## PERIL IN EASING PAIN.

**Many Women Become Slave to Drugs and Wake up too Late.**

A view of the statistics of a noted scientific medical cure for inebrity and the opium habit discloses the appaling facts that a large percentage of the patients applying for treatment are women. Further inquiry by The Boston Transcript shows that housekeepers and those employed in various branches of labor constitute a great number of these unfortunate beings, whose lives are wrecked by continuous indulgence in narcotics. Those who have spent years in studying this subject agree that the victims in nearly every case have begun with drugs, merely to ease a temporary pain and have realized when it was too late that the habit had become established. A farmer's wife finds herself a sufferer from periodical sick headaches; a society woman on the verge of nervous collapse; a brain worker unequal to the task she has undertaken. A small dose of morphine, a third of a grain of quinine, a drink of alcohol in one of the many forms, even to Florida water and perfumery, is a quick but dangerous stimulant. The next day, at the same hour, the same remedy is at hand, and before many weeks the victim is chained to the habit. This particularly true of the drugs, which have none of the social temptations of liquor drinking. There is no pleasure in taking drugs, and those who continue to do so confess when cured, the horrible, indescribe agony, both mental and physical, of attempts to do without it. Three grains of merphine are generally considered a fatal dose, yet many women who apply for treatment are taking enough every day to kill 50 persons.

One of the most distressing phases of the drug habit is its effect on the moral sense of its victim. Investigators are authority for the statement that women—and of course men as well—are absolutely untruthful, even regarding the most trivial affairs, when they have acquired the habit. In this particular, opium is much more to be dreaded than liquor. The intensity of the craving is most horrible to witness, as was shown by a recent instance. A woman was arrested on some minor charge and locked up. She sent to a friend to bring her her accustomed dose of opium. Instead of removing the cork, which would have taken but an instant, she clutched the bottle tightly between her hands and tossed broken glass and powder into her mouth. Then her calmness returned. Those who know confirmed opium eaters believe they would walk barefooted over live coals or face any horrors for the sake of appeasing their craving. So saturated does the body become after years of opium eating that its crystals exude through the skin and about the joints. Those who use the hyporemic needle are enabled to take much larger quantities than by swallowing the powder. The desire for any of these drugs and also for liquor is periodical, and the scientific cure, which has proved so successful, combats this regular swing of the nervous pendulum by rythmical treatment.

All competitors have been compelled to give way to Dr. Price's Baking Powder. All rivals have been forced to yield the palm.

**Upper Canada Bible Society.**

At the regular monthly meeting of the Upper Canada Bible Society, the president, Hon. G. W. Allan, in the chair, the report of the Committee on Agency and Colportage was submitted, covering the reports of fifteen agents, regarding their visitations to branches of this society in Ontario and Manitoba also the reports of eight colporteurs, who had traveled 1728 miles, made 2046 visits, sold 366 Bibles and 262 Testaments.

The secretary, Mr. Harvie, reported the receipt of $1000 from Mr. George Dawson of Brampton for investment, the proceeds to be devoted to local objects, as specially arranged, and that the agreement made by the board had been duly executed. The Jesse Ketchum gifts to Sabbath schools in the city of Toronto will be distributed shortly.

As Parmelee's Vegetable Pills contain Mandrake and Dandelion, they cure Liver and Kidney Complaints with unerring certainty. They also contain Roots and Herbs which have specific virtues truly wonderful in their action on the stomach and bowels. Mr. E. A. Cairncross, Shakespeare, writes: "I consider Parmelee's Pills an excellent remedy for Biliousness and Derangement of the Liver, having used them myself for some time."

The market closed heavy for Northwest and Rock Island.

Earnings of Northwest for October decreased $74,000. Omaha decreased $154,000 in October.

Henry A. King & Co.'s special wire from Ladenburg, Thalman & Co., New York: The market is apparently waiting for the result of the Government bond subscription. The feeling of the speculative community is that it will be a success in every way; but the effects are limited by the size of the short interest, all other buying power being absent from the market. The granger stocks, on which the bear party have expended the greater part of their efforts for some time past, have mainly felt the effects of this sentiment, and on the other hand sugar has been weak and declining. The tone of the market at the close was strong, and the tendency of foreign exchange would indicate considerable European subscriptions to the new loan. The bond market to-day has been dull but strong.

Schwartz, Dupee & Co., Chicago, wire Dixon: Wheat early broke 1-2 cent, December liquidation cutting as much figure as any of the other bear reasons. The close showed only 1-8 loss from Thursday. Cables lower. Export clearances were exceedingly light, less than 150,000 bushels. Primary receipts were not very different from last year's. There was a rather bullish cable from Buenos Ayers, quoting an advance there. The seaboard reported about 20 loads for export. Market toward the close acted as if the liquidation had been pretty thorough. The visible Monday is expected to show a large increase, larger than last year. Corn weak, weakest for the near-by deliveries. The November lost all of its premium. The December got a cent under May. The cash demand continues poor. The prospect is for increasing country movement, with good weather, speculation is light. Provisions broke at the opening under selling by the packers, with scalping shorts the only buyers. After ruling very dull the decline was recovered during the last hour of the session on covering by the pit traders, who had over-sold on the early weakness. The tendency of the market is still toward lower prices.

Henry A. King & Co.'s special wire from Logan & Co., Chicago: The trade in wheat to-day has been light, with narrow fluctuations. Cables weak and lower. Latest advices from the Argentine coast regard an advance of from three to six pence per quarter on cargoes. We need heavier exports to advance price and give market a backbone. A heavy increase in the visible has been discounted, so that if it comes in less than expected the market is nervous enough to put it up a cent or so. Total receipts of corn are heavy, consequently market is lower; buying for shipment by lake is about over for season. This has helped decline on the cash and near futures. Provisions—So little doing we may say it is featureless. Receipts likely to fall off.

**EPPS'S COCOA**
BREAKFAST—SUPPER.
"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided for our breakfast and supper a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame.—Civil Service Gazette.
Made simply with boiling water or milk. Sold only in packets by grocers, labeled thus:
