$2 INSTEAD OF $4—DURING JANUARY only. The Rev. Miles Grant says: "It is a veritable life preserver, and I would not be without it for any money." We have published hundred of letters to the same effect from representative Canadians; we have sold thousands of them in Canada and do not know of one dissatisfied. No system yet discovered has yielded such wonderful results in the cure of Consumption, Dyspepsia, Constipation of the Bowels, Catarrh, Kidney Diseases, Headache, Nervous Prostration and General Debility; and, certainly, it has no equal in preventing or cutting short an attack of typhoid or other fevers; for breaking up la grippe or ridding the system of its baneful effects, mitigating the severity of diphtheria and all acute or exhausting diseases. The system is very simple and easy of application by any one without training or skill, and does not interfere with either work or diet. We refer to the Wilford Hall "New Process," as unfolded in our "Microcosmic Health Pamphlet." Dr. Hall still charges $4, and it would be cheap to any family at $50; but we wish to put it within the reach of all, and will mail it to any address during January, on receipt of $2, and agree to refund the money if results are not satisfactory after one month's trial, purchaser signing an agreement never again to use the treatment. Eight-page paper, history, testimonials, etc., free. Remit to-day and save $2. Register your letter at our risk. Address—The Simpson Publishing Company, Toronto. 58 k eod

YOU MAKE THE SALE EVERY TIME, and the cost is only 1 cent a word under this heading.

A. J. McEVOY,
Treasurer of the County of Middlesex.
County Buildings, London, Oct. 19, 1891. 89bu t

COMMENCE THE NEW YEAR RIGHT—The Muskegon Improvement Company is organized under the laws of Michigan for the purpose of raising funds to induce manufacturers to locate in their city. The Company purchased a tract of land, subdivided it into lots, and sold to citizens of Muskegon in one day 2,800 lots at a uniform price of $130 per lot. Some of these lots have been resold for $1,500, and many of them for from six to ten hundred dollars each. Five hundred houses and twelve immense factories is the rest of the sale, the profits being used to secure the factory buildings which were presented free to the present owners. The same Company now offer 1,800 lots at a uniform price of $35 each. Terms are only $5 cash and $2 a week; $8 a month. The lots in the second sale are more worth Three Hundred Dollars than those in the first sale were worth One Hundred and Thirty Dollars, on account of sal improvements. The Company issue a bond based by a million dollars to duplicate in 1892 what was done in 1891. Send your name and postoffice address and we will cheerfully mail you free Plats, of Mars, a beautiful Bird's Eye view of a City of Thirty Thousand, and such information as every intelligent person will appreciate. If you do not become a purchaser you will find this information valuable and instructive. This is the one chance of your life. It don't cost anything to investigate. Write to Chas. M. STEELE & SONS, Sole Agts, Muskegon, Mich. 52u t

BRICKS!

How They Used to be Made and How They Are Made—The Very Best Process, as Seen in the "New Simpson Press."

In nothing has the inventive spirit of the age and the constant striving for improvement shown itself with better results than in that humble but useful article—the brick. The old plastic or mud process had its own way for a long, long time, and the bricks of bygone days were as crude and loosely constructed as the mechanical process applied to them. In fact, it isn't so very long ago—only a few years—that anything like a desirable method of manufacturing was introduced. The finished brick of to-day is in advance of the old one as much as the domestic architecture of the nineteenth century is ahead of that of King Alfred's reign, when candles in the royal palace were often blown out because of chinks in the wall. This leap from an ancient to a modern brick has been particularly noticeable in the last ten years, during which a decided change in the time-honored mode of clay-working has been gradually taking shape. Clever men experienced in the art of brick-making then in vogue felt the great necessity of a newer and better method, and although all previous efforts towards improvement had failed, they kept at it and success has crowned their efforts, as it always does human perseverance in a legitimate line. And the "dry press process" was their accomplishment and it is to-day superseding all others. The highest development of that process is doubtless seen in the "New Simpson Press." As the proof of the pudding is in the eating, so the proof of a brick-making machine is in its work, and the splendid products of the "New Simpson" evidence its claim to surpassing merit.

After a thorough examination of the different dry press
