ODDS AND ENDS.

Medical piracy—stealing a watch.

A delicious baby—eaten raw.

Sweetness and light—a love match.

Fruit for ballocists—cocoanuts in the air.

When is an egg not evil? When you turn it round.

Odd sounds—hissing off an old hen as a young chanticleer crows.

The alligator that allows a crocodile to pass.

The plants admired and spoken and page will soon join the invisible host.

If a man wants to know the secrets, the best thing to do is to tell them to his wife.

A man may be a good husband without being a good husband.

A schoolmaster may be abroad without being a good teacher.

What, is one to be left in the switch.

It has been lost in the shade every civilized country, that the tree has been the most fruit of any in the axle-tree.

Eugene.—"Come, all down on the shelly shore, and hear the mighty ocean roar." Amelia.—"I can't sit down, you silly goose, because I'd burst my pink bonnet."

The London *Free Press* says that Joshua was the first man who ever stopped a horse in full career. He was a horse-shoeing smith, we suppose, but we believe the news about Crooks did not suit him.

"Spelling isn't my profession; one man can't do everything. What's a printer for? If a printer can't spell, he'd better quit his business, it is the line of argument adopted by Joaquin Miller whenever cold, unfeeling critic ridicules his orthography.

A western editor, thinking to stock his depleted larder, advertised, 'Poetry taken in exchange for advertising." The villainous compositor, seeing his opportunity to pay up a long grudge, set it up, "Poetry taken in exchange for a advertising." and since that time the office boy has been clearing fifty cents a day from the waste paper basket.

A lady, who had on her upper lip something approaching a mustache lately called on an officer and his wife, whose merry little boy happened to be present at the time. In the course of conversation the little fellow inquired what he must do to get hair on his lip. "Why, rub it against papa's," was the reply. "Oh, mamma," he said, "is that the way Miss ——has got her's?

MOODY'S MANNER.—The sermon that follows is simply the story of the closing scenes in the Saviour's life, beginning with the gathering of the little company of thirteen at the last supper. It is told in the photographic way of one who has studied it so intently that the whole scene stands out in clear detail and intensely real before him. And he makes it seem very real and present to his audience. There are Moodyism touches to the picture, here and there, that are very characteristic and effective. "Judas made great professions. He got near enough to the Son of God to kiss Him. But he went to damnation." His voice seemed to have been overstrained, and is not as pleasant as even it used to be. His words tumble over each other often in the haste of his utterance. He has a surprising faculty for such grammatical mistakes and illiteracies as "Them Jews," "The Spirit done it," "Taint no use," "Old night-cap," "He come to Him," etc. But these minor blemishes sink out of notice in the tremendous earnestness with which he speaks. This is the pre-eminent characteristic of the discourse. The noiseless, rapt attention of the vast congregation is wonderful. Hundreds are in tears. In the very midst of the discourse and the height of its interest two or three quickly succeeding shrieks came from the centre of the audience. Mr. Moody stopped as if he were a signal shot from Satan's line, and with Sheridan-like promptness said, "We'll stand up and sing "Rock of ages, cleft for me," and "the ushers will please help that friend out of the hall. She's hysterical." There were no more "hysterical" demonstrations during the evening, and the congregation scarcely realized that there had been any interruption in the service.—*London Cor. Christian Union.*

Transposition—now, won, own.
Charades—1. Necklace, 2 April.
Puzzle—One, none.

Arithmetical Puzzle.—By reducing square miles of area to feet we have 295,662,400,000 square feet as the area of Lake Huron, and the answer, 3 ft., 4 in. and 43355-73016 part of an inch. It would take 30,090,000,000,000 buckets full to empty the lake.

TO CORRESPONDENTS.

D. McG. sends correct answer to transposition.

WHERE DOES IT ALL COME FROM?—Pints and quarts of filthy Catarrhal discharges. Where does it all come from? The mucous membrane which lines the chambers of the nose, and its little glands, are diseased, so that they draw from the blood its liquid, and exposure to the air changes it into corruption. This life-liquid is needed to build up the system, but it is extracted, and the system is weakened by the loss. To cure, gain flesh and strength by using Dr. Pierce's Golden Medical Discovery, which also acts directly upon these glands, correcting them, and apply Dr. Sage's Catarrh Remedy with Dr. Pierce's Nasal Douche, the only method of reaching the upper cavities, where the discharge accumulates and comes from. The instrument and both medicines sold by druggists and dealers in medicines.

POOR HORSES.—There are thousands of poor horses dragging out a miserable existence, suffering from a variety of diseases, rendering them almost worthless, that would be restored to a healthy and sound condition, and a value given to them of which their owners never dreamed, would they but use the means within their reach. From one to three packages of "Darley's Condition Powders and Arabian Heave Remedy," will in all cases produce a satisfactory result. Hundreds have testified to the fact. Remember the name, and see that the signature of Hurd & Co. is on each package. Northrop & Lyman, Toronto, Ont., proprietors for Canada. Sold by all medicine dealers.

