WHEAT IN CALIFORNIA.

There were some apprehensions about the wheat crop in California for want of rain. The San Francisco *Journal of Commerce* says there has since been a rainfall in the southern part of the State of fourteen inches. The San Joaquin valley has experienced a down pour more sparingly, but sufficient for the pre-ent. The heavy frosts indicate more rain. The timely rains have been worth millions to the State. The amount of wheat on hand in the San Joaquin valley is 80,000 tons, of which 40,000 tons are stored at Stockton, from which place 110,000 tons have been shipped to San Francisco. The exports from July 1 to Jan. 9 in wheat and flour have been equal to 12,569,000 bushels. According to estimates of the crop there is still a probable surplus for export of about 6,000,000 to 8,000,000

The following is the official report of the Toronto Stock Exchange, Jan. 29th, 1879.

CATTLE.

TRADE—Has been rather quiet since our last.

EXPORTS—Receipts of cattle for shipment have been on the increase, and the demand for shipping has been steadily maintained; all steady weighing 1,300 lbs. and upwards have found ready buyers at $4.75 to $5, as usual, also a good many more had they been offered; but should the news in Wednesday's *Mail* of the stoppage of the import of American cattle into Baghdad, in consequence of some lots being diseased, apply to Canada, there may be an early change in these prices. The enquiry for the local markets, however, has fallen off somewhat, the chief cause of which is to be found in the fact that butchers are now well stocked, and do not like so buy in face of the January thaw. Still first-class steers and heifers have remained worth $4.50. But second-class have been offered freely, and proved very slow of sale and weak in price at $3 37 to $3.75. Third-class have been equally slow of sale, or rather more so than second-class, and not worth over $2.50 to $3.

Whitcomb's Remedy

—FOR—

ASTHMA,

Rose Cold and Hay Fever.

The late Jonas Whitcomb of Boston, visited Europe a few years since for the benefit of his health, which was impaired by frequent attacks of *Spasmodic Asthma*. While under the treatment of an eminent German physician his asthma disappeared; he procured the recipe which had done so much for him. This remedy has been used in thousands of the worst cases with astonishing and uniform success. It contains no injurious properties whatever.

TESTIMONIALS.

ST. LOUIS, Nov. 10, 1877.

Messrs. J. BURNETT & Co.: The relief the Jonas Whitcomb's Asthma Remedy afforded me was perfect; I have not had a bad night since taking it, and I have in no case found any relief until your Remedy came to hand. I most cheerfully recommend it to anyone troubled with Hay Fever or Asthma, for it is the only remedy ever used by me with any good effects.

Yours truly,

WM. T. MASON,

Of Messrs. MASON & GORDON, *Lawyers*, 517½ Chestnut Street.

Messrs. JOSEPH BURNETT & Co., Boston, Mass.:

THE PLAGUE IN RUSSIA

The Pestilence Brought from Turkish Battlefields.

A SOLDIER'S FATAL GIFT.

VIENNA, Feb. 3.—The Medico-Chirurgical *Central Blatt* states that the origin of the pestilence in Russia is as follows: A Cossack, returning from the war to Wetlanka, brought his lady-love a shawl which was probably part of his spoil. The girl wore it two days and sickened with all the symptoms of the plague and died. During the following four days other members of the family died. The disease spread rapidly, but the local authorities did not pay any attention to it till half the inhabitants had died and those remaining were unable to bury the victims. The epidemic had assumed serious dimensions by the 25th November, but the Government was only informed officially on the 11th. Decem[illegible] any energetic means were taken for preventing its spreading further. The authorities have since exerted themselves to the utmost. As the only way to arrest the disease is to prevent all communication between the districts where it reigns and others which are healthy, a double cordon is being formed, firstly, in the towns and villages, shutting off streets where the plague reigns, and secondly by surrounding the places with troops, so that nobody is allowed to pass. Quarantine also being instituted at the border of the infected district. The population is said to take an active part in preventing the crossing of the sanitary line. The panic in Russia is almost incredible. People of every class and station have petitioned for the entire cessation of all intercourse—even of postal communication—between the rest of Russia and the Volga. Letters sent from the Astrakhan and Tsaritzin are not received by the persons to whom they are addressed. Some people even refuse to take paper money.

A Berlin correspondent says Russian railway cars are no longer admitted to German territory. The export of grain from Poland will suffer severely from the restriction. The Russian Government is discussing the expediency of prohibiting the transit of Russian provisions sent to victual the Balkan army. The Russian sanitary commission has proposed to shut off the Volga line from all intercourse within Western Russia and to permit communication only under quarantine.

The Porte announces that Russian ports will be quarantined against Turkish ports on the European coast of the Black Sea. The East Roumelian Commission has proposed the same measure along the coast frontier from Kustendji to Bourgas, and Roumania has decreed a similar course in the delta of the Danube, and on the coast of the Dobrudja and issued regulations identical with those put in force by Austria in regard to traffic, and the importation of goods across the Russian frontier.
