Agricultural.

Propagate Your Own Roses.

I know of no surer way for the amateur to propagate roses of all kinds that will root from cuttings than the following: Make a box like a hot-bed frame with one side six or eight inches higher than the other and without top or bottom, and make a sash frame of the same size as the top of your box. On this sash frame tack cotton cloth. The situation for your box should be on the south side of a building or tight board fence. Level the soil and place the box two or three feet from the building or fence with the highest side to the north. The box should be 10 to 12 inches high on the lowest side. Five or six inches of rather coarse sand should be spread evenly over the soil within the box and drenched with water from a rose sprinkler, when it is ready for the cuttings. The best time to make cuttings is in July and August. None but strong, healthy wood should be used, and this should be sufficiently ripe for the purpose. Wood that has bloom buds is right for cuttings when the buds are are about two-thirds grown. Other wood that has no bloom buds is just as good, and is ripe enough as soon as the terminal bud is formed.

Make the cuttings of two joints or three if the joints are short. Cut off all the leaves except the one at the top, and break off the thorns. Thrust a table knife two or three inches deep into the sand in your box, and draw it along to make an opening for your cuttings, which should be about an inch apart, leaving only the leaf with its bud above the sand. The next row of cuttings should be so far from the first that the leaves will not overlay to make them turn yellow and die. When the cuttings are all in, water them well with a sprinkler and put on the north side for air. Give the cuttings a light sprinkling every morning and noon, but not at night, lest you have mildew. In about six weeks they will have made roots and will begin to grow. By the time they have made two or three inches' growth, lift the cloth sash higher, or on cloudy days take it off, and if the sun does not shine for two or three days the plants will harden off enough so the leaves will not burn when the sun shines. Give them a little liquid manure once a week. If the ground under the sand be rich they will not need this. Let them grow here all the season and winter them where they are, but give them some protection of evergreen boughs or leaves. In the spring transplant them where you wish them to grow.—*J. I. Macomber, Grand Isle county, Vt.*

Oats for Swine.

I have fed oats to hogs with good results. I find they are an excellent food for making bone and muscle and a good growth. I prefer feeding them ground and mixed with mill feed, one-third oats and two-thirds shipstuff mixed with sufficient water to make a thick slop. This gives plenty of fattening material, but should a person want to get his hogs very fat he should feed some corn also. I think a mixture of oats and shipstuff more healthful than corn for hogs, as it is not so heating. Corn is more liable to make hogs diseased than any other food, and, as a general thing, their lives are much shorter when they are fed so much corn and no other food mixed with it. Oats can also be fed without grinding by putting them in a tub or barrel and soaking them for twenty-four hours before feeding. Oil cake is an excellent food for hogs mixed in their slop—about a quarter of a pint to each hog once a day or once every other day. It puts their hair in fine condition, making it smooth and glossy, and also keeps their bowels in fine order. Hogs should be greased every two weeks with coal oil mixed with a small part of grease to kill the lice, as these pests are very liable to make them diseased if not killed, and a hog cannot thrive when very lousy.—*Western Swineherd.*

The Chick Must Grind.

The chick cannot too soon be supplied with food that will require the grinding powers of the gizard to be properly brought into action, says a recent English writer. Soft food will not do this, consequently more or less dry food must be supplied. In the gizard, with the aid of some grit, the woody fiber enveloping the more nutritious parts of seed and grain is ground into atoms also the nutritious parts are thus prepared for digestion and assimilation. Some gritty substance is absolutely essential, for, without it, the gizard cannot properly perform its work. Even baby chicks should be fed upon a sanded floor. The gritty matter should be as hard and sharp as possible, so that it will grind up bones and such like substances. When chicks are young, broken wheat, coarse oatmeal, canary seed and hemp seed are each very suitable. They should not have much, if any, Indian corn, as it makes them too fat, and thus renders them liable to a variety of ailments. For stock purposes a fat fowl is worse than useless, for its progeny is almost certain to be weak.

Hens are Great Foragers.

How many farmers know the quantity of food a hen eats in a year, and, we may also ask, how many eggs the hens laid, or which of the hens laid the greatest number? The hens get to all places on the farm, and find large proportions of their food of which the farmer knows nothing, and which never would be recovered from the waste of the farm but for the aid of the hens, which convert into eggs that which could not be sold at all. It is in this respect that the hens make themselves profitable, for they perform the labor of feeding themselves, and thus are exceptions to other classes of stock. The farmers receives eggs from food sources unknown to him, and he cannot estimate the cost of the product even if he so desired. He secures and markets the eggs and so far as from whence they came or from what material they were produced he knows but little.—*American Dairyman.*

—Nearly every farm has one or more acres not worth cultivating or fencing, which might easily be turned to forest growth. It is especially desirable to clothe the high hilltops with trees, not only as a protection against winds, but for the effect it would have in preventing the hillsides becoming parched by drouth. Trees on the top of a hill serve to hold the moisture in the ground, and keep the whole hill more moist. The more generally the hill tops are covered with forest, the less bleak will be the country; and less violent the winds sweeping unresisted over the country. Every forest patch is a wind-break, and the more of these the less will the inhabitants be annoyed by cold and high winds.

