W. I. WHITING, 24 South Wharf.
july30

WE request the Ladies to call at No. 11, North Side King's Square, St. John, and judge from personal examination whether it is any exaggeration to say that

RAYMOND'S SEWING MACHINES

are the simplest, most durable, least liable to get out of order, and most easily worked of any; and that his

FAMILY SINGER

will do a greater variety of work than any other Machine. The universal adaptation, unequaled beauty and simplicity, perfection of material and style of finish, recommend his several varieties of

SEWING MACHINES

as the best, while their low price places them within the reach of all.
Machines rented and sold by instalments. Stitching, hemming, frilling, and tucking, done with neatness and despatch.
F. W. WATSON, Agent, St. John.
DEPOT—11 King Square.

At J. & A. McMILLAN'S.

"A delightful book of travel; a second "Eothen."

Sailing on the Nile.

BY LAURENT LAPORTE.

Translated from the French by Miss Virginia Vaughan.....16 mo. Price $1.50.

"Why is it that French travellers so universally excel English tourists, not only in selecting the salient points of a country or a population for description, but in pith and vigor of style? The present octodecimo volume would have been swelled into a couple of octavos, if an Englishman had undertaken the task of describing a voyage 'On the Nile,' which is so full of matter as M. Laporte's. The book is as attractive as it is instructive."—*The Globe.*

At J. & A. McMILLAN'S,

THE Northern Pacific Railroad,

AND THE

Company's First Mortgage Land Grant Sinking Fund 7-30 Gold Bonds.

JAY COOKE & CO.,

PHILADELPHIA,

Fiscal Agents for the Company.

THE Road, commencing at the head of Lake Superior, is to run to the Pacific coast, where it will have two termini,—one at Portland, Oregon, the other at Puget Sound, in Washington Territory.

The first 100 miles, along the line, west from the Lake to the Mississippi, is a Lumber and Mineral district, with abundant Water Power.

The next 350 miles, to the Missouri River crossing the Red River Valley and Eastern Dakota, is a well watered Prairie country; for nearly the entire distance the soil is very superior, equal to the best in any land. (On this section track-laying is proceeding at the rate of three miles per day.) In October, the road will be opened for traffic to the Missouri River, where it will connect with steamers running 1,000 miles further west, to Fort Benton. As many as 33 steamers have been employed in a single season to accommodate the trade of these upper waters. Commencing about where the line crosses, Lignite coal has been traced, in beds from 2 to 7 feet thick, for 600 miles up the Missouri. The *mauvais terre* or "bad lands," so called, through which some of the exploratory lines were traced, *are not found on the line finally adopted.* Trains have been running regularly for six months to Red River; they there connect with steamers running north to Manitoba. A branch road, now building along Red River Valley, will also connect the trunk line with Manitoba. 30,000 emigrants are said to have settled on the Company's land in this valley last season.

Exclusive of the 517 miles of *trunk line,* nearly completed, 936 miles are being finally located and prepared for contract: this includes 226 miles extending from the Missouri along the valleys of the Heart River and Guildives Creek to the crossing of the Yellowstone, in Eastern Montana; much of this section is prairie, similar to that east of the Missouri: the remainder is adapted for grazing. Coal outcrops over a large part of this district—a bed 14 feet thick said to be of excellent quality, is exposed on the Little Missouri.

The Yellowstone Valley is 400 miles long by 150 wide; the road will run nearly the whole length, and is now being located along it. Many reliable authorities concur in representing this valley as one of unsurpassed fertility: here, as well as east and west of this section, cattle graze the year round *without housing.* Coal beds, similar to those, of the Missouri, are found all along the Yellowstone and on some of its tributaries. Gold has been discovered in this valley in several localities, in paying quantities.

The Rocky Mountain section, about 300 miles long, crossing Western Montana and Northern Idaho, is a Mineral and Agricultural region; the numerous extensive valleys of this locality are exceedingly fertile, equaling any part of the Continent in the quantity and quality of their agricultural productions. In the yield of Gold Montana now is second only to California. Montana last year paid for freight about $4,000,000; the Government transportation for the Forts of the Upper Missouri amounted to nearly as much—making a total of $8,000,000.

