* The unperforated offiicially sealed stamps are on thicker paper and the color is much darker than the perforated seals of same design. The color impression shows plainly on the back of the unperforated seal and does not show on the backs of perforated seals.

In order to prove that the unperforated seals were only in use a short time during the early part of 1888 I publish the following official comunication:

POST OFFICE DEPARTMENT.
Office of the Third Assistant Postmaster General,
WASHINGTON, D. C., *July* 20, 1888

MR. C. F. ROTHFUCHS,
359 1-2 Pennsylvania Avenue,
WASHINGTON, D. C.

SIR: Your two letters of the 10th and 19th inst. are before me. The two unperforated "official seals" submitted with the first of these letters are genuine samples of seals which the Dead Letter Office and postmaster recently, for a short time, were using. Those that are now used are identical in design, but are perforated.

The two seals, together with a third one submitted by you—being a specimen of the steel-plate seal formerly in use—are herewith returned.

Yours very respedtfully,
H. R. HARRIS,
3rd Asst. P. M. General.