—This year's production of wheat in India is reported to be in excess of all precedent. Storage accommodation at Bombay and Calcutta is said to be utterly inadequate for the thousands of tons sent to these ports for shipment to Europe. India's mammoth crop will render Great Britain in the matter of wheat largely independent of America and Russia.

Miscellaneous.

An Incentive to a Purer Life.

The dead know all that we must endure; all the suffering and conflict; all our loniliness and desolation. They are familiar with our every mood, and all our inward life, and can enter into our hearts as the living cannot do. They have the largest sympathy for us.

Every man that has this hope in him purifies himself, even as they are pure. It prompts a desire for their approbation. We can remain worthy of their esteem only as we practice their good qualities. So cherishing the thought that they are with us, we cannot harbor the principles and habits that they would turn away from with disapproval and loathing.

For, remember this, the dead see us as we are. There is no masquerading there. There is no need of pretending. No need of any outward expression. As we are so the dead know us. Whether the living may honor or disapprove our conduct, with the dead and with God we are only what we are. God knows, and they know, our actual value, and we are to so live as to keep their esteem.

Let us then give up all these sources of alienation and disappointment on their part. Let us not break fellowship with them, whatever we may do with the living.

"If ye love me, keep my commandments."

Is there any who having a father numbered among the dead is unfilial? Is there a son who has a mother in Heaven? Had she been spared he would have held her sacred and shielded her from sorrow. Full as her joy is, it is not perfect while you remain out of the circle of her communion.

THE WORK OF LIFE REMAINS FOR US.

If their sympathy is worth so much to us, we ought in turn to be able to give them of our sympathy and our fidelity. If we are bound slaves to our pleasures and passions; if we deafen our ears to the cries of all that is holy; however we may deceive the world; however blind others may be to our actions; however skilful we may be by our custom and voice and gesture and walk, they know and they understand.

And if we love them we will keep their commandments. By renewing our lives we can make happier those whom God has made happy and satisfy the only longing of their souls.

What momentous interest can our earthly life present compared with this?

So let us do only that which shall gladden their faces.

It is very easy to think of their forgiveness when we go astray.

Forgiveness! Sometimes I think it is the most cursed, the most miserable, the most contemptible feature of humanity, to do a wrong thing because one has such confidence in the love of another that he knows he or she will forgive you. It is simply damnable to do such a thing as that. Yet the whole religious world is in that great contempt.

DOING THINGS WE KNOW GOD HAS COMMANDED US NOT TO DO,

living lives our beloved have no heart in, and even continuing thus until the eleventh hour, believing we can then turn from the evil way and be forgiven.

This is the eleventh hour! This day is the eleventh day! This is the very last day of your soul!

We ought not to impose on the forgiving spirit of our Father. We ought not to count on the forgiving disposition of those who love us. It is miserable, it is simply damnable, to count and reckon thus—I will do this, and my mother will pass it by; my father, good man, will forgive me; my wife loves me so she will pass this by; Christ, the lover of our souls, will forgive; the blessed in heaven, they will overlook it.

It may be cunning, it may be ecclesiastical and priestly, but it is damnable all the same same. It appeals to the very lowest and worst we have.

Becaused they loved us, and we are one with them our souls in them and their souls in ours,

WE OUGHT TO ACT AS IN THEIR PRESENCE,

according to their commands and wishes, with the spirit which we propose to act on by and by.

Everybody proposes to do good by and by. Everybody proposes to obey the commands of the departed by and by. To keep in line with the dearest desires of their beloved. We all count on doing this by and by. We ought to count on doing it now and here in all we do.

This only is the way to keep the commandments of the dead, not in monumental marble, not in chiseled stone, but in our daily life, in our constant thought. So shall they be our inspiration, and the deeds we do worthy of their love shall be as blessings, and every day lead us forward in a grand company.—*Extracts from Sermon.*

Behring Sea Modus Vivendi.

The following is the text of the agreement recently come to between Great Britain and the United States in regard to seal fishing in Alaska. The president has issued a proclamation calling for its observance.

