#### Dear Sir:

I would like to make a slight comment on the repair prices quoted in the Residence Rap for November. The physical plant lists the price of broken window panes as follows: \$3.00 Regular -\$5.00 Large

The reason I mention these two are what they appear to be the articles most often broken within Residences. I phoned a few places downtown, out of idle curiousity, and got the following prices.

44 cents per pane (2) 33 cents per pane.

Large - window glass (1) 91

cents per pane; (2) 70 cents per minutes more to install than , pane.

I find it hard to draw the relationship between purchasing a labour. Why? Perhaps one person 33 cent or 44 cent pane and must hold it, while the other finishing with a price after in- tries to manouver the building stallation of \$3.00. If that's hard into place -your guess! Regular - window glass (1) to follow, how about the large

pane? It costs first 37 to 47 cents more for the large pane and should take a WHOLE 3 or 10 Harrison House

regular pane, maybe, and cosh \$2 extra in what I presume i

Dear Sir:

You have gone too far! The caption you had printed under a picture on the front page of the BRUNSWICKAN of Nov. 23. goes beyond any editorial freedom allowed you unless you have an abysmal ignorance of biology and, as well, you are not eating.

Before I set out my reasons for the above statements, let me say that I am not in favour of trophy hunting, nor do I condone the hunting of endangered species.

If you wish to argue against deer hunting on a philosophical holder, and you claim I cannot will starve to death.

hunt and eat deer, since the deer is beautiful to you, I will then say a cow is beautful and so is every wheat plant, therefore, you cannot eat beef and wheat. This is the basis for my statement that you cannot eat if you are to use this argument.

As well, there is no scientific basis for your concern since any elementary course in Zoology will make it clear that man cannot now relinquish his role as the master predator without dire consequences on his economic and F. J. Hutcheson physical well-being. Deer are prolific breeders and if their population is not controlled (by man, level, may I suggest that, since since wolves are so scarce), they beauty is in the eye of the be- will overfeed their range and many

Any thinking person will real. ize that a deer strung up to cool well cleaned and hung, is not disgusting, the only part which may be disgusting is that one man has gotten an unfair number of deer, but this problem is usually well-regulated by the authorities.

I am in favour of free expression of opinion, but such an ig norant suggestion from a supposedly educated person IS disgusting since it has no basis in fact.

Dear Sir:

In last week's Bruns, you ran a picture of three deer carcasses shot in the New England States. Continued to page 11
