Fight Against The Brown Tail Moth.

Among the many activities carried on by the N. S. Dept. of Agriculture, not the least in importance is the campaign, now in its tenth year, against the Brown Tail Moth. This work is under the jurisdiction of the Entomological Branch, and being of a more or less quiet police character, is probably little known outside of certain areas.

The Brown Tail Moth is one of the most destructive of all insects. Where it gains headway and becomes established it will devastate whole areas of fruit and of other trees in a single season. The U. S. Government, after allowing it to get a foothold in New England, has recently spent many millions of dollars in the endeavor to control and extirpate this pest.

It is worth remembering that all those life forms, when native or long established, are checked to a greater or less degree by natural foes or parasites which prey upon them. When carried into strange territory, however, they are apt to be immune from these foes for many years, and thus may multiply to an alarming degree before meeting any natural check. This is the history of the Brown Tail, which was imported from Europe, and failed to bring its parasites with it. The introduction of these natural foes is one method combating it, now being carried on by the Dominion Department. But a far more effective and immediate remedy is necessary to prevent its ravages.

The Entomological Branch of the local department, in co-operation with the Federal Department, the expense being halved, has at the present moment some ten men, divided into small parties, roaming the infested areas, and destroying the winter nests. The areas of infect on thus far corresponds roughly with the main fruit belt in Nova Scotia, though the pest has never been allowed to gain enough headway anywhere in the province to make it appear to many people as a serious menace. The work being done falls into two divisions, the widely ranging scout work on the out-kirts of this region for the purpose of preventing its spread, and the more intensive work of carefully examining the region where it is known to be, so as to destroy every nest possible. The following table, giving the number of nests found and destroyed, indicates at once the menace to fruit growers from this source, and the success attending the efforts to overcome it.

In the year 1909	1496	winter nests
" 1910	4462	" "
" 1911	8070	" "
" 1912	11055	" "
" 1913	24156	" "
" 1914	18254	" "
" 1915	14845	" "
" 1916	10019	" "
" 1917-18	3024	" "

The period reported on so far for 1918-19 gives a return of 443 as compared with 1490 for the corresponding period of last year. Thus the persistent effort of the Department is now showing a very gratifying result. When the posibilities of fruit growing in Nova Scotia are taken into account, the value of this piece of work becomes inestimable.

The School Teacher's Creed.

I believe in Boys and Girls, the men and women of a great tomorrow, that whatsoever the boy soweth the man shall reap. I believe in the curse of ignorance, in the efficacy of schools, in the dignity of teaching and in the joy of serving others. I believe in wisdom as revealed in the human lives as well as in the pages of a printed book, in lessons taught, not so much by precept as by example, in ability to work with the hands as well as to think with the head, in everything that makes life large and lovely. . . . I believe in the school room, in the home, in the daily life and in the out of doors. I believe in laughter, in faith in all ideals and distant hopes that lure us on. I believe that every hour of every day we receive a just reward for all we are and all we do. I believe in the present and its opportunities, in the future and its promises and in the divine joy of living.—Edwin Osgood Grover.

The candidate for medical honors was having a hard time answering the questions put to him. Finally one of the professors asked: "How would you sweat a patient for the rheumatism?"

"I would send him here to be examined," said the student, mopping his beaded brow.

The Treasure of Good Health.

EASILY MAINTAINED THROUGH THE USE OF DR. WILLIAMS' PINK PILLS.

There is not a nook or corner in Canada, in the cities, the towns, the villages, on the farms and in the mines and lumber camps where Dr. Williams' Pink Pills have not been used, and from one end of the country to the other they have brought back to bread-winners, their wives and families the splendid treasure of health and strength.

It would be easy enough to ask your neighbors, and they can tell you of some rheumatic or nerve-shattered man, some suffering woman, ailing youth or anaemic girl who owes present health and strength to Dr. Williams' Pink Pills. For more than a quarter of a century these pills have been known not only in Canada, but throughout all the world, as a reliable tonic, blood-making medicine.

The wonderful success of Dr. Williams' Pink Pills is due the fact that they go right to the root of the disease in the blood, and by making the vital fluid rich and red strengthens every organ and every nerve, thus driving out disease and pain, and making weak, despondent people bright, active and strong. Mr. W. T. Johnson, one of the best known and most highly esteemed men in Lunenburg county, N. S., says:—I am a Provincial Land Surveyor, and am exposed for the greater part of the year to very hard work, travelling through the forests by day and camping out by night, and I find the only thing that will keep me up to the mark is Dr. Williams' Pink Pills. When I leave home for a trip in the woods I am as interested in having my supply of pills as provisions, and on such occasions I take them regularly. The result is I am always fit. I never take cold, and can digest all kinds of food such as we have to put up with hastily cooked in the woods. Having proved the value of Dr. Williams' Pink Pills, as a tonic and health builder, I am never without them, and I lose no opportunity in recommending them to weak people whom I meet."

Dr. Williams' Pink Pills should be kept in every home, and their occasional use will keep the blood pure and the nerves strong. You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Soil Element Deficiency.

This is the age of scientific farming. The farmer who proceeds scientifically keeps his soil built up to its maximum productivity. To do this he must know the cause for deterioration, what the soil contains and what it lacks, and what crop they are by nature best suited for. Below are give in some general principles that will do well to remember.

Clay soils are generally deficient in nitrogen and phosphorus but contain potassium. The tendency is for clay soils to take and get hard, and the addition of a little lime is calculated to correct this.

Black soils are strong in nitrogen, but sometimes short of phosphorus and potassium. Such soils usually need drainage.

Sandy soils are generally deficient in potassium. Roughly speaking they are short on all the soil elements.

Here is another case where lime will prove a sweetener and will help to retain moisture.

Always Had Headaches

Liver Was Torpid and Bilious Spells Brought Sick Headaches —Lost Much Time, But is Now Completely Cured.

Here is convincing evidence that however much you may suffer from liver trouble and consequent biliousness there is cure in the use of Dr. Chase's Kidney-Liver Pills.

Overeating is the most common cause of sluggish liver action. You lose your appetite, have distressing bilious spells, usually accompanied by headaches and vomiting, the bowels become irregular, constipation and looseness alternating, digestion is upset and you get irritable and downhearted.

No treatment so quickly awakens the action of the liver and bowels as Dr. Chase's Kidney-Liver Pills. For this reason this medicine is wonderfully popular and has enormous sales.

Mr. Charles R. Tait, Newtown, N.B., writes: "I was nearly always troubled with headaches, and would often have to stop work for a day or two. I lost many a night's sleep every month with bilious sick headaches, and although I tried doctors' medicines, and also many other patent medicines, it was without success. When I had these headaches I would vomit, and could keep nothing on my stomach.

"I purchased a box of Dr. Chase's Kidney-Liver Pills from G. M. Fairweather, druggist, of Sussex, N.B., and after taking one box I was so much relieved that I continued to take them until I am now completely cured. My advice to anyone suffering from sick headaches is to try Dr. Chase's Kidney-Liver Pills and be completely cured."

Mr. A. S. Mace, J.P., endorses the above statement, and says:—"This is to certify that I am personally acquainted with Charles R. Tait, and believe his statement in every way to be true and correct."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box, all dealers or Edmanson, Bates & Co., Limited, Toronto. Substitutes will not satisfy the doctor. Insist on getting what you ask for.

Address of Appreciation.

