UPTURN IN WHEAT ON FIRMER CABLES

Failure of Rains in India Given as Reason For Flurry.

CHICAGO, Feb. 6.—Short sellers of wheat were running to cover in the last hour today, defeated by a steady fire of commission house orders on the bull side. Purchasing was based to a considerable degree on unexpected strength in foreign markets. Closing figures here showed an advance of 3-8c to 3-4c net. Corn wound up with a gain of 3-4c to 7-8c, oats at a rise of 5-8c and provisions dearer by 7 1-2c to 17 1-2c.

Wheat traders generally ascribed the surprising firmness of cable quotations to failure of rains predicted for the united provinces of India, where the crops have recently been reported as without moisture. Bears, however, did not seem much impressed with this reason for the advance, nor with dispatches from Russia telling of lack of snow in the fall-sown fields. Generally favorable conditions for the plant in the United States was argued to be more than offset.

May Wheat Cornered.

When the absorption of pit offerings reached beyond midday, however, sentiment in wheat veered at once. A buying flurry ensued and the possibility of a crop scare on this side of the Atlantic served as a decided bogey. There was fear also that big concentrated interests here had obtained control of the May option. No signs of a reaction were in sight as the final bell struck.

Corn, tho easy at first on account of rain in Argentina, bulged late owing to free buying on the part of large owners. There was also a notable purchasing movement in corn by commission houses.

Oats rose because of the wide discount under corn and in consequence of primary receipts being lighter than receipts.

There was an active trade in provisions. Hogs appeared to be scarce and lard especially was in persistent demand.

Northwest Receipts.

Receipts of wheat at northwest points, with usual comparisons, follow:

CHICAGO GOSSIP.

J. P. Bickell & Co. had the following:

Wheat.—After holding a shade above yesterday's price during the greater part of the session firmed up in the last hour and closed about ⅜c higher. The advance in corn and oats started shorts covering and this with some scattered commission house buying quickly caused an upturn. We cannot consistently advise purchase in view of the news and continue to advise sales.

Neill, Beatty & Co. had the following:

Wheat.—During the morning there was every indication that the local wheat trade was in a rut from which there was no escape without something important in the way of news. Appearance of things was deceitful because market did get out of the rut the last hour when there was the biggest volume of trade and strongest advance of the week, if not for the month and that, too, without any important news to give the buying its start. New crop months dragged behind all day because the conditions over winter wheat belt are mostly favorable.

Erickson Perkins & Co. had the following:

Wheat.—There is no particular change in the situation as we view it, altho the sentiment seems to lean toward the long side of the market.

Corn.—We find no betterment in the cash situation and can attribute today's advance absolutely to the persistency of holders and additional covering by shorts.

Oats.—The same interests which have been friendly to corn for some time past are devoting considerable attention to the long side of oats and now that the market has gotten out of a rut some possible further advance may be obtained.

Leith Serge

At a mid-season like this when the climate is a little off schedule, many a man finds himself perplexed in the choice of a suit.

It is in this predicament that a serge suit may be referred to as the lines of least resistance.

The superiority of Leith Serge is an acknowledged fact, and combined with the fact, and this and the superiority of the "Broderick Service," are a combination of complete satisfaction.

Winnipeg Grain Market

WINNIPEG, Feb. 6.—Prices were strong on the wheat market, altho trading in options was quiet and a very light volume of business transacted. Opening figures were ⅛c higher for both months on stronger Liverpool cables, and reports of severe weather conditions over the U. S. wheat belt. Further advances occurred following the opening, the gain for the day being ⅝c for May and ½c for July.

Cash demand was fair and offerings practically nil. Exporters were buying all they could lay hands on. Prices were ½c higher for contract grades, off grades being also on the advance.

There was a fair demand for oats and prices higher, while flax was quiet and bids weaker.

Three hundred and eighty cars in sight for inspection.
