# THE HORSEMAN.

Allerton, 2:09¼, king of the trotting stallions!

* * *

Allerton wears only five-ounce shoes in front and three-ounce behind.

* * *

A kite-shaped track has been finished at Sturgis, Mich., and opened to the pubic last week.

* * *

It is surmised that L. J. Rose will be found in the trotting ranks again after his runners are disposed of.

* * *

Nothing succeeds like success. It is said that last spring Ed. Geers refused over 100 horses that were offered him to train.

* * *

About the only unpleasant feature of the present trotting season is, says the Breeders' Gazette, the fact that some of the remarkable performances made on the various tracks incited so-called poets to the writing of senseless jingle that might far better have been left unsaid.

* * *

The most intelligent breeder will not be hampered or blinded by any set theory, says an exchange, but will study how the best horses of to-day are being produced with the greatest uniformity, and reach for the most successful under the double tests of performance and production.

* * *

In Robert Bonner's latest talk about Sunol, he says, "I believe it is in Sunol to beat 2:08¾, the record made by Maud S., provided Sunol is as game a mare as the latter. She certainly has the speed. Her record of 2:18 as a 2-year-old and 2:10¼ as a 3-year-old shows it. Yes, I may say conclusively that, barring accident, Sunol will make a new record for trotters."

* * *

If there were one race for thorough 2-year-olds where now there are five; if selling races could be entirely abolished; if no races were given for 3-year-olds and upward at less than six furlongs; if the minimum of weight were put not lower than 110 pounds—then it might be said with some approach to truth that the object of racing was the improvement of the American thoroughbred.—[Chicago Horseman.

* * *

Quite a little excitement was created in Boston not long ago over the discovery of the fact that a gentleman residing near that city had been grossly imposed upon in the purchase of a mare which was represented to him to be Olivette, 2:28¼. It subsequently transpired that the real Olivette was in another place; and now the man who sold the mare and who says that he did so innocently, offers to take her back at the price paid and allow the purchaser for her keep during the time he has had her.

* * *

The men who complain about bad feet, interfering, etc., are the ones who drive their horses to the shop and leave to spend their time at the stores and saloons. No man can know how the colt should be shod so well as the watchful owner, and the man who does not guard carefully the feet must not expect to stand very near the head in the long row of breeders. Every man should have knowledge of his colt, its manner of moving, lifting, carrying forward and placing the feet, so he can intelligently direct the shoeing.—[Horse World.

* * *

Horses in our large towns are often saved from colic by being allowed to drink frequently at the public troughs and fountains. By doing this the horse becomes a good judge of the quantity he requires. If a horse comes home from a hard journey, perspiring freely, do not allow him to drink his fill of cold water. Let him stand in the stable till he has cooled somewhat and is made comfortable. A little chilled water may be given and a little good, long hay be put into his rack to take his attention. It will require thorough mastication, and will have the effect of preparing the stomach for the reception of the more concentrated food which is to follow.

* * *

Weed out the colts that toe in or toe out, that are long and weak in the back, crooked and faulty in the legs, that can't move without being booted from tip to tip, those with big heads without brains, or, having them, don't know how to use them. Get rid of the ugly blood, and so lift the standard of stock and add to the dollars in the business. No man ever kept a poor animal entire and for service but that in the end there was loss rather than gain. Go to the fairs this fall and examine the 1 and 2 year olds shown, and see if there is not a lesson in this for everyone. It is true in breeding as well as in growing crops, the man who weeds the closest and most intelligently is the one who grows the largest crop and at the least cost.

* * *

The trotting horse is not confined to the track, but is useful on every hand. On the road he is great; on the farm he does the work of a mule, plowing, harrowing and hauling heavy loads. In cities he pulls butcher carts, milk wagons, buggies, carriages, omnibus and express wagons, and is found indispensable in many other places where nothing but fast harness horses can be used. Horses that make trotting race horses are about one in every 100, and the man who breeds a common mare to a trotting-bred horse and fails to get a 2:20 performer need not be disappointed, but has some assurance of a nice roadster that will be worth three colts from a scrub horse. What could a good roadster be sold for? It would be safe to say $300, while a scrub would sell for $100, and perhaps a good deal less, and cost the same amount to raise.—[Kentucky Stock Farm.

* * *

A gentleman thoroughly experienced in trotting affairs and who at the recent Independence meeting saw for the first time a kite-shaped track in full blast, said that he was somewhat disappointed, and came away strong in the belief that the old-fashioned regulation track was preferable to the kite-shaped course. He remarked that he saw a few advantages in the new plan, but not sufficient to counterbalance its disadvantages, prominent among which he observed the many collisions and narrow escapes from collisions at the intersection of the tracks, a disadvantage which it would not seem easy to remedy. Undoubtedly the most serious objection to the kite-shaped track is that it precludes the possibility of a distinct and intelligent view of the races by the public, and certainly the public convenience and entertainment is a most important factor for consideration in the construction and equipment of a racecourse.