Agreement between the government of the United States and the government of her Britannic majesty for a *modus vivendi* in relation to the fur seal fisheries in Behring sea.

"For the purpose of avoiding irritating differences and with a view to promote the friendly settlement of the questions pending between the two governments touching their respective rights in Behring sea, and for the preservation of the seal species, the following agreement is made, without prejudice to the rights or claims of either party:

'1. Her majesty's goverment will prohibit, until May next seal killing in that part of Behring sea lying eastward of the line of demarcation described in article No. 1 of the treaty of 1867 between the United States and Russia, and will promptly use its best efforts to insure the observance of this prohibition by British subjects and vessels.

'2. The United States government will prohibit seal killing for the same period in the same part of Behring Sea and on the shores and islands thereof, the property of the United States, (in excess of 7,590 to be taken on the islands for the subsistence and care of the natives,) and will promptly use its best efforts to insure the observance of this prohibition by United States citizens and vessels.

'3. Every vessel or person offending against this prohibition in the said waters of Behring sea, outside of the ordinary territorial limits of the United States, may be seized and detained by the naval or other duly commissioned officers of either of the high contracting parties, but they shall be handed over as soon as practicable to the authorities of the nation to which they respectively belong, who shall alone have jurisdiction to try the offense and impose the penalties for the same. The witnesses and proofs necessary to establish the offense shall also be sent with them.

'4. In order to facilitate such proper inquiries as her majesty's government may desire to make, with a view to the presentation of the case of that government before arbitrators, and in expectation that an agreement for arbitration may be arrived at, it is agreed that suitable persons designated by Great Britain will be permitted at any time upon application to visit or to remain upon the seal islands during the present sealing season for that purpose.

'Signed and sealed in duplicate at Washington, this 15th day of June, 1891, on behalf of their respective governments, by William F. Wharton, acting secretary of state of the United States, and Sir Julian Pauncefote, G. C. M. C., K. C. B., H. B. M., envoy extraordinary and minister plenipotentiary.

'WILLIAM F. WHARTON, [Seal].
'JULIAN PAUNCEFOTE, [Seal]."

—Why suffer the ills peculiar to females when Dr. Williams' Pink Pills will thoroughly eradicate every vestige of the trouble, and restore to your faded cheeks the bright, rosy glow of youth and health. Try them. Sold by all dealers, or by mail postage paid, on receipt of price (50c. a box). Address Dr. Williams Med. Co., Brockville, Ont. Sold by deBlois and Primrose.

—In an Arkansas village the other day lightning struck and killed a 2-year-old baby at play in the mother's arms. The mother was not hurt.

—Minard's Liniment cures Dandruff.

"They Say."

In dealing with rumors, the following rules may be of value:

1. Hold in suspense all rumors, especially evil ones, until traced to their origin, or proved by sufficient evidence.

2. Don't spread a rumor unless you know it to be true, and not then unless by so doing some good will be accomplished or at least no harm will be done. Some one has suggested that a rumor be put through three sieves: First, is it true? second, is it kind? and thirdly, will it do any good to tell it?

3. Spread good news far and wide, as you would the sunshine.

4. Always believe the best, and discount all evil reports. Don't be a pessimist or a croaker.

5. Don't run after rumors, and especially in times of excitement, or you may find time for little else.

6. Don't worry about personal rumors, the truth will be known in time, and character counts in the long run.—*Evangelist.*

AN ANTIDOTE FOR POISON.—If a person swallows any poison whatever, or has fallen into convulsions from having overloaded the stomach, an instantaneous remedy, most efficient, and applicable in a large number of cases, is a heaping teaspoonful of common salt and as much ground mustard, stirred rapidly in a teacupful of water, warm or cold, and swallowed instantly. It is scarce down before it begins to come up, bringing with it the remaining contents of the stomach; and lest there be any remnant of the poison, however small, let the white of an egg, or a teaspoonful of strong coffee be swallowed as soon as the stomach is quiet, because these very common articles nullify a large number of virulent poisons.

NEW RULES OF POLITENESS.—In certain private schools of Brooklyn new rules of politeness are enforced. It is no longer proper for the little pupils to say "Yes, sir," "No, sir," "Yes, ma'am," and "No, ma'am," to their elders. Now the correct thing is "Yes, Mr. Brown," "No, Miss Smith," and so on.

If the child happens to be addressed by a strange lady or gentleman the child is instructed to reply, "Yes, mister," or "Yes, lady."

At first this strikes the uninitiated as an unpleasant innovation, but it has obtained a strong hold on the children, and they are rapidly making their parents converts to the new system.—*Boston Herald.*

—A remarkable petition to the Queen of England is on its way home from India. It is upward of sixty feet in length, and is signed by more than two thousand women of India, who are anxious that the age at which a marriage may be legally entered upon shall be raised from its present limit of ten to fourteen years.

