MONDAY, April 26, 1915.

The Wilson Contract.

The debate on the contract of the Newfoundland Products Company, Limited, and on the Resolutions meant to confirm it and make it effective, will be taken up in the House of Assembly. Meantime, the members are endeavoring to gather what information they can about the proposition in order to discuss it and deliberate upon it intelligently.

Among the important sections of the Indenture are the following:—

NOW THIS INDENTURE WITNESSETH as follows:

1 (a) The Government hereby demises for a term of ninety-nine years from the date of this agreement to the Company (so far as the Government can consistently with any grants, leases or licenses heretofore made and actually subsisting demise the same) the water power or powers in and upon the Humber River and in and upon Junction Brook, and for the purpose of its works and operations the Company shall have the right to divert, stop or dam up any stream, lake or water course within the drainage area of the Humber River and to make, construct or maintain any dam, water course, culverts, drains and reservoirs in said area for any of its said works or operations.

1 (b) And it is agreed that if at any time during the currency of this agreement and within a period of twenty-one years from the date hereof the Company shall validly acquire or become legally and properly entitled to any water power or water powers in this Colony or its Dependencies within a distance of forty miles of the Company's factories or power houses at the mouth of the Humber River.

1 (c) Or within the drainage area on the East Coast of Newfoundland comprised within the following limits: ALL THAT area of land on the East Coast of the Island of Newfoundland between Hall's Bay and the Gander River inclusive, and bounded as follows: Commencing at the head of Hall's Bay and following the seashore to the mouth o f the Gander River thence following the Eastern Bank of the said River, in a southerly direction to the junction of the Southwest Branch with Dead Wolf River, thence in a westerly direction to the mouth of the Victoria River, thence in a northwesterly direction to the head of Buchan's Brook and thence in a northeasterly direction to the place of commencement Hall's Bay and the Gander River inclusive:

1 (d) Such water power or water powers shall be taken to be held under this agreement, and the provisions of this agreement except clause 10 hereof in respect of the rights and privileges granted to the Company, shall apply to all works and business, and the materials for the construction and operation of the same which may be constructed and carried on in connection with such last named water powers for the purpose of the manufacture of phosphate of ammonia, nitrate of ammonia and other fertilizers, carbide of calcium, cement and their by-products:

1 (e) Provided that if at the expiration of five years on the East Coast, the Company shall not develop the same or any of them, then the provisions of this agreement shall cease to apply to any such water power undeveloped.

LABRADOR.

2 (a) Within two years from the date of this agreement the Company undertakes to begin a survey of the Hamilton River and Northwest River in Labrador and to finish the same within five years thereafter, and to furnish the Government with all necessary details and plans of such survey, and the Government undertakes that if the Company expend within a period of ten years from the date hereof in addition to the expenditure hereinafter provided, a sum of not less than five million dollars in Newfoundland or its Dependencies in connection with the extension of its business and operations, it will grant to the Company (so far as the Government can consistently with any grants, leases or licenses heretofore made and actually subsisting grant the same) the water powers on the Hamilton River from the head of Lake Wilicapau to the sea or at the option of the Company equivalent water powers if obtainable on Northwest River, including rights to store at any point or points on the drainage area of the Hamilton or Northwest River the surplus waters and to equalize the stream flow.

2 (b) It is agreed also that in the event of the storage, or compensating dams built by the Company being or becoming of benefit to other companies operating powers on the said drainage area, such last named Companies shall pay to the Company a proportionate part of the cost of the said dams and of their maintenance and operation. If any of the said Companies and Company cannot agree as to the amount payable in respect of the said dams, the same shall be settled by arbitration in the manner provided by clause 3 hereof.

2 (c) AND IT IS FURTHER AGREED that all the rights and privileges, duties and obligations granted to or imposed on the Company by this agreement shall apply to the works and business of the Company in connection with the water powers in said drainage area.

2 (d) Provided, however, that on Hamilton River the rights of equalizing the stream flow shall not permit the Company to raise the level of the natural tail water discharge of Grand Falls: AND the Government further undertakes that during the period of five years it will not grant to any person any water powers or water privileges within the said drainage area of that part of the Hamilton River above named or of the Northwest River, and shall not during the succeeding period of five years grant any such powers within the drainage area of the river required by the Company as hereinafter provided.

2 (e) Provided, nevertheless, that it shall be a condition of said grant in Labrador that the Company shall within five years from the date thereof, expend in the development of said water powers and the construction and operation of its plant in Labrador, the further sum of ten million dollars, and if the Company do not expend the said sum within the said five years, then the grant of the said water powers in Labrador shall be void.