It is a matter of astonishment that so many women suffer in silence the troubles peculiar to their sex when Dr. Williams' Pink Pills are an unfailing cure. Suppressions, derangements, weakness, etc., especially yield to their treatment. Sold by all dealers or by mail on receipt of price (50 cents a box) by addressing Dr. Williams Medical Company, Brockville, Ont. 59u xt

# WIDE WORLD WIRELETS.

Bands of riotous negroes have almost taken possession of Lee county, Ark.

Lord Mount Stephen will sail on Friday from New York for England, where he will spend the winter.

Lord Lytton, it is said, will shortly retire from the British Embassy in Paris, and will be succeeded by Sir Philp Currie.

At Muncie, Ind., the first rain for a month fell Monday night. It was preceded by a heavy wind storm. The large tent of a circus collapsed falling on 200 people and several were badly bruised.

George E. Cochrane, a traveling man of Mulberry Grove, Ill., was killed instantly Monday night by Cecilla Philips at Alton, Ill., because he tried to enter her house against her protest. The woman gave herself up.

## OUTBREAK IN GUATEMALA.

**Five Hundred Lives Said to Have Been Sacrificed.**

ST. LOUIS, Mo., Sept. 29.—A dispatch from the City of Mexico says on the 15th inst. an outbreak occurred in the city of Guatemala, and private advices state that 500 lives were sacrificed.

It appears the people were celebrating their national holiday, and President Barillas personally appointed the orators of the day. To this the masses took exception, and when the orators took the rostrum it was the signal for a storm of stones, which put them to flight, they being chased across the big plaza by a howling mob, shouting "Down with the Government!" "Down with despotism and tyranny!" "Die, Barillas!" An exciting scene followed, and every known Liberal or Barillas' partisan was driven from the plaza. Barillas threw a battalion of infantry into the large square to disperse the mob. They with fixed bayonets attempted to carry the plaza by assault, but were met with showers of stones and bullets from revolvers. This unexpected action of the mob put them to an ignominious flight, leaving many dead and wounded. Barillas then ordered artillery into the plaza, and the guns were turned on the mob. The mob left the plaza but fought in the side streets; in fact, they practically, during the night of the 13th, held full control of the city.

A dispatch received in Mexico at 5 o'clock yesterday brings information that Barillas is master of the situation, having put down the revolt in the city of Gautemala after three days' hard fighting. The revolt was precipitated by Montufar, a son of one of the candidates for the presidency.

A private dispatch to a prominent merchant in Mexico says that fully 500 lives were sacrificed in the three days' fighting and that President Barillas is still shooting the participants in the revolt as if they were animals. The city is under martial law.

## MARVELS OF MECHANICAL SKILL

**Where the Best of Machine Tools Are Manufactured.**

The London Machine Tool Company had on exhibition at the Western Fair a display that occupied one side of Machinery Hall. First of all there is a new veneer machine, made for A. L. Morrison, of Toronto, which cuts veneer from the hundredth part of an inch to half an inch in thickness, and seven feet six inches long, cutting it from the log as it comes from the woods. A number of veneer and machine men pronounced it, after inspection, superior to any machine of the kind they have seen; in fact it appeared to be the main attraction on the grounds in the way of machinery. The the firm show a combination slatting machine and drill made for A. R. Williams, Toronto, and all who have seen it work pronounce it an unqualified success. It is a very handsome piece of mechanism, and no machine shop should be without it. A bolt cutter embodying the latest designs and conveniences which modern practical science can suggest is also shown. It has no superior for fast work. Another fine piece of machinery is a sixteen-inch engine lathe, with fifteen feet shaft. It will bear the closest mechanical inspection as to proportion, style, accuracy of finish and simplicity of operation, and every lathe is fully guaranteed to give satisfaction if properly set up and operated by competent mechanics. The shears are heavy, well proportioned and strong, the heavy stock is very substantial in all its proportions, and is fitted down on the shears; the hollow spindle is made of forged steel. Every machine sent out by the London Machine Tool Company is guaranteed to be as represented. The firm has a business which extends from one end of the Dominion to the other, and nothing but praise of the quality of their work is heard from their patrons. During the Fair their exhibit was inspected by practical men from all parts of the country, and words of praise were heard on all sides.

## SPECIAL NOTICES.