Mr. N. B. Kilcup who recently purchased a property on Gaspereau avenue and came to Wolfville to reside, was for many years the faithful and esteemed superintendent of the Sunday-school at North Grand Pre, where he made his home. Just before his departure from that place the school held a reception in his honor at the home of Mr. and Mrs. Harry Palmeter, and after a pleasant evening spent in social intercourse, Rev. Mr. Ryan, on behalf of the school, read the following address:

To N. B. Kilcup:

Our Sunday School Supt.—We, the scholars and teachers of the North Grand Pre Sunday school, whose superintendent you have been for so many years, are forced to realize that we have come to the parting of the ways. Your removal from your Island home and from our midst fills our hearts with regret and sorrow. We would have you know before you leave us, that your faithful work for the Master, your unvarying kindness and politeness and your earnest striving to lead the young to the 'higher life,' are appreciated by many, and are not forgotten by some of those who have gone out of the school and home to act their part in the world.

You will be greatly missed in the school, in the church and as a neighbor. May the Master whom you serve grant that you and Mrs. Kilcup may have many happy years in your new home and permit you to be as useful there as you have been here.

Please accept our little offering with our sincerest love and respect.

'May the power of God uphold thee,
And the peace of God enfold thee;
May the Word of God direct thee,
And His armour keep, protect thee.
May His good angels ever cheer thee,
And His perfect love draw near thee;
Keep thee sure. He faileth never.
This same Jesus—now—forever.

Signed: North Grand Pre Sabbath School.

Many New Ways of Travel

The whole perspective of travel has been altered by the war. A British night bombing pilot was in Dover about noon, returning from leave. He reached his squadron in France at 4.30 in the afternoon. At 6 o'clock he was told that at 8 o'clock he had to fly to Namur, 120 miles behind the lines between Brussels and Aix-la-Chapelle. He arrived at Namur at 11.15, successfully bombed the railway bridge, and landed at his own airdrome a little after 12. So for one day, he was on the wing on duty in or over London, Dover, Dunkirk, Ghent, Brussels, Namur, Charleroi, Routers and Courtrai, and accomplished a task of notable military importance. On another occasion an observer started at 1 o'clock in the morning in a bombing machine to attack the railway junction at Lichtewelde, in Belgium. He successfully bombed his objective, returned to bed and went on leave at eight o'clock in the morning. In that day he flew over the lines in an airplane, drove in a motor car to the docks, crossed the Channel in a destroyer, landed in a motor boat, went in a four wheeler to the station, took a train to London, and reached home by means of a 'tube,' a moving stairway and a taxicab.

Be Ready For Emergencies

The best way is to always keep a bottle of Dr. Chase's Syrup of Linseed and Turpentine in the house, ready for emergencies. Then when croup, or colds come suddenly they can be promptly cured before they have time to reach an acute and dangerous stage. To meet this requirement we have put the syrup up in family size bottles which contain nearly three times as much as the 25 cent bottle and sell at 60 cents.

Unfit Seed Prohibited.

Regulations are now in force which prohibit the importation into Canada, in lots of ten pounds or more, of unfit seed of clovers, grasses, vetches, rape, other forage plants, field root and garden vegetables.

Unfit seed is described in Phamphlets R—12 of the Seed Branch of the Department of Agriculture at Ottawa, and obtainable from the Publication Branch, as that which does not comply with the Seed Control Act requirements respecting the sale of seed in Canada, or if it has been refused admittance into any other country on account of low vitality.

The regulations governing this matter are fully described in this pamphlet which shows that unfit seed that has arrived in Canada shall be deported under Customs supervision. Penalties are attached to infractions of the law in this regard.

Used For Shaving.

Many men are troubled, more particularly in the cold weather, with a sort of roughness of the skin or eczema caused by shaving. The application of Dr. Chase's Ointment after the shave soon cures the trouble and by using it after each shave you keep the skin soft and prevent irritation and soreness. Because of its antiseptic qualities this ointment prevents and cures Barber's Itch.

A PATRIOTIC DUTY

Almost as vital as that of protecting the honor of flag and country, is the duty of protecting and safe-guarding health. When strength is well-nigh exhausted and the resistive powers are reduced, then is the time disease germs are the most potent and when

SCOTT'S EMULSION

affords splendid and effectual means of offsetting the tendency toward weakness and protecting strength. The abundant tonic and unique nourishing properties of *Scott's Emulsion* make it a dependable agent that may be used everyday, by anyone, to protect strength.

