CHEMICAL PRODUCTS, LIMITED. This company manufactures sulphuric acid, acid phosphate (chemical fertilizer), sodium nitrate, refined, and Aspirin from the raw materials located near its plant at Trenton, Ontario. Most of these products have been heretofore imported into Canada. The demand for these products is greater than this company supply for a great many years. They are manufacturing now and the estimated net returns for this year is about three times the amount of the dividends required for preferred stock. That is why the common stock will have a substantial rise in market price when listed. Our advice is to make immediate application for this stock.
