Ship Newman Hall, from Penang for London, Aug 28, lat 36.50, lon 39.45.

Bark Douglass, McDonald, from Guantanamo via Delaware Breakwater for Boston, Oct 3, lat 38.50, lon 74.

NOTICE TO MARINERS.

Boston, Sept 27—On or about October 25, the whistling buoy now placed 3 1-2 miles SSE from Eastern Point will be moved to a point 2 miles ESE from Thatcher's Island Light.

Philadelphia, Sept 30—Notice is given by the Lighthouse Board that on or about Oct 4, 1895, or at the first favorable opportunity, light vessel No 45 will be replaced on her station, about 2½ miles ESE of Winter Quarter Shoal, and Relief Light Vessel No 9 will be withdrawn.

Washington, Sept 27—Notice is given by the Lighthouse Board that on or about October 2, 1895, Light Vessel No 58, moored about 2 1-2 miles to the southward of the outer 18 foot spot of Frying Pan Shoals, marking off from Cape Fear, seacoast of North Carolina, will be removed from her station for repairs and will be replaced by Relief Light Vessel No 29.

Light Vessel No 29 will show two fixed white reflector lights, her two masts, a schooner rigged, with an oval black cagework day mark at the head of each mast, but differs from Light Vessel No 53 in having a white hull with "Relief" in black on each side and "No 29" in black on each quarter, a bell struck by hand instead of a steam fog signal, and in having no smokestack between the masts.

Light Vessel No 53 will be replaced on her station as soon as the repairs have been completed, of which due notice will be given.

During thick or foggy weather the fog signal will be a Crosby chime whistle operated by compressed air, sounding blasts of three seconds' duration, separated by alternate silent intervals of 59 seconds and 60 seconds. If whistle be disabled a bell will be rung by hand.

A fixed white light was exhibited Oct 1 from a lighthouse erected on Wolfe Point, the northeast point of Nicol Island, west side of entrance to Ship Harbor, N S. The light is 87 feet above the sea, and in clear weather should be visible 15 miles from all points of approach.

Tompkinsville, S I, Oct 1—The Lighthouse Board gives notice that the damage to the cable of the new system of electric buoys, New York lower bay, previously published, has been repaired and the lamps will be relighted from the 1st inst. The lamps of the old system will be extinguished.

Tompkinsville, NY, Oct 2—The Lighthouse Board gives notice that a whistling buoy, for experimental purposes, has been placed about 75 feet WNW from the Gedney Channel whistling buoy, New York lower bay.

Washington, Oct 2—Notice is given by the Lighthouse Board that on or about October 4, 1895, or at the first favorable opportunity, light vessel No 45 will be replaced on her station, about 2⅝ miles ESE of Winter Quarter Shoal, and relief light vessel No 9, temporarily marking the station, will be withdrawn.

No change has been made in the characteristic of the light or general appearance of the vessel, but the fog signal has been changed to a Crosby chime whistle, operated by compressed air, and the characteristic of the signal changed to sound blasts of 3 seconds' duration, separated by alternate silent intervals of 59 and 60 seconds. If whistle be disabled a bell will be rung by hand.

Delaware Breakwater, Oct 4
