CABINET MINISTER UPSET IN CANAL

Hon. H. R. Emmerson Being an Expert Swimmer Refused Offered Aid.

(Ottawa Free Press.)

It is not often that the sluggish water of the canal receives into its bosom such a notable personage as a cabinet minister. Last evening, however, when about to step into his canoe from the Rideau Canoe Club landing, Hon. H. R. Emmerson, minister of railways and canals, overstepped the mark and disappeared. Fortunately the honorable gentleman is a swimmer of unusual ability, and laughingly refused all aid from the score of paddlers who rushed to his rescue. The moonlight paddle had to be abandoned and the minister returned home in a cab. Rather ungrateful treatment for one whose duty it is to look after the welfare of our waterways, is it not?

SAVE DUTY BY WORKING HERE

Hundred Thousand Dollar Business in Gum Chicle Done Last Year

BRING THE PRODUCT HERE FROM MEXICO

It Goes to Make Chewing Gum, and by Drying It Here the Factory Owners Save Much That Would Otherwise Go Into Uncle Sam's Treasury.

In the list of goods exported from St. John to the States, published in the Telegraph Thursday morning, there appeared one item which was rather puzzling. This is gum-chicle, which was exported from here during the last twelve months to the value of $103,043.35.

There are only four items in the list credited with a greater value so it is very natural that one should be curious about the exact nature of the gum chicle business.

Enquiries revealed the fact that gum chicle is a Mexican product, and forms the chief ingredient of pepsin chewing gum, and the consumption of it in the gum factories amounts to many hundreds of tons annually. There is a large percentage of water in the gum chicle in the green state and this fluid has to be taken out of it to render it fit for use. Every factory has its own process of doing this and each jealously guards its secret from the others.

There is only one place here where the stuff is handled and it belongs to a firm in Maine. Eighty thousand pounds of it have been treated in this city since May 1, and the business has been going on quietly, unobtrusively in South End for the last six years and grows all the time.

The gum is the hardened sap of a tree and comes from Mexico in great blocks, some of them weighing more than 100 pounds. It is cut into pieces with a hatchet, then chopped by machinery, dried, boxed and sent to the factory in Maine. The stuff is very easily melted by the heat, so much so that during the heated term of the year the work has often to shut down. There is a large saving in duty in first bringing the gum chicle from Mexico here and drying it before sending it to the States to be made into pepsin chewing gum, and that is why the raw product is brought here instead of going direct to the Maine works. If the latter course were adopted it would mean paying duty on the whole weight which would be contributing to the United States customs a large sum for bringing in so much water. The Canadian tariff, however, is better adjusted to the gum chicle man's wants so he brings the product here, dries out the water and then pays duty to Uncle Sam on the remainder.

Sometimes the stock comes dirty and unfit for use. There was a large boxfull in the building Thursday, when the newspaper man called. This was filled with pieces of bark and small stones. He was shown two larg pieces of stone which had been dug out of the centre of a cake of gum. As the dealers buy it by weight, these stones, which must have weighed at least half a pound each, bore silent but eloquent testimony to the thrift of the native Mexican.

TELEPHONE BORN IN CANADA

Dr. Bell Tells Where It Was Invented.

Halifax, N. S., July 23—Speaking at the banquet of the Maritime Electrical Association at Sydney, Dr. Alexander Graham Bell, the famous scientist and inventor, set all doubts at rest as to whether the telephone was invented in Canada or in the United States. To Canada belongs that honor, Dr. Bell claimed, as he was living at his father's place, near Brantford (Ont.), when he invented it. The first test was also made in Canada. In a short review of great achievements in the electrical world, Dr. Bell made the assertion that he considered wireless telegraphy the greatest marvel of the age. He related an incident of how the scepticism with regard to its success had been removed while on a visit from Europe to America a few years ago, when he sent a marconigram to Washington when the steamer on which he was traveling was several hundred miles from land, the answer being placed in his hands a few hours afterwards. Dr. Bell returned to his home at Baddeck today. Dr. Bell is now about to give another valuable work to the world in connection with the improving of the condition of the dumb. The work is entitled The Mechanism of Speech, and is just off the press.

Thomas R. Gary, of Ocala (Ky.), set twelve partridge eggs under a hen and succeeded in raising six partridges. It was a long time before the little birds learned the mother's language, and before this was finally accomplished the fledglings nearly starved, but now everything goes along finely, and the partridges are tamer than chickens usually are.

BRYAN HAS AUDIENCE WITH KING EDWARD

London, July 26—William J. Bryan, who was introduced by Ambassador Whitelaw Reid, was received in private audience by King Edward at Buckingham Palace today. The visit was paid at the King's special request, His Majesty having notified Mr. Reid that he desired to meet Mr. Bryan. The interview was quite informal and was marked by the pleasing cordiality which the King is accustomed to show Americans in whom he is interested. Only the King, Mr. Reid, and Mr. Bryan were present. The conversation largely turned on the subject of pe
