OUR ENGINES are made with Circular Valves, and furnished with Cut-off Valves, by means of which the Steam is worked expansively, and ONE THIRD LESS FUEL used than in full stroke engine. We have lately adopted a governor entirely different from our old one, and equal to any of the most improved kinds made, which will control the engine and keep it at a regular speed. It is easily adjusted to a greater or less speed by a moveable ball and lever. We have added outer bearings to our valve spindles; also, brass glands to all our stuffing boxes which are held to place with a cup screwed on, thus obviating any liability to get out of line. Our piston rods and crank pins are of steel, and all valve spindles and engine bolt are made of Lowmoor iron. PORTABLE SAW MILLS OUR SPECIALTY.

**SKEDADDLER.**

THIS celebrated Horse will make the season between Amherst and Wallace, being at EATON BROOKS' STABLES, SACKVILLE, on WEDNESDAY, THURSDAY, and FRIDAY each week, and at LAMYS' STABLES, AMHERST, the remainder of the time.

SKEDADDLER was sired by *Sultan Jed*; dam, a Roncevalles mare bred on P. E. Island. He was exhibited at Halifax, where he took first premium as three years old.

SKEDADDLER was the winner of two premiums at the last Provincial Exhibition at Halifax, where he competed against horses from England and America, and no other horse received but one premium. He is 16 hands high, dark bay, very muscular, and kind in every respect. His dam, *Fair and Busy*, was one of the finest mares in the province, sired by *Redjacket*, which was imported from Long Island, N. Y. State, by Charles H. Wallace, and out of a mare by *Tom O'Shanter*, whose sire was *Sing*.

SKEDADDLER was sired by Wm. H. Church, Cornwallis, who would not breed a good mare to a common horse. (2 9) J. & J. R. LAMY.
