THE GUN.

AMONG THE TALL TIMBERS.

While out hunting in the Sooke hills last Sunday, James Sprinkling became separated from his companions, Louis Young and Walter Jesse, and failed to meet at the Summit, which they had decided should be the rendezvous. Search was made for him, but to no avail. Fortunately Mr. Sprinkling, after wandering in the woods all night, succeeded in striking out in the vicinity of the Strathcona hotel and came down on the noon train on Monday.

—o—

HOCKEY.

VANCOUVER WINS.

Monday afternoon a match was played between the Garrison and Vancouver teams, which resulted in a victory for the latter eleven by a score of 2 goals to nothing. It was the first league game of the series, and this win gives the Terminal City a lead in the race for the provincial championship. There is no gainsaying the fact that the Vancouver team won on its merits. The visiting eleven outplayed their opponents at every point, but more particularly in the work of their forwards. Individually, the teams were evenly matched, but Vancouver excelled in combination. In spite of their speed, however, at times they had their work "cut out" to prevent the Garrison team from scoring. Some of the latter players proved to be splendid stick handlers and exceptionally fast on their feet. There is little doubt that had they showed more inclination to use combination the opposing team would not have been able to prevent the soldiers scoring.

The game started promptly at 3 o'clock, the Vancouver team playing down hill. The puck was taken into the Garrison territory from the start, but for a time the defence put up by the soldiers could not be penetrated. Occasional rushes were made up field by Rivers, centre forward for the Garrison, but through lack of combination the advantage was always lost. Finally, however, a bombardment of the Garrison goal resulted in a score for Vancouver. Nothing more was done in the first half.

When the game recommenced after a short intermission, the Garrison team evidenced a determination to score. Led by Rivers, the forwards made several endeavors to score which were almost successful. Vancouver, however, braced up, and at intervals made effective onslaughts on their opponents' stronghold. Before long one of these resulted in the ball being put into the net. This was not allowed, as a foul occurred just before the shot was made. Shortly after there was another successful shot. The remainder of the game was evenly contested.

T. B. Tye acted as referee, giving satisfaction to both teams.

—o—

BASKETBALL.

BACHELORS, 16; BENEDICTS, 8.

A fast and exciting game was played Monday night in the Fernwood hall between the bachelors and benedicts of that association, resulting in a win for the former by a score of 16 to 8. The benedicts displayed remarkable ability, their combination and close checking being particularly noticeable, and but for the splendid work of J. Renouf, at guard for the winning team, the score would have been different. One of the features of the game was the clean work of the benedicts, only one foul being called on them during the match.

A. Gilson acted as referee most impartially.

The teams lined up as follows:

Benedicts—Guards, F. Jones and J. Renouf; centre, W. Peden; forwards, P. Marchant and H. Griffiths.

Bachelors—Guards, A. Shotbolt and H. Neelands; centre, R. Dalby; forwards, W. Malcolm and E. Gallop.

E. E. Wescott played for the benedicts in the first half, but unfortunately turned his ankle, his place being taken by J. Renouf.

JUNIOR LEAGUE GAME.

Monday night a junior league match was played between the Victoria West and Cloverdale teams at the V. W. A. A. hall. Play was hard throughout the game, checking on both sides being very close. The result was a win for the Victoria West team by a score of 12 points to 3.

The game commenced promptly at 8 o'clock, and for the first half the match was evenly contested. Playing was fast, and it was seldom that the forwards on either side were allowed to shoot. When the whistle blew the score was 5 points to 2 in favor of the V. W. A. A.

In the second half the Victoria West team added materially to their score. Cloverdale played a plucky game throughout, and, in spite of the lead their opponents were gradually obtaining, kept them working until the finish.

Roller did most of the scoring for Victoria West and Dakers for the Cloverdale team.

T. Hutcheson acted as referee.

—o—

ASSOCIATION FOOTBALL.

GARRISON, 7; Y. M. C. A., 1.

Wednesday afternoon a match was played between the Y. M. C. A. and Garrison elevens at the Work Point grounds. The score at the finish was 7 goals to 1 in favor of the latter team. This, however, does not give an accurate idea of the character of the game. Although the Y. M. C. A. boys were outplayed in many points by the soldiers, they put up a hard and plucky fight, making numerous and determined attacks on their opponents' stronghold, and were only prevented from scoring by the Garrison team's strong defence.