Along eastern and central Washington section, say 200 miles, the land is Grazing, Agricultural and Mineral; here thousands of horses cattle and sheep can be raised as cheaply as in any part of the Globe. Another portion of the road, about to be contracted for, is located here; and will run from the mouth of the Snake river to Lake Pen d'Oreille.

In Western Washington the soil is prolific, Lumber yielding *ten times* per acre that of New Brunswick land is everywhere to be found, and excellent coal, some beds from 20 to 30 feet thick extend all over this half of the Territory. Lumber is shipped from here to San Francisco, South America, Sandwich Islands, Europe, China and Japan; the Coal finds a ready market in San Francisco; it is used in the Asia steamships and for other purposes.

Puget Sound, with its 1500 miles of coast line and bold shores, has no equal as a harbor in the world, except in the British possession to its north.

The newspaper items about Indians, and damage from them to the road, are attributed by the Company to frontier speculators, who wish to see Government money spent in their vicinity and to their advantage. There is no opposition from the Indians on any part of the route.

Comparison with other Roads.—The greatest elevation in crossing the Rocky Mountains on the Union and Central is 8235 feet, on the Northern (lat. 46) 4970. On the Dominion (lat. 52) 3760. From the Pacific to Lake Michigan by the Union and Central, is 2105 miles; by the Northern (latest official report) to Lake Superior 1720 and Montreal by proposed Eastern Extension 2590; by the Dominion to Lake Superior 1590 and to Montreal 2730. The latitude of the western terminus of the Northern and Dominion Roads give them to the ports in Asia an advantage over the Union and Central of 800 miles.

I am authorized to sell North Pacific 7-30's at par and accrued interest in United States currency; at which rate they will yield the Provincial investor over 8 per cent. The bonds and interest are both payable in Gold, and are free from United States tax. The Company's enormous land grant of nearly 23,000 acres per mile of road, which with the track, &c., is bound by the loan, should render these bonds one of the safest of investments, sure to rise much above par in market value on the completion of the road, and the closing of the loan. The process of redeeming and cancelling the bonds has already begun, as these securities are now being received in payment for the Company's Lands.

Official returns show that 26 leading Land Grant Railways in the United States have sold their lands at an average of $7.04 per acre. Should the Northern Pacific Company realize the low estimate of only $4 per acre, the proceeds of their grant would more than twice pay the cost of building and equipping their road.

A pamphlet with maps prepared and issued by the subscriber, fully descriptive of the Road Bonds, Land &c., can be had on application.

Watchmaking in Switzerland.

[From the Swiss Times of May 30th.]

WE have already drawn attention to the annual meeting of the Society of Arts held on the 23rd current, under the presidentship of M. Th. de Saussure, and are now able to furnish some further details.

Professor Soret, in delivering a most interesting report, passed in review the operations of the Industrial section, in reference to Commerce, laying great stress upon the competition that has taken place in the manufacture of chronometers. This competition was instituted with the object of testing the workmanship and precision of chronometers turned out by Geneva manufacturers, and none but those adopted for pocket use were admitted. They were deposited in charge of the authorities at the Observatory, and underwent the most searching ordeal possible to be applied to pocket instruments of this class. The jury specially retained to decide the difficult question as to whom to award the palm of excellency unanimously decided in favor of Messrs. J. M. Badollet & Co. This firm having carried off the sole prize by exhibiting a chronometer which fulfilled in the highest degree every condition required, crowned their first success by gaining honorable mention for two other chronometers. The allusion to this triple honor was received with enthusiastic applause, and Professor Humbert, President of the Fine Arts Section, closed the meeting with a happy and humorous dissertation upon subjects connected with this department.

An assortment of

Gold and Silver Watches,

of different grades, from the eminent manufacturers above referred to, always kept in stock by
