ADJUSTABLE HOLLOW AUGERS

Cuts from one-quarter to 1 1-2 inches, and is operated by setting the slide on the top to the desired size, and centered by changing the scale on the side to correspond with that on the top. The length of the tenon is regulated by the sliding gauge on the side of the frame.

We claim the following points of superiority for this tool: it is made of better material, cuts a longer and larger tenon, needs no screwdriver in adjusting, and there is no changing of position of the knife in cutting different sizes. Each tool tested.

No. H—Size 8 3-8 x 4 1-2 x 4 3-8 inches....Each $6.00

STANDARD HOLLOW AUGERS

This represents our Standard Hollow Auger, ready for use. The plates are separate from the frame, and all are interchangeable; they are attached to the frame by means of a lug on one side and a thumb-screw on the other, making them perfectly rigid when in position.

One frame and four plates to cut 1-2, 5-8, 3-4 and 7-8 inch tenons constitute a set.

They've studied up the f Ebenezer Bings
And proved that his descen from dukes and earls
He has a brand new coat-of- some and so gay,
A mixture of menagerie an crochet.
They only mention relative with courage fine
Or rose to great distinction lectual line,
But if they'd searched enoug fact they'd run across
That somewhere in that fam body stole a hoss.

Them fam'ly trees don't allu as they keep hid,
It wouldn't be a thing 'gain they did.
He's generous an' he's kind his honest debts.
He doesn't drink, nor chew not even cigarettes.
But then it takes all kinds o' a world, you see.
There's a mighty wide assort every family tree.
Let's just admire the gilding mings an' the floss
An' be content to overlook stole a hoss.