—There is one Maine paper that evidently has no notion of imparting a dose of nothing but the purest "taffy" for the contracting parties, every time it prints an account of a wedding. The Bar Harbor *Record*, in speaking of the marriage of a man of a well-known family of that place, cautiously states that: "The bridegroom is certainly young and knows little of the responsibilities of life." This is not uncomplimentary and perhaps it is better, after all, than the same space devoted to nothing but "gush."

—John L. Sullivan has decided to come to his country's rescue. No longer can he suffer the humiliation of seeing the colors of a foreign pugilist waved aloft on his native soil. He has authorized James Wakeley of New York and Charles Johnston of Brooklyn, two of his former backers, to match him against Frank Slavin, the Australian. The conditions he names call for 10 rounds, Queensberry rules, $10,000 a side in stakes, winner to take all, and the match to be contested before the Athletic Club which offers the largest purse.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria,

—Sir Morell Mackenzie has made some startling statements with regard to influenza. Sir Morrell believes the disease can be communicated by dead bodies. In support of this opinion he quotes a case from American newspapers in which a gentleman of that nationality having died with influenza in Paris, his body was embalmed and sent to Philadelphia where it was exposed to the view of the family, all of whom were immediately attacked by the disease.

Goldwin Smith.

Goldwin Smith is opposed to Sir Charles Tupper in many ways, but doubtless both would agree that no better remedy for dyspepsia, constipation, biliousness, headache, kidney troubles, skin diseases, etc., exists than Burdock Blood Bitters, the best family medicine known.

—Every tissue of the body, every nerve, bone and muscle is made stronger and more healthy by taking Hood's Sarsaparilla.

PARSONS' PILLS
Make New, Rich Blood!
These pills were a wonderful discovery. No others like them in the world. Will positively cure or relieve all manner of disease. The information around each box is worth ten times the cost of a box of pills! Find out about them, and you will always be thankful! ONE PILL A DOSE. They expel all impurities from the blood. Delicate women find great benefit from using them. Illustrated pamphlet free. Sold everywhere, or sent by mail for 25 cts. in stamps; five boxes $1.00. DR. L. S. JOHNSON & CO., 23 Custom House St., Boston, Mass.

Snug little fortunes have been made at work for us, by Anna Page, Austin, Texas, and Jno. Bonn, Toledo, Ohio. See cut. Others are doing as well. Why not you? Some earn over $500.00 a month. DR. WILLIAMS' PINK PILLS FOR PALE PEOPLE
ARE NOT a Purgative Medicine. They are a BLOOD BUILDER, TONIC and RECONSTRUCTOR, as they supply in a condensed form the substances actually needed to enrich the Blood, curing all diseases coming from POOR and WATERY BLOOD, or from VITIATED HUMORS in the BLOOD, and also invigorate and BUILD UP the BLOOD and SYSTEM, when broken down by overwork, mental worry, disease, excesses and indiscretions. They have a SPECIFIC ACTION on the SEXUAL SYSTEM of both men and women, restoring LOST VIGOR and correcting all IRREGULARITIES and SUPPRESSIONS.
EVERY MAN Who finds his mental faculties dull or failing, or his physical powers flagging, should take these PILLS. They will restore his lost energies, both physical and mental.
EVERY WOMAN should take them. They cure all suppressions and irregularities, which inevitably entail sickness when neglected.
YOUNG MEN should take these PILLS. They will cure the results of youthful bad habits, and strengthen the system.
YOUNG WOMEN should take them. These PILLS will make them regular.
For sale by all druggists, or will be sent upon receipt of price (50c. per box), by addressing
THE DR. WILLIAMS' MED. CO. Brockville, Ont.