During the match two penalty kicks were awarded the Garrison team, both of which were converted by Rivers. These were given against the Y. M. C. A. team because of fouls made by players of the latter eleven within a specified distance of the Garrison goal. In the second half one penalty kick was awarded the Y. M. C. A. team for a similar offence on the part of the soldiers. The kick was taken by Bate, but was not converted, Harvey, the opposing goal keeper, being successful in preventing a score.

Play commenced at about 3 o'clock, and for a time the game was evenly contested. Oakes, Alliot, Hooker and Thomas, who were playing forward for the Y. M. C. A., did good work and succeeded in scoring before the expiration of the first half. They made a number of excellent rushes towards the Garrison goal, but most of these were a failure owing to the cool, reliable playing of the full backs of the latter team. The Garrison team played well together, the forwards working hard and being well supported by the half and full backs. At the finish of the first half the score was 3 to 1 in favor of the soldiers.

After a brief intermission, the game recommenced, and from the start of this half the Garrison eleven seemed to have the best of the playing. In spite of the efforts of the opposing team they took the ball down field, and before many minutes had elapsed scored again. For a time the Y. M. C. A. team did better work and held the soldiers in check, even making several onslaughts on the soldiers' goal, which were unsuccessful because of unnecessary bunching of the forwards. Soon, however, the Garrison relieved, and the ball was again in Y. M. C. A. territory, where it remained until another goal was scored. This play continued for the rest of the match, the final score being 7 to 1, as already stated.

As a whole, the Y. M. C. A. team put up a poor game. Their forwards include some good individual players, and the whole division with faithful practice would be exceptionally fast. Hooker is exceedingly clever in the use of his feet, and Thomas, who is on the wing with the former, is a hard worker, good at kicking, and appears to understand the necessity for combination. Alliott and Oakes are also two promising forwards. The half backs gave the forwards poor support. Their playing was not what it should have been, and it is to this that the defeat of the team is to be attributed. At times the half backs were to be found among the forwards, which made the playing resemble a scrimmage on a Rugby field. The full backs were also a little weak. They worked hard, however, and relieved frequently. Ed. Whyte in goal was kept busy and saved many shots from becoming goals.

The Garrison team was in excellent trim. Their forwards worked together in superb style, and were kept playing through the excellent support of the half backs. As usual, the full backs put up a cool, steady game, and could be relied upon to relieve if the goal was in danger.

Sam. Lorimer refereed the game impartially.

VICTORIA v. GARRISON.

Enthusiasts are looking forward to Saturday's game at Beacon Hill between the Garrison and Victoria teams with considerable interest. If the soldiers win it will give them the local championship, while, if they are defeated, that honor will in all probability go to Victoria. In order that the rules regarding penalty kicks may be carried out in this match, the Beacon Hill grounds will be marked off at the required distances from each goal. Fred. Richardson has consented to referee the game.

INTER-SCHOOL GAME.

On Saturday morning at Beacon Hill a match will be played between the St. Louis College eleven and the South Park team. The kick off will take place at 10 o'clock.

Following is the St. Louis team: Goal, C. Nelson; full backs, F. Brown and J. Robbins (capt.); half backs, T. O'Rourke, H. Silver and P. O'Rourke; forwards, W. McArthur (centre), J. McArthur, F. Sweeney, R. Hickey and P. McDonald; substitutes, M. Keappock and W. Robbins.

NOTICE TO MARINERS.

New Lighthouse Located on the Southeast Extremity of Merry Island.

A recent notice to mariners issued by the department of marine and fisheries says:

A lighthouse has been erected by the government of Canada on the summit of the low point forming the southeast extremity of Merry Island, at the southeast entrance to Welcome Pass, which separates Thormanby Island from Sechelt peninsula, off the southwest coast of British Columbia.

The light will be shown from an octagonal wooden lantern, standing on the roof of the lightkeeper's dwelling, which is a rectangular wooden building with a mansard roof. The lantern and building are painted white throughout. The height of the lighthouse from its base to the ventilator on the lantern is 35 feet.

Until the permanent illuminating apparatus is ready for installation, a temporary fixed white light will be shown from this station. It is elevated 57 feet above high water mark, and should be visible six miles from all points of approach by water. This temporary light was shown for the first time on the 6th November, 1903.

This light will be useful mainly to steamers coasting up the mainland shore, and leads up the strait of Georgia to the pass, and also guides through the pass.

MAYOR KEARY RE-ELECTED.

