Plantagenet Mineral Waters.

We have published several certificates of Montreal Physicians and other gentlemen in this city, in which the great virtues of these celebrated Waters are strongly insisted on. We now transcribe two from persons at a distance, by which it appears that the good qualities of these Waters are becoming generally known through the Province:—

Cholera Cured by the Plantagenet Waters.

I, the undersigned, wishing to give testimony in favour of the *Plantagenet Waters*, beg to state that in the year 1832, I was with a number of men lumbering near those valuable and efficient springs, and that I was taken with the then prevailing disease, (Cholera,) with a number of my men who were also taken ill of the same disease. We used it, and we were perfectly cured; whilst those who were against it, died almost instantly of the prevailing disease. Moreover, we took down several barrels with us to Quebec, in case of a relapse.

I remain, Sir,
Yours, &c,
J. S. CAMERON.

St. Lawrence, 9th Jan., 1849.

Testimony in favour of the Plantagenet Waters.

Montreal, 24th March, 1849.

I, the undersigned, hereby certify, that the above certificate of Mr. J. S. Cameron, relative to the *Plantagenet Mineral Waters*, as being an efficacious cure in cases of Cholera and other sickness, is strictly true, having witnessed its use in similar cases; and moreover, in the year 1832, the fact above stated having occurred to my knowledge. I make, therefore, the liberty of recommending the same.

A. DORVAL,
City Councillor, Quebec.

From Mr. Hunt's analysis of the water of the *Plantagenet Springs*, it appears well adapted as a remedial agent for most of those Chronic diseases and derangements in which the *saline ingredients of the blood* are rather deficient in quantity or deteriorated in quality, containing as it does the most important of *these*, combined by nature in a palatable form. And, for the same reason, it seems well adapted for counteracting the baneful effects of contagious or miasmatic poisons on the blood, and consequently it is likely to prove useful during the prevalence of epidemic or contagious fevers, influenza and *Cholera*. To its remedial properties in the last of these diseases, the testimony of experience has already been borne.
