WEDNESDAY, FEBRUARY 20TH, 1895.

—An effort is to be made during the present season to secure for the butter trade of Canada a better footing in the English market than it has hitherto had. Of late years our exportation of cheese to the mother country has grown to immense proportions. Where but a few years ago a small quantity of our cheese found its way to the English market this trade has of late years grown to such an extent that over half the cheese now imported into Great Britain comes from Canada, while only about two per cent. of the butter imported is Canadian. The cheese trade has been developed largely through the assistance rendered it by the government. For several years the government has taken the output of certain of the cheese factories, at a given price, and assumed all risk of shipping it to England and placing it upon the market, returning to the makers the profit, if any, remaining after the expenses were paid. This policy has had the effect of introducing our cheese into the markets of the old country to a much greater extent than private enterprise could have done, and of firmly establishing the reputation of the Canadian article there. As a result the exportation of cheese from this country to England has multiplied many fold.

While this has been done for the cheese trade of the Dominion, very little effort has thus far been made to capture the English market for our butter. In this item our exportations are a long distance behind even the far away Australian colonies. While Canada exported only about $400,000 worth of butter to Great Britain last year, Victoria, one of the Australian colonies, sent about $5,000,000 worth.

Recently the Minister of Agriculture announced the intention of the government of assisting the butter trade of the dominion as has been done with the cheese trade. With this object in view the government propose to take the output of certain creameries, during the winter months, paying the sum of twenty cents per pound in Montreal, and send it to England. As the object is to establish the reputation of the Canadian article in the English market and thus to develop the trade in that article, none but the best of creamery butter will be handled.

The idea is certainly a new one, and in certain quarters it is meeting with considerable ridicule. "Bowell and butter" is forming the text for many a fine piece of sarcasm in some of the political papers. But, if the attempt results in doing for the butter makers of the dominion what has already been done for the cheese makers, it is certainly worth the experiment.

—THE Roman Catholics of Manitoba, aided by their brethren of the other provinces, have lost no time in asking the dominion government for the remedial legislation which the Judicial Committee of the Privy Council has decided the dominion parliament has power to grant. On Saturday last a petition, large enough to completely fill a tin box two feet by four, and containing many thousands of names, was presented to the government setting forth the grievances of which the Roman Catholics of Manitoba complain, and asking for some remedy. The government has decided to give a formal hearing to representatives of both sides of the case on Tuesday, 26th inst., when formal argument can be made before the Governor-General in council. As the Manitoba government has emphatically declared that it will make no concessions to the Catholic minority, and submit to no interference with the school system of the province by the dominion authorities, it is probable than only the Catholic side will be represented at the hearing on Tuesday next.

After hearing the case it will be necessary for the government to decide upon its course. The dominion government still has time to disallow the Manitoba act of which Catholics complain, and this the more rabid of Catholic sympathizers are demanding. This course would also greatly please the French conservative members. But to disallow that act would create confusion worse confounded in the prairie province, taking from the educational system of the province its entire foundation, and leaving a condition of things such as would exist in this province if our school law were suddenly repealed. It is safe to say that this will not be done.

The French supporters of the government are almost unanimous in demanding a session of the house in order that the question may be disposed of before the electors have to be faced, while their English supporters would prefer to stave off a settlement until the election is over.

—THE United States Government has once more been compelled to borrow gold in order to maintain the national credit. This makes the third time this has had to be done since the present administration took office just two years ago. In all something over $160,000,000 have been borrowed, and interest bearing bonds to that extent issued, thus adding to the permanent debt of the nation this large amount, within so short a time. This is certainly a remarkable change from the condition of things a few years ago, when it was not unusual for the government to find itself with a surplus of about $100,000,000 a year on its hands, and its officials were chiefly concerned to decide what to do with it. President Cleveland and his treasury officials have not been troubled with surpluses. On the contrary their difficulty has been to get a sufficient quantity of gold to redeem the greenbacks, a liver certificates and treasury notes presented for redemption, and to give the business world the assurance that the nation was able to redeem all its obligations in gold.

The Valley Telephone Co., Ltd.