The annual civic nominations were held on Monday, and resulted in the return of Mayor Keary for a third term by acclamation. All the members of this year's council are candidates. The full list of candidates for aldermen is as follows: Ralph Wilson, A. J. Holmes, Marshall Sinclair, Bartley W. Shiles, William A. Johnson, William W. Forrester, William E. Vanstone, William A. Handcock, Arthur M. Herring, George Cunningham, jr., George Adams. Seven to be elected. The election will be held next Monday.

The Cance Germs Must Be Destroyed

THE ONLY RATIONAL METHOD OF TREATING CANCERS AND TUMORS.

Persons suffering from cancer will find that there is very little use cutting away the cancer growth, because the cancer germs are still in the blood and the disease will soon come back again. The only rational method of treatment is to destroy and thoroughly eradicate the cancer germs. We will gladly give you the address of many who have been cured by our new method of Constitutional treatment, which is a purely vegetable compound, easy to take harmless to the system. It destroys and eliminates the cancer germs and poisons and cures when other forms of treatment have been unsuccessful. Send two stamps to V. Stott & Jury, Bowmanville, Ont., for their new book on Cancers and Tumors, and full particulars of treatment. 16

LIFE-SAVING DEVICE.

Victorian Invents Contrivance to Expedite Launching of Lifeboats.

A patent has been secured by Irving A. Lemm, of this city, for an invention which will be of the greatest value to those aboard ship. It is a contrivance which makes the launching of lifeboats more expeditious and less dangerous and difficult than possible in the past. The inventor explains that the device is an improved chock for supporting a lifeboat, and so constructed as to accomplish the immediate and convenient release of the craft without the slightest complicated mechanism. It obviates the necessity of raising the boat from off the chock on the davit tackle. The inventor says in explanation of his device:

"Efforts have previously been made to dispense with the necessity of lifting a ship's boat over the outer sides of the supporting chocks in which it rests, by bringing the outer portion of the chock so that it may be folded down laterally and allow the boat to be swung clear out-board; but in such there is the objection that the weight of the boat must first be eased off the chock or even slightly lifted, and as the hinge portion must have a fastening to secure it in its upright position, the release of this fastening, the lifting of the boat's weight and the knocking down of the hinged portion requires the attention of a number of men and absorbs an appreciable amount of time.

"The object of this invention is to so construct the chock that the release of the outer portion can be effected from the in-board side, and the chock is so designed that as soon as the outer portion is released it will fall away of itself and permit the boat to be swung out, the weight of the boat itself assisting its own release.

"The importance of being able to launch a ship's boat quickly, when every minute of time is of vital importance, need not be enlarged upon, as it is conspicuously self-evident, but not less important though frequently overlooked, is the desirability of removing from the act of launching all preliminary work, which, in the confusion consequent on the emergency, is liable to be bungled and has frequently to be done under circumstances which render it doubly difficult, and in some cases impossible of attainment."

Reference to the records of marine disasters of recent years shows that had there been some means of launching the lifeboats promptly and easily the list of casualties would have been considerably less than it is. Almost every great ocean catastrophe affords evidence of this fact. The patent rights for Canada and United States have been secured, and the inventor will apply for those in Great Britain and Europe.

BURGLARIES AT WESTMINSTER.

Several Cases Reported During the Past Week.

The News-Advertiser's New Westminster correspondent writes:

"As a result of the presence of the prize-fighters, a great many cases of burglary and petty thieving have been reported. To the fact of these gentlemen being here the police ascribe the numerous 'professional jobs' which have occurred in the last week. This class of people invariably bring with them a train of such hangers-on, as was not long ago proved in Vancouver.

"A couple of nights ago an attempt was made to force an entrance into the Royal City hotel by way of the bar door.

"Monday night Sinclair's grocery was entered by the back window, the latch having been broken. The work was clearly that of a professional, as money was all that he was after and only a couple of dollars which chanced to be in the till were secured. Everything else in the store was left untouched. Several other cases of petty thieving have occurred, and it is altogether likely that the council will raise the license for boxing contests in this city."

CARRIED FEW PASSENGERS.

On returning, as on her outward trip, the steamer Queen City, which arrived on Tuesday from West Coast points, had a very light passenger list. Those to arrive were Miss Spence, Mr. McCoy, Mr. Mould, J. Jenson, F. W. McCredy and Miss G. Wright. Mr. McCredy five or six years ago was manager of the Electric Tramway Company in this city, and is now a resident of Vancouver. Being a mining expert he has been down to Clayoquot looking at some properties there in the interest of a syndicate. Mr. McCredy says that he never saw better looking ore than he has seen on the West Coast of this island. A good deal of the ore is in pockets, it is true, but this is the case all over the world. The great trouble with the West Coast mines has been that they pass from one to another's possession, a thousand dollars or so being now and again spent in improvements, but little if any development work has been done to thoroughly exploit the character of the ore. On the out trip the Queen City carried a couple of Seattle men, who went down the coast with a view to reopening the mines on Bear river.

