HISTOGENETIC SYSTEM OF MEDICINE

All diseases successfully treated by the new system of pure and tasteless medicine. So-called incurable cases preferred.

THEORY—Rebuilding the diseased cells and tissues of the body with the same proximate principles and ferments, organic bodies and so on, which are normally prepared in the body by the glands.

Remarkable Recovery of Mr. W. T Clay, who was several years in the Grand Lodge Ontario Masons and was two years District Deputy Grand Master Toronto District G.R.O., of the same Order, and is well known in business and socially. He says:

DEAR DR. REAR,—"Have had failing health, loss of appetite (one meal a day of late), took severe cold, settled on lungs and bronchial tubes, developed into asthma, pain in chest, faint spells, bad cough. The worst spell was in the Citizens' Mill, where I am millwright. The engineer thought I was dying. Reliable information said that 'Histogenetic Medicines would save life after all else failed.' Twenty years' knowledge of your family and your scientific researches told me you would tell the truth. I consulted you one month ago. You prescribed Dr. J. Eugene Jordan's (late of Germany) Histo Medicines. The tight breathing is already about gone. No pain left. Cough about well. No faint spells. Appetite splendid. Could 'eat a man on horseback.' To-day have climbed ten or twelve times to top of Knox Church tower and only had to rest once. It is a wonderful system."

W. T. CLAY.