2 (f) AND provided further that the Company shall within the period of five years from the date of this agreement elect as to whether it will require the said water powers on the Hamilton or the equivalent on the Northwest River.

18. The Company undertakes to begin actual construction work upon its undertaking within two years from the date of these present and to expend a sum of five million dollars within the Island of Newfoundland in and about the business and operations of the Comany within five years from the date of these presents, and if the Company fails to begin such work or expend such money the times mentioned this agreement shall be void.

Shopkeepers !

It isn't a pleasant sight to watch your oil profits leaking slowly out of your kero barrels and spoiling everything nearby. This will not happen if you handle

Texaco Kerosene

as it is in eight hooped, non-leakable barrels. No dearer than the ordinary kinds.

GEO. M. BARR, Agent.

Died From Injuries.

Mr. J. A. Lindahl saw filer with the Albert E. Reed Co., at Bishop's Falls, died on Saturday last as the result of injuries received through having his foot caught in the conveyor chain of the machine he was operating. The deceased lived only three hours after the accident, having received serious internal injuries. Mr. Lindahl was held in high esteem by the people of Bishop's Falls, particularly by his fellow employees of the Albert E. Reed Co., and his tragic ending has evoked general sympathy.

PERSONAL.—Mr. Mark Chaplin, who accompanied his wife to Halifax, arrived back in the city by yesterday's express.

Induction of the Rev. Dr. Jones.

Yesterday large congregations attended the services at St. Thomas's Church, at which the new Rector, Rev. Edgar Jones, B.A., B.D., Ph. D., was installed. The Rector took part in the morning service at which he read the lessons, while Revs. A. Clayton and W. E. Cracknell offered the prayers.

When announcing the services for the coimng week Dr. Jones said that it was not without some feeling of trepidation that he made his first appearance before the congregation as their Rector, and asked their prayers and help in the work he was called upon to take up. He then preached a very forcible sermon from the text: "If a man die shall he live agan," Job 14-14.

The question was dealt with most interestingly from the racial, institutial, national and political standpoints. During the course of his remarks the rev. preacher made a pleasing reference to the old Union Jack around which so many of our own kith and kin are now rallying. The sermon was a most timely one and delivered in eloquent language showing that the new rector is a pulpit orator of more than ordinary ability.

THE INDUCTION.

At 6.30 p.m., the Induction Service began, being choral and after the Anthem, the newly-appointed Rector, supported by the Church Wardens, standing at the Chancel steps, was inducted by the Rev. Canon Colley, Rural Dean of Avalon, in the prescribed form. After Canon White read the Bishop's License and appointment, the Rector made the declaration and subscribed to the Canons and was escorted to his place within the Communion rails. Following the induction Rev. Canon Smith extended the Lord Bishop's congratulations to the Parish and new Rector. Continuing, he spoke eulogistically of and expressed his best wishes to Rev. Dr. Jones and gave an able and inspiring address on St. Thomas's Church from a historic standpoint, pointing out that the first Church of England clergyman ordained in Newfoundland was the late Rev. Thomas M. Wood, who was also the first Rector of St. Thomas's.

Rev. Canon White, Rector of the Cathedral, then delivered an eloquent and impressive sermon to the large congregation from the words Acts 26-19: "Whereupon, O King, Agrippa, I am not disobedient unto the Heavenly vision." The secret of St. Paul's success was that he had caught the vision that he had seen Christ and in this lay the success of Christian life. He referred to the new Rector whom he had known for many years and watched his career closely and felt that his presence here was for the general good and well being of the Parish. The new Rector, he thought, would reap fruit seed sown by predecessors and would sow that from which others might, but people and pastor were exhorted to seek the Heavenly vision and be obedient to it at all times.

The **Telegram** congratulates St. Thomas's Parish on securing such a capable rector as Rev. Dr. Jones to whom we extend sincerest wishes for a long and fruitful career in the ministration of his Church.

Our Volunteers.

The number of volunteers enlisted with the Reserve Force to date is 1677, the following having enrolled on Saturday last:—

Rd. H. White, St. George's.
Edward Bennett, St. George's.
Raphael Nardini, St. George's.
Chas. A. Parsons, St. George's.
Norman Dean, Botwood.
John Barton, Goulds.
Walter Day, St. John's.
Patk. Murphy, St. John's.
John Kenna, St. John's.
Hy. Kelly, St. John's.
Nicholas DeLacey, Grand Falls.

