One of the largest deals in Windsor real estate that has ever taken place was the sale Wednesday by J. C. Patterson to Daniel Scotten, of Detroit, of the Chappell farm. It lies facing the Detroit River, consists of over 400 acres, runs back as far as the Malden road, and the price paid was $40,000, or a slight fraction less than $100 an acre. On the farm is a magnificent gravel pit that in itself is a fortune to the purchaser. On the front of the farm stands the old road-house so familiar to Detroiters who delight in a fish and frog supper. Mr. Scotten will turn the entire property into a magnificent stock farm. Thousands of dollars will be spent upon it, and nothing but the finest of stock purchased, as it is the intention of the new owner to have the premier stock farm of Canada. For this purpose it could not be excelled, as its situation is of the best, and a number of springs abound on the place. Mr. Patterson has realized a handsome profit by the sale, as it is known that he purchased it for about $20,000 a few years ago.

The church is a model of neatness and modern improvement, and is heated and lighted by natural gas, the whole costing about $8,000.

KENT.

The East Kent Teachers' Association last week in Ridgetown was well attended. The forenoon session was devoted to the transaction of business. After this the report of the delegates to the Provincial Institute was presented by R. Sanderson, principal of the public school, Dresden. H. S. Clark of the Toronto Conservatory of Elocution, took up the remainder of the forenoon in addressing the teachers present on the subject, "Reading and how to teach it." He selected the poem in the Fourth Reader, entitled "Before Sedan," and from this taught an imaginary class, illustrating to the teachers his method of teaching the subject. At the afternoon session Mr. Clark resumed his discourse on reading, and for a couple of hours he not only interested the teachers but furnished them with a great fund of information. Burton Graves, teacher at Guilds, read a paper which he had prepared for the occasion on the subject "How we might improve." He treated his subject intelligently and suggested many valuable methods of improving both the condition and position of the teaching fraternity generally.

At the concert in Ridgetown in connection with the Teachers' Association, Prof. Clark, Toronto, gave readings and recitations of very high merit, and all the numbers on the programme were excellent; N. The top and frontal bones in the infant's skull were wanting, and the diaphragm was not formed, so that nearly all of the abdominal viscera were forced up in the throat and chest. Hazen vs. Berliner Shutzenge Sellshaft was an action to have defendants, who have a rifle range in the outskirts of Berlin, enjoined from shooting, because of its endangering the safety of the plaintiff and other persons when working on his farm, which is directly behind the butt. Persons using the range have been required to place the muzzle of the rifle in a sort of channel about four feet long, constructed of planks, two of which, about three or four inches apart, constituted the sides, the top being covered by a third plank, but the bottom left open. In front of this defendants had erected guards between it and the butt and above the range. These consisted of planks nailed on either side of scantling, with the intervening space filled with sand, in order to catch any bullet which might go over the top of the butt. In addition the latter had wings supposed to be sufficiently extended to prevent any bullet fired wide from getting past. The plaintiff and several other witnesses swore, however, that bullets had whizzed past them while they were at work in the fields, and the expert witnesses called by the defendants stated that it was not impossible that bullets could get past the butt by ricochet, notwithstanding all the precautions taken. The injunction asked for was granted.

IT SAVED HER LIFE.

A Letter to the Ladies.

TORONTO, Oct. 21, 1891.

I take great pleasure in informing you that a year ago Histogenetic Medicines cured me of a serious attack of paralysis. Three years ago I had a sudden stroke while sitting on a sofa; a second one fourteen months ago while lying in bed. All I did for it failed to do much good. My voice and all one side were badly affected. At last I tried Dr. J. Eugene Jordan's Histogenetic Remedies. In three months my voice became strong. My limbs, which were almost useless, regained full power. I no longer needed to be assisted to the table or from any one place to another. My muscles developed wonderfully, considering that I am 74 years of age. I can walk to church and back regularly. The effect has been permanent now for about twelve months. Last April I had a severe attack of pneumonia and Histogenetic Remedies cured me in a few days, and on the 8th of this month I took congestion of the liver and right lung. I was so bad I could not have lived long. In a few hours the Histogenetic Remedies once more gave immediate relief. It is only two weeks, and I am sitting up every day and nearly well. To say that my faith in Histogenetic Medicines is strong but faintly expresses it. Try it, ladies, for these or any other complaints and be convinced. Dr. Rear, of Toronto, is allowed to give my name and address to any inquirers similarly affected.

Respectfully,
MRS. ——, Toronto.

Gentlemen,—I had that dreadful disease, la grippe, last March, which left my system in a weak condition and my head distracted. If I moved my head or stooped it produced pain and an indescribable feeling. Great debility followed, palpitation and approaching heart failure, nervous prostration and general loss of strength and a feeling of internal pressure. I consulted Dr. Rear, who prescribed the Histogenetic Medicines of Dr. J. Eugene Jordan for me. In two weeks I was some better. I gained in strength. The medicines very soon commenced to build me up. I continued to gain, and after taking only one complete course all my symptoms were better. That is three months ago and not a trace of grippe is left. I feel well. The effect is abiding. The medicines are good to take and leave no ill affect. I hope all needing treatment may try this beautiful system. It is far better than taking poisonous drugs. Yours gratefully,
SARAH TOOLE.

N. B.—Mrs. Toole is a lady of about 65 years of age, of delicate frame, and of such a very few only out of every hundred have entirely recoved from that fatal disease.
