Memorandum for Cabinet War Committee

United Nations Relief and Rehabilitation
Administration

Cabinet War Committee Document 636 of October 12th included a copy of a note from the United States Minister requesting the concurrence of the Canadian Government in the revised draft of the agreement establishing the Relief Administration. A copy of the draft agreement is attached. The above Document mentioned two points which require early decision - whether the agreement in the revised form is acceptable to us and whether we are prepared to sign it without reservation so that it will become binding on Canada from the date of signature. It is necessary also to make arrangements for Canadian representation at the first meeting of the United Nations Relief Council which is to begin at Atlantic City on November 10th.