Scott & Bowne, Toronto, Ont. 18-4

Tom Moore, Labor Leader, Endorses War Savings Plan.

HUMBLE 'QUART R' IS NOW BEING MOBILIZED IN THE SERVICE OF THE COUNTRY.

Tom Moore, president of the Trades and Labor Congress of Canada, is today, by reason of his position, the recognized leader of organized labor in the Dominion. He is also a man of international standing. The advantages of the War Saving plan are obvious to him, as the following statement shows:—

"During this reconstruction period the question of unemployment is one of the vital problems, and the Government, by the carrying on of essential public works, etc., can materially help and thus stabilize the labor market. In order to do this money must be forthcoming.

The pre-war methods of financing were found unequal to the requirements of war time, and regulations imposed by other countries made it necessary to secure money direct from the people of Canada. The sale of Victory Bonds was instituted and the marvellous success achieved proved the value of the policy of placing the purchase of these within the reach of the greater number by introducing the low denomination of fifty dollars.

Even greater success can be achieved by still further reducing the minimum amount which can be subscribed and Canada has now decided through its War Thrift Stamp Savings scheme, to offer opportunities by which not only the men and women, but the children of the country, can help to provide the money which is still urgently needed to carry on. The humble 'quart r' is at last being mobilized into the country's service. All should lend their aid and make the aggregate sum secured so large as to prove for all time that the workers of Canada can finance their own undertakings.

London, Jan. 25.—A Berlin despatch to the Daily Mail says: 'A sensational special edition, selling rapidly on the streets here, maintains that the former Kaiser and his family intend to return to Germany as soon as the National Assembly has given the country a legal constitution.'

It is understood that the hospital ships will go to Boston in future. Capt. Kidner, of the Transportation Department, who has been in Halifax for the past couple of years, left yesterday for Portland to meet the hospital ships.—Morning Chronicle.

A bad beginning may make a good ending, but too many persons never make any kind of a beginning.

The man who does the least talking often has the most to say.

Greatness that is thrust upon people seldom lasts long.

Hypocrites pray cream and live skimmed milk.

Only the rich can practise economy with success.

Hantsport News

Edward B. Sweet Division, Sons of Temperance, resumed meetings last Monday, and are making plans for an active campaign.

R. S. Theakston, who was on work in connection with the Sons of Temperance at Barrington Passage, returned home on Saturday.

Mrs. J. W. Churchill and Miss Churchill, are visiting relatives in Sydney.

The many friends of Miss Hobbert Mitchener will be glad to know that she is recovering from her illness.

The funeral of the late Mrs. Stock-well Alley, took place on Friday last, after service at the house, the remains were taken to St. Andrews church, where the burial service of the church of England was conducted by the Rev. Mr. Bulock. After which the committment was made in River Bank Cemetery. Deep sympathy of the community is drawn out for Mr. Alley and nine children, who have been called on to mourn the loss of a loving wife and mother.

Model Orchards.

It may not be generally known to the public of Nova Scotia that the Provincial Department of Agriculture has at different times since 1911 set out some model orchards in different parts of the province. Of the number some have, although under extreme conditions, proved quite satisfactory. These orchards are still in first class condition and doing good work.

The terms upon which the Department undertakes the setting out and oversight of such an orchard are in general such as to ensure that it shall be as far as possible a public institution, conducted in the interest of the district in which it is located. The specific object aimed at are the finding out of the possibilities of fruit raising in different parts of the province, the testing of varieties as to their adaptability to the locality, and the demonstration of the best and most up to date methods in caring for and improving an orchard. The Department furnishes free nursery stock and a certain amount of spraying materials, and offers expert assistance in the operation of spraying, pruning and grafting. The Provincial Legislature limits the number of these model orchards to three in any one county, with a total acreage per county of not more than six acres. Cumberland, Cape Breton, Guysborough, Hants and Yarmouth are some of the counties which are at present not fully occupied.