The annual meeing of the stockholders of this company took place in Morrison's Hall, on Tuesday, 13th inst., at 3.30 p.m.

The president, Hon. A. W. Savary being absent, Dr. J. A. Sponagle, vice-president, presided, and presented the Directors Report for 1894. This report shows that the company now own about three hundred miles of single line including the Trunk Line extending from Digby to Hantsport and the several branches or feeders extending to Torbrook, Port George, Margaretville, Canning, Kingsport, etc., and that 300 instruments are in place, ninety-eight of which were added during the year. Seventy miles of the line were constructed last year, and the Port Williams Company's line was purchased and added to the property of the company.

Owing to the cost involved in the additions referred to above, it was unanimously resolved to increase the capital stock of the company by $5,000, $4,000 of which is now available, to be offered to old subscribers only till the 23rd inst., after which the balance, if any, will be offered to the general public.

The new Board of Directors consists of the following gentlemen, viz.: Hon. A. W. Savary, J. A. Sponagle, Hector MacLean, W. H. Weatherspoon, S. W. W. Pickup, C. R. H. Starr, A. J. Morrison, A. B. Gates and A. E. Calkin. The last named gentleman is a new member of the Board, who was elected in place of R. G. E. Leckie, who having moved from the county intimated that he did not wish to be re-elected.

Adams officiating.

Willis McDuffee, L. F. Shorey and G. H. Gorham acted as ushers. Preceding the ceremony Mendelssohn wedding march was finely rendered by Mr. J. E. McDuffee, pianist.

Rural Deanery Meeting at Weymouth.

The regular quarterly meeting of the Annapolis Rural Deanery was held at Weymouth on Tuesday and Wednesday, the 12th and 13th of February. Members present: Revs. Rural Dean deBlois, ex-Dean Filleul, Withycombe, Warner, Belliss, Gale and Harley.

On Tuesday evening the Sunday-school Convention met in the parish church, and was addressed by Rev. Rural Dean deBlois, Rev. John Withycombe, Rev. John Warner and Douglas Campbell, Esq., superintendent of the Weymouth Sunday-school. An able and instructive paper on the proper method of teaching and making the school attractive and useful was read by the Rural Dean. Much interest was manifested in the proceedings and valuable assistance rendered to those engaged in this God-like work.

On Wednesday morning service was held in the parish church. The congregation was large and attentive, the services hearty, and the singing remarkably good. The *ad clerum* sermon was preached by the Rev. John Warner, rector of Middleton, and certainly one of his happiest efforts, being eloquent, truthful and forcible. After dinner at the rectory the Chapter was opened for business and much important work was done, more especially the considering, clause by clause, the resolutions adopted at the late meeting of the Rural Deans in Halifax. A resolution of thanks was also conveyed to the Venerable the ex-Dean Filleul for the earnest and useful work he had done during the many years he had presided over the Deanery, with heartfelt wish that he might be spared for may years to give us his ghostly counsel and advice.

In the evening service was held in St. Thomas church, Weymouth Bridge. The Rural Dean preached one of his earnest, touching sermons, to a large and attentive congregation. This church has lately been completely remodelled, and may now be looked upon as one of the prettiest and most chaste ecclesiastical edifices in the diocese, and reflects great credit upon the rector of the parish and the warm and willing hearts of the people in that place. The collections were devoted to Missionary purposes within the Deanery. The visiting clergy were cordially entertained by the hospitable people of Weymouth, and thus ended a meeting happy in its gathering, and profitable, we trust, in its results.—COM.

The Sealing Industry.

Ottawa, Feb. 13.—Information has been received here from Victoria, B. C., which shows that far from the sealing industry being killed by the Behring Sea arbitration it never was in a better position than it is today, and never more people engaged in it. Up to date fifty vessels have sailed, one-half of which are bound for the Japan coast and the other half will hunt in British Columbia and Pacific coast waters. On the vessels which have gone to Japan there are 605 hunters, nearly all of whom are whites, the gun being used freely in hunting on the coast of Japan. On the vessels which have not gone to Japan there are 178 whites and 602 Indians, making a total of 1,385 employed in the industry, exclusive of those who will go to sea on the schooners still in port.