THE THOROUGH-BRED STALLION
JAMES NORRIS,
Registered in the American Stud Book, will make the season at
W. E. MASTERS' STABLE,
WILMOT, ANNAPOLIS CO.
JAMES NORRIS, foaled July 1886, by Imported Rossifer, by Rosicrucian. Dam Imported Dry Toast, by Brown Bread, is a beautiful dark brown in color, stands 16 hands high and weighs 1,100 pounds, and will be limited to a few good mares this season.
Registered pedigree as per American Stud Book:
2nd dam Carolina, by Little Known.
3rd dam Georgia, by Jaques.
4th dam Florida, by Mulatto.
5th dam Florantho, by Amidas.
Dry Toast: b. m., foaled 1873, bred by W. H Phillips and imported in 1880 by Charles Reed Fairview Stud, Sumner Co., Tenn.
Produce of Dry Toast:
1884, br. c. Roccacio by imported Fechter
1885, b. c. Toronto by Duke.
1886, br. c. Jas. Norris by imp. Rossifer.
1887, b. f. ——— by imported Rossifer.
1888, b. c. ——— by imp. Mr. Pickwick.
1889, b. c. ——— by imported Rossifer.
JAMES NORRIS is unquestionably the best bred stallion in this country, and as the owner is anxious to do all he can toward the improvement in horse-breeding, he will limit JAMES NORRIS to 25 approved mares.
☞ Mares met at Wilmot and Middleton Stations, and carefully cared for at very moderate charges.
Terms of service $15.00, payable when mare proves in foal.
For further particulars, address,
W. E. MASTERS, Wilmot.
Or FRED L. SHAFFNER, Middleton. 1tf

Beginners are earning from $5 to $20 per week and upwards, and more after a little experience. We can furnish you the employment as above STATED. No space to explain here. Full information FREE. TRUE & CO., AUGUSTA, MAINE.

No STABLE should be without
Dr. J. WOODBURY'S HORSE LINIMENT
It is the only decidedly reliable remedy for all the affections of the Horses' Hoof. It is equally efficacious for the removal of
SPLINTS, CURBS, BOG SPAVINS,
and in all cases of Bruise or Strain of the Joints and Tendons, and Enlargements of any and every description. Given internally, it will promptly relieve and remove any and every character of
COUGH, ENLARGEMENT of the GLANDS, AFFECTIONS of the KIDNEYS, etc,
and in our prevailing Horse Distemper it is infallibly THE REMEDY.
A Cough which cannot be removed by this Liniment may be considered incurable.
As the proprietor of this Liniment is quite aware of the many worthless nostrums offered to the public at the present time, he would beg to say that all articles manufactured by him are strictly WARRANTED to effect that for which they are recommended, when used according to directions.
Use this preparation thoroughly for all and every disease of the horse for which it is recommended. Criticize it closely; carefully watch, mark, and note its effects, and, honestly judging it on its merits, you will be compelled to endorse the statement that NO STABLE SHOULD BE WITHOUT IT.
Price, 25 cents per bottle. Sold by all druggists.
F. L. Shaffner, Prop., Middleton, Annapolis Co., N.S.

VALUABLE REAL ESTATE For Sale

THE subscribers invite bids for the purchase of the following property, belonging to the estate of J. B. Reed & Sons, viz.:

THE FACTORY

so called. The building is 140 x 38 feet, three stories high, with a cellar under the same. This factory is equipped with all the newest and most improved machinery used in the manufacture of First-class Furniture, including a 35-horse power engine and boiler, two dry houses, steam elevator, etc., etc. The whole factory and the dry houses are heated with steam pipes, with water on each flat.

THE WAREHOUSE

46 x 28 feet, two stories high, with an Upholstering Shop attached, 30 x 24 feet, two stories high.

The Reed Homestead and the Double Dwelling-House

occupied by W. E. and S. S. Reed. All buildings are in thorough repair, spacious grounds, gardens, and the necessary barns and out-houses are attached to each dwelling.

For prices, terms, etc., apply to the subscribers at Bridgetown.

Through tickets by the various routes on sale at all stations.

W. R. CAMPBELL,
General Manager and Secretary.
K. SUTHERLAND,
Resident Manager.

'91 YARMOUTH S.S. CO. '91
(LIMITED.)

THE SHORTEST AND BEST ROUTE BETWEEN
Nova Scotia and United States.
THE QUICKEST TIME,
15 TO 17 HOURS BETWEEN YARMOUTH AND BOSTON.
STEEL STEAMERS
YARMOUTH
—AND—
BOSTON
(Until further notice,)
one of these steamers will leave Yarmouth for Boston every Tuesday, Wednesday, Friday and Saturday Evenings after arrival of the train of the Western Counties Railway. Returning, will leave Lewis' Wharf, Boston, at 11 a.m., every Monday, Tuesday, Thursday and Friday mornings, making close connections at Yarmouth with W. C. Ry. and Coach Lines for all parts of Nova Scotia.
These are the fastest steamers plying between Nova Scotia and the United States, and form the most pleasant route between above points, combining safety, comfort and speed.
Regular mail carried on both steamers. Tickets sold to all points in Canada, and to New York via Fall River Line, and New York and New England Railway.
For all other information apply to W. C., W. & A., and N. S. Central Railway agents, or to
L. E. BAKER,
Pres. and Managing Director.
W. A. CHASE,
Sect. and Treas.
Yarmouth, June 1st. 1891.
