ICE! ICE!!

Subscriber possesses a Receipt to enable person to make ICE, in any climate, little expense or trouble. The process and can be accomplished by the d understanding, so as to produce from water, in the hottest climate, a pure in every essential to that formed by sun. The luxury of always having at hand, in the heat of summer, a pure and ce, will readily be conceded; and its , in cases of sickness, cannot be too sed. By this same process warm be rendered delightfully cold in about ve, and ice creams, with many other can be made in from ten to twenty

owing notice of this great discovery in the New York Evening Post:—
"Luxury.—Some time since, we published the receipt of Captain Hadden, of the Steamer Ellen, for making ice in your own dwelling, by the use of saltpetre. We never published a receipt which more generally obtained credit for its truthfulness. We have been daily in receipt of inquiries for the article, and have never heard a doubt expressed of its efficacy. We now publish another receipt, which we have tried, and which we know to be good, and which, in cases of sickness, may be invaluable. We mean the manufacture of ice by means of gunpowder. We have seen it stated that a pint of gunpowder will produce a pound of ice, and we have no doubt of the truth of the statement. The ice thus produced is as much purer than that from the pond, as that from the pond is purer than that from the Dead Sea. We shall be glad to have our friends try the experiment, and report the result to the public."
