city market export ewes sold at $3 50 to $4; rams at $2.50 to $3 and spring lambs at $6.50 to $7.50 a cwt.

The hog market started the week at a lower range of prices, at $7.60 f.o.b. and $7.85 fed and watered on the market here. On Thursday prices had advanced 25c to 35c a cwt. and quotations at the city market were $8.20 fed and watered here and $7.85 to $7.95 f.o.b. on cars at country points. On the same day hogs were quoted at Buffalo at $8.25 to $8.35 for heavy; $8.15 to $8.30 for mixed; $7.75 to $8.15 for Yorkers; $7.50 to $7.60 for pigs, and $7.75 to $8 a cwt. for dairies.

The Trade Bulletin's cable of July 8th quotes bacon as follows: "Prices have advanced 4s, but at the higher range the market is quiet. Canadian bacon 64s to 69s."

PETERBORO HOG MARKET

Peterboro, Monday, July 12th. — Deliveries of hogs last week were very light. This has tended to make the market fairly strong and to hold the price up. The delivery of Danish hogs on the English market last week was also light, only 29,000 being put on the market. The Geo. Matthews Co. quote the following prices: f.o.b. country points, $7.85 a cwt; weighed off cars, $8.15; delivered at abattoir, $7.85 a cwt.

MONTREAL HOG MARKET

Montreal, July 10th. — Supplies of live hogs on the market this week were small, and in the face of a good demand the prices ruled steady at $8.50 a cwt for selected lots weighed off cars.

Quotations on dressed hogs were reduced this week, and at the lower range there is a good demand from all sources. Fresh killed abattoir stock is now quoted at $12 a cwt.

EXPORT BUTTER AND CHEESE

Montreal, Saturday, July 10th. — The market for cheese has been steady this week, with prices in the country ranging from 11⅝c to 11⅞c, all the boards with but one exception selling at these prices. The exception was Picton, where the colored cheese sold at 11 9-16c. The cheese offered in the country this week represent the last of the June make, and as the demand for this make has kept prices well maintained throughout the past few weeks it remains to be seen whether the British trade will be prepared to pay as full prices for the July make. There is a feeling that lower prices will prevail on the July stock up Julys at anything like present prices. At London to-day, where the cheese offered consisted almost entirely of the first few days of July, the best price obtainable was 11½c, and unless the demand keeps up at something like its present volume, we are not likely to see prices ruling much higher in the east this week.

The demand during the past week has been good, but it has bene at prices which have not shown much profit on the purchases of the previous week, and an unsatisfactory week's trading is the net result. The shipments, however, have been heavy, the total amounting to over 90,000 boxes, which represents a good average turn-over for the week. The total, however, does not equal the receipts into the city during the past few days, the figures for the week amounting to 112,484 boxes, as compared with 82,132 boxes for the corresponding week last year. This more than makes up for the shortage noted last week, and for the first time this season indicates an increase in the quantity of cheese being made as compared with last year. There is not a bit of doubt but that these heavy receipts will have a dampening effect upon the trade here and in Great Britain, and easy markets will be the rule next week with lower prices prevailing on this market, and at the country boards. There will not be very much of a decline, however, as there is too strong a speculative element in the trade to allow of a great break in prices, but the average price of July cheese will not be anything like as high as the average price paid for the June make, which figures pretty close to 11½c at the factories. On this basis, and allowing for a total production of about 500,000 boxes of cheese for the month of June, which is not far from the actual figures, this would mean a net return to the farmers of $4,500,000 from the cheese factories, which is certainly worth while, and not far from a record for this industry.

The price of butter is lower this week-end, owing to the lack of demand for export and the heavy receipts which cannot be absorbed by the local trade especially in the absence of any speculative demand. Cable advices from the other side indicate an improved market there, with higher prices current, and this has stimulated the market for Canadian butter to some extent. It has not resulted in much business, however, the total shipments for this week amounting to 326 boxes only, as compared with 3300 boxes for the corresponding week last year. Our prices must come down a little lower to be on a level with the prices current in Britain. The Eastern Townships markets were lower on Saturday, the highest price paid being 23c, which was obtained at Cowansville. At St. Hyacinthe and at Huntingdon, the highest price obtainable was 21¾c.

DAIRY FEATURES AT EDMONTON

The three leading dairy breeds were well represented at the Edmonton Fair. Jerseys made a strong exhibit, 24 head, shown by R. H. Bull & Son of Brampton, securing the greater number of the prizes. Messrs. Bull & Son intend to leave this consignment in the west, a number of them having been already disposed of. A number of good Jerseys, many of them animals of good quality and high records, were exhibited by R. W. Watson of Edmonton. Holsteins were exhibited by W. L. Roi Ferguson, W. H. Mullins of Ponoka, and J. Toane of Edmonton. Mr. Ferguson showed six head, securing three firsts, two seconds and the gold medal.

Competition was keen in the Ayrshire classes. Most of the winners were selected from the herds of A. H. Trimble and J. J. Richards of Red Deer. Mr. Trimble exhibited 24 head, securing six firsts and the gold medal for his herd. J. A. Davis of Clover Bar, was the other exhibitor.

GOSSIP

In the account published last week of the Willowdale Stock Farm, owned by Mr. J. M. M. Parker, who lives near Lennoxville, Que., our correspondent omitted to say that Pittsburg electric wire fences had been erected as well as the well known Page fences.

A FINE HOLSTEIN HERD

Although not long in the business, Mr. J. H. Caldwell, of Fallowfield, has succeded in developing an unusually fine herd of Holstein cattle. Mr. Caldwell obtained his foundation stock from the noted Tilson herd of Tillsonburg. The herd bull is Woodland Victor De Kol, twice winner at the Ottawa Exhibition. This bull has left some nice stock. A splendid young bull is shortly to head the herd. It is Francis 3rd Calamity De Kol, calved Dec. 22, 1907. This bull is out of the cow that won the dairy test at the Ottawa winter fair, both as a three year old and as a four year old, and which is in the record of merit.

Mr. Caldwell reports that sales of Holsteins have been so brisk, that he is about sold out. He has two promising bull calves sired by Woodland Victor De Kol that may be obtained on reasonable terms and which should prove an acquisition to almost any herd of dairy cattle. One of these calves is out of Flora, of Appleton, which in one milking recently, while a representative of Farm and Dairy was at Mr. Caldwell's place, gave slightly over 27 lbs. of milk. Among a number of splendid cows in this herd is Hasketon Belle, which has creditable standing in the record of merit.

Special Offer

With all orders received during the month of July, 1909, for our stencilling outfit, complete with all necessaries for immediate use, we will give a recipe for making the "ACME" ink, guaranteed the cheapest and best ink made for the purpose.

The ink we supply is sufficient to brand factory name and weight on 10,000 boxes at least. We guarantee our goods to give satisfaction or money refunded. Instructions given how to do stencilling properly.

ALL FOR $1.00.