Special Notices.

INFLAMMATION OF THE LUNGS.—Clayton, N. Y., February 27th, 1872. Mr. James I. Fellows. My daughter had been ill with inflammation of the lungs, and taken large quantities of blood and purulent matter, attended with every symptom of consumption. After obtaining the attendance of two eminent physicians, who afforded no relief, she was persuaded to try Fellows' Hypophosphites. Upon taking two bottles we had every reason to believe she was improving. Her physical strength soon fell her improvement so rapid, and advised her to continue its use, which she did until her complete recovery. Two years have elapsed, during which time she has neither taken any medicine nor required any medical attendance, and urge all who are afflicted with any lung or chest trouble to use the Hypo. without fail.

My wife, also having been in bad health for some time, and having had a severe attack in December last, which left her much prostrated, was advised by the physicians to use this remedy to build her up. Before taking half a bottle she found herself much benefitted, and still continues to use it.

I believe, under God Providence, Fellows' Compound Syrup of Hypophosphites has been the means of restoring both my wife and daughter, and I hope the afflicted will avail themselves of its use, for although it is widely used, I think its value is not appreciated.

Yours truly, JOSEPH A. EVANS.

USEFUL INFORMATION.—It is said that olive oil administered internally is an excellent remedy for the gout, and is also beneficial in paralysis, and epilepsy; it has been used in the cure of rheumatism, neuralgia, colds and colic, and the removal of pain generally, there is nothing like the "Canadian Pain Destroyer;" it is the most reliable remedy. For sale by Druggists and the country dealers. Price 25 cents per bottle.

What They Say of It.

Notices from the People.

[illegible] are numerous of medicines which have won for themselves a high place in the world's estimation, but by a careful application of the best properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack whenever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*

Local Agents Wanted.

An Agent wanted for each Town and County in the United States.

Parties desiring to act as agents, must accompany their application by a letter of recommendation as to character and responsibility, from and signed by the Editor of a newspaper published in the town or county for which agent proposes to act. The agency is to sell the bonds of the *Industrial Exhibition Co.*

Whole Bonds	$20 each.
Half "	10 "
Quarter "	5 "

The Industrial Exhibition Company will furnish agents with Circulars, etc., etc.

A Keen newspaper published in the town where agent is located, will be sent as soon as agency is established, to keep the agent posted on the progress of the work and the Company, and fully explaining the plans, purposes and objects of the Company. Such advertisement will continue in such papers, as long as agency in success will connected.

The Industrial Exhibition Company is the first to adopt this plan as being in use by the European governments, of issuing bonds when the principal is made secure and not risked, but where there is a chance for a large premium, an investment of $20 is sure to return to the investor $21—one dollar more than cost—and the holder of a $20 Bond may obtain a premium, either of $50, $100, $200, $5 0, $1,000, $2,000, $5,000, $10,000, $25,000 or $100,000. The interest, which is ordinarily distributed to all the bond-holders pro rata, is in this loan distributed by chance. The purchaser of a bond knows he will receive back his investment, with a small rate of interest added, and in consideration of taking this small rate of interest, he has a chance in the above named premiums, which are simply the distribution of interest on the whole loan.

Each bond participates in four drawings each year until it has drawn a premium, when it is surrendered, the premium paid, and the bond canceled.

The Industrial Exhibition Company, under a special charter, granted by the State of New York, is given authority to issue these bonds. The Legislature of the State, recognizing the great benefits which will arise from the success of this enterprise, have exempted all the real estate and property of the Company from taxation and assessments for five years, and has also conferred other great privileges.

Every American who understands the purposes of this Company will, of a necessity, feel a pride in aiding it to a successful termination.

Each individual who buys a bond becomes an owner and an interested party, and when he views the structure erected with his money, can say, "I aided to erect in our country, the most magnificent building the world has ever seen a palace which, in truth represents the Industry, energy and mechanical genius of the American people."

The manufacturers and the inventors of America have been invited to the support of this great enterprise, for the reason that it is to be their home, where all their inventions and manufactures can be exhibited and sold.

The building will contain 5,320,000 square feet space.

Purchasers desiring Bonds before an agency is established where they reside, will communicate direct with this office, from where they can be supplied.

Parties desiring to act as agents, or to purchase bonds will address,

Design,

To prepare Young Men and others as Book Keepers, Bank, Railway, and Steamboat Clerks, Telegraph Operators, and for General Business.

Acknowledged

by Business Men to be a thoroughly practical business school. A large number of its graduates and members are occupying responsible positions in Canada and the United States, on their own as well as on others' accounts, and by the satisfactory manner in which they discharge their duties plainly evince the great benefit to be derived by pursuing a systematic course of instruction in accounts and business practice, under the supervision of a practical accountant and a man of business experience, before entering into mercantile life; and to which all, both Principals and employees, give their unqualified assent and endorsement.