There are now about 100 men under drill, and recruiting is still being continued daily.

McMurdo's Store News.

MONDAY, April 26th, 1915.

In cases of chill, sudden colds, and some kinds of internal pains, a good dose of our Jamaica Ginger will often prevent a severe attack of illness. It is a highly concentrated essence of pure ginger and will do all that ginger can do in relieving pain and as a general stimulant. Price 40c. a bottle.

For colds in the head, and acute and chronic catarrh some people have found Bovel's Menthol Inhaler of peculiar value; as it is easy to use, can be kept in the pocket for instant employment, and retains its strength for a considerable time without being refilled. Price 25c.

Benzoin Cream is probably the best skin food we have. It is made of the finest materials, and is exquisitely perfumed. It is sold in a handsome ceramic jar of much greater capacity than ordinary crocks of this kind. Price 50c. a crock.

Wedding Bells.

BRODERICK—DALTON.

There was a pretty wedding at the R. C. Palace at 10 a.m. yesterday, when Miss Helen Broderick, daughter of Mr. Patrick Broderick, Lime Street, and Mr. Thomas J. Dalton, operator at the Nickel Theatre were made man and wife by the Rev. Fr. McDermott. The bride who is well known in St. John's, wore a beautiful bridal dress of white silk with veil and wreath of orange blossoms. She was attended by Miss Beth Broderick, while Mr. William Dalton supported the groom. After breakfast at the residence of the bride's parents, Mr. and Mrs. Dalton left for Forest Pond where they will spend their honeymoon. They take with them the best wishes of their many friends including **The Telegram.**

CASE DISMISSED.—A naval officer of H.M.S. Calypso was before Court to-day, charged with obstructing the police in the discharge of their duty. The case was dismissed.

Here and There.

GONE FOR COAL.—The s.s. Bonaventure sailed this morning for North Sydney to load coal for here.

STOCK EXHAUSTED.—A message to the Marine and Fisheries Department to-day from the Consul at Oporto, stated that the stock of fish there is exhausted.

HANDY CLOTHES SPRINKLERS.—15 cents. CHESLEY WOODS, Agent. Agents wanted. They sell like hot cakes.—ap21,tf

IMPORTERS' MEETING.—A meeting of the Importers' Association will be held at the Board of Trade Rooms on Thursday afternoon at 3 o'clock to arrange for the Spring opening of the stores, and the fixing of holidays and half-holidays for the coming season.

REIDS' BOATS.—The Argyle arrived at Placentia from the Merasheen route at 4 a.m. to-day, and sails this afternoon for the west; the Bruce arrived at Port aux Basques at 1.20 p.m. yesterday; the Kyle left Port aux Basques at 5 a.m. to-day; the Sagona arrived at Port aux Basques at 6 p.m. yesterday, and sails again on the south coast route to-day.

LOCAL ARRIVES.—The local from Carbonear via Brigus, arrived in the city at 12.45 p.m. to-day.

DEATH OF MR. HENRY COOKE.—A message was received this morning by Mr. H. W. LeMessurier, Assistant Collector of Customs, from the son of Mr. Henry Cooke, at Hamilton, Ontario, stating that his father had died there. Mr. Henry Cooke occupied for many years a prominent position in banking circles here. For many years he was manager of the Commercial Bank and some time after that institution closed its doors, he took up his residence in Canada, where he continued to reside until his death.

Here and There.

COMING HOME. — The sealing steamers Eagle and Bloodhound, the latter being disabled and in tow of the former, are now on their way home and are expected to reach port some time this evening. They are the last of the northern fleet.

PROSPERO OFF.—The Prospero got a quick despatch and sailed again for Western ports at midnight Saturday with a full freight and as passengers in saloon:—C. Way, Rev. Lench, W. Garland, J. O'Driscoll, C. Benning, J. Doyle, H. Dobin, J.Meehan, M. Parsons, J. Kehoe, Mrs. W. Garland, Mrs. Parsons, Miss Molloy., and 12 in steerage.

Here and There.

WEATHER.—It is fine all over the line of railway to-day with a light north west wind prevailing. The temperature ranges from 20 to 40 above.

SAILING POSTPONED.—The S.S. Fogota, which was scheduled to leave here to-morrow morning on the Fogo Mail Service, will not get away before Wednesday next, owing to some delay in the repairs to the ship, which is still at the dock pier.

FOREIGN EXPRESS.—The regular express with the Bruce mails and passengers is due in the city at 2 a.m. to-morrow.
