply interested in the war, is isolated except by telegraph, the British having placed an embargo on shipping—altho two steamers loaded with produce arrived at English ports from Holland today, while Germany has closed both her own and the Belgian borders.

The German action is dictated by the desire to hide the movement of troops. The British action is not explained, except by the assumption that the admiralty expects a naval battle with the German fleet which is cruising off Heligoland.

PLAN LARGE CROPS FOR THE SETTLERS

Government Seed Now Being Secured From Crown Agents.

LARGE PULP OUTPUT

Settlers and Province Co-Operate in Pushing This Industry.

Seeding is beginning in New Ontario and settlers who had been looking forward to a rather hopeless season because of the depression are now securing adequate amounts of seed grain from the government agents. The new provision of the province to see that the crops should exceed the average in quality and quantity is being acted upon, and crown land agents are now surveying the fields of those who require special assistance.

Hon. W. H. Hearst, in town from a northern visit, claims that the crop output of last year created a record, and that more material progress was marked than in any two preceding years.

The season of 1915 will not be much behind, because of changed conditions. He had studied the needs of the northern development branch for the year and had found that little retrenchment would be advisable.

Raising Pulp Fibre.

The pulpwood industry is being pushed, altho no market has yet been found for a good deal of it. The government is co-operating with the settlers to encourage the progress of this work, and large quantities are being gathered for storage until shipping facilities open up.

Mr. Hearst declares that no unusual significance was attached to his trip. He was following out a practice of visiting the north each year.

ANXIOUS TIMES FOR PARENTS

Children Often Seem Pining Away and Ordinary Medicine Does Not Help Them.

The health of children between the ages of twelve and eighteen years, particularly in the case of girls, is a source of serious worry to nearly every mother. The growth and development takes so much of their strength that in many cases they actually seem to be going into a decline. The appetite is fickle, brightness gives way to depression; there are often serious headaches, fits of dizziness, or occasional fainting and a complaint of weariness at the slightest exertion. Ordinary medicines will not bring relief. The blood has become thin and watery, and the child must have something that will bring the blood back to its normal condition. At this stage no other medicine can equal Dr. Williams' Pink Pills. Their whole mission is to make new blood, which reaches every part of the body, bringing back health, strength and energy. Mrs. James Harris, Port Rowan, Ont., says: "At the age of thirteen my daughter began to look very pale, and seemed listless and always tired. She did not take interest in her school work or in those amusements of girlhood. In fact, she just seemed to drag herself about, complaining of always being tired; did not eat well, and did not sleep well at night. I took her to our doctor, who said she was anaemic, and advised me to give her Dr. Williams' Pink Pills. She took the Pills for nearly two months, when she was as well and lively as any girl could be, gained nicely in weight, and has since enjoyed perfect health. I am quite sure that what the Pills did for my daughter they will do for other pale, weak girls. I have also used Dr. Williams' Pink Pills myself with the best results and can only speak of them in terms of greatest praise."

Sold by all medicine dealers or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

GERMANS ENTICED INTO DEADLY TRAP

French Yielded Trench to Foe and Then Blew It Up.

HAVOC WAS TERRIBLE

German Sapping Operations at La Fontenelle Effectively Stopped.

PARIS, April 26.—The following official review of recent events at the front are given out at the war department today:

"In the Vosges, as in Champagne and the Argonne and at Artois (department of Calais), the proximity of the French and German trenches and the strength of the defensive works forced the adversaries to have recourse to sap and mine. To the east of La Fontenelle, at the summit of a hill, we organized a very powerful line of resistance.

Subterranean Contest.

"The Germans began to besiege this hill toward the end of March. Suspicious noises led to the belief that a subterranean contest had started. The hottest kind of actions developed thereafter.

"During the entire night of April 10 our infantry fought, using grenades and destroying earth barriers the Germans sought to erect, the combat occurring beneath the level of the ground, the surface of which was swept by quick firers.

Enemy's Night Attack.

"On April 13, towards 8.30 o'clock in the evening, the Germans, profiting by the darkness, attempted a decisive action against the right section of the works. With bombs and grenades they crossed the space which separated them from the French, and believing they had surrounded the defenders of the trench, they cried out to the Frenchmen to surrender. But the evening before we had dug a new branch of the underground works, which permitted the defenders to evacuate the post, which previously had been mined.

Terrible Explosion.

"As soon as the Germans were installed there the order was given to explode the mine. A man delegated to fire the mine was put out of action by a grenade, while lighting the wick. His companion immediately replaced him.

"A violent detonation shook the entire works. It was followed by cries of terror and pain. One hundred kilograms of explosive had blown up the position and the old branch of the underground works.

"We immediately established a barrier against which the Germans buried themselves. Their officers could be heard during the night urging their men forward, but the men, terrorized by the explosion, answered in groans: 'Nein, nein.'

"Our artillery, guided by searchlights, opened fire on the enemy's works. Upheavals of the ground showed the efficiency of our fire. During the night Red Cross automobiles rolled along the roads. At daybreak the effects of the explosion could be judged. Human debris hung on our accessory defences and bodies were scattered about. Thus ended, at La Fontenelle, the sapping of the Germans."

ITALY'S INDECISION WILL BE COSTLY

Late Intervention Will Not Avail, is Warning From Petrograd.

ROME, April 26, via Paris.—An energetic campaign is being conducted in the Italian press on behalf of the allies. Every day there appear telegrams from Petrograd warning Italy that if she does not soon intervene she will lose everything. It is said the allies have decided to give nothing, in case they are victorious, to a neutral power which, in the words of Jules Cambon, the French diplomat, "rushes to succor the victor."

The newspapers also publish long reproductions from the French press stating that Italy's participation in the war is imminent. Despatches from London say the Italian ambassador there, Marquis Imperiali, is about to sign with Sir Edward Grey, the British foreign minister, an agreement containing clauses which provide that Italy shall side with the allies.

An Easy Way to Get Fat and Be Strong

The trouble with most thin folks who wish to gain weight is that they insist on drugging their stomach or stuffing it with greasy foods; rubbing on useless "flesh creams," or following some foolish physical culture stunts, while the real cause of thinness goes untouched. You cannot get fat until your digestive tract assimilates the food you eat.

Thanks to a remarkable new scientific discovery, it is now possible to combine into simple form the very elements needed by the digestive organs to help them convert food into rich, fat-laden blood. This master-stroke of modern chemistry is called Sargol and has been termed the greatest of flesh-builders. Sargol aims through its regeneration, reconstructive powers to coax the stomach and intestines to literally soak up the fattening elements of your food and pass them into the blood, where they are carried to every starved, broken-down cell and tissue of your body. You can readily picture the result when this amazing transformation has taken place and you notice how your cheeks fill out, hollows about your neck, shoulders and bust disappear and you take on from 10 to 20 pounds of solid, healthy flesh. Sargol is absolutely harmless, inexpensive, efficient. All leading druggists of the city and vicinity have it and will refund your money if you are not satisfied, as per the guarantee found in every package.

Caution:—While Sargol has given excellent results in overcoming nervous dyspepsia and general stomach troubles it should not be taken by those who do not wish to gain ten pounds or more.