CRUISER ON FIRE.

Keyham, Eng., Dec. 8.—The British second-class cruiser Hermes is on fire in the dock yard here. All the available fire apparatus is being used in fighting the flames. The shell room, which is in close proximity to the fire, which started in a store room, has been flooded.

THE CLERGY LIKE IT

DR. AGNEW'S CATARRHAL POWDER CURES ALL CREEDS. IT RELIEVES IN 10 MINUTES.

Here are a few names of clergymen of different creeds who are firm believers in Dr. Agnew's Catarrhal Powder to "live up to the preaching" in all it claims; Bishop Sweetman, Rev. Dr. Langtry (Episcopalian); Rev. Dr. Withrow and Rev. Dr. Chambers (Methodist), and Dr. Newman, all of Toronto, Canada. Copies of their personal letters for the asking.

Dr. Agnew's Ointment relieves piles in a day. 16

WINNIPEG'S MAYOR.

Alderman Thomas Sharpe Elected—The Wheat Crop.

Winnipeg, Dec. 8.—The Winnipeg municipal elections were held to-day. A very light vote was polled owing to stormy weather and general lack of interest in the contest for the mayoralty. Alderman Thomas Sharpe was elected mayor by about 1,000 majority over Aldermen Barclay and Mitchell. The chief interest in the aldermanic contests were in Wards 2, 4 and 5. Captain Wynne won from Harry Sandison in Ward 2, A. McCharles, ex-policeman, was elected in Ward 4, H. Frye in Ward 5 and F. C. Cox in Ward 6.

A circular of the Manitoba and Northwest Grain Dealers' Association, issued to-day, estimates that 25,654,522 bushels of this year's wheat crop has been marketed to December 1st. After allowing for the quantity required for seed it is estimated that 10,536,452 bushels remain to come from farmers' granaries.

E. Brown was elected mayor of Portage la Prairie, and Robert Hall mayor of Brandon, both by acclamation.

YALE-CARIBOO.

Kamloops, Dec. 7.—In addition to names already mentioned as probable candidates at the forthcoming elections in Yale-Cariboo the name of J. D. Swanson is freely mentioned. Mr. Swanson is a Britisher who has resided at Kamloops for the last six years, and is well known through the Boundary and Okanagan country. Mr. Swanson's name will in all probability be brought before the convention to be held at Kamloops for the selection of a candidate.

Monkey Brand Soap makes copper like gold, tin like silver, crockery like marble, and windows like crystal. 14

(Liquozone was formerly known in Canada as Powley's Liquified Ozone.)

We Offer $1,000

For a Disease Germ that Liquozone Can't Kill.

On every bottle of Liquozone we publish an offer of $1,000 for a germ that it cannot kill. We do that to convince you that liquid oxygen does kill germs.

Any drug that kills germs is a poison to you and it cannot be taken internally. Liquozone alone can kill germs in the body without killing the tissues, too. It is the only way known—the only way one can conceive of—to destroy the cause of any germ disease.

Kills With Oxygen.

Liquozone is simply liquid oxygen—no drugs, no alcohol in it. It is the discovery of Pauli, the great German chemist, who spent 20 years on it. His object was to get such an excess of oxygen in staple form into the blood that no germ could live in any membrane or tissue.

Oxygen is life to an animal—the very source of vitality. It is the essential part of air. Its effects are exhilarating, purifying. It is Nature's greatest tonic. But germs are vegetables, and this excess of oxygen—the very life of an animal—is deadly to vegetable matter. Liquozone charges the blood with such an excess of oxygen that no germ can live where that blood goes. We spend 14 days in making each bottle.

We Paid $100,000

for the American rights to Liquozone—the highest price ever paid for similar rights on any scientific discovery. Before making the purchase we tested the product for years through physicians in the most difficult germ diseases. We proved that Liquozone does what nothing else in the world can accomplish, and that the results are unvarying.

A discovery that could command such a price is something you should know, if you need it. We are doing our part by supplying the first bottle free. Will you do your part by requesting it?

Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquozone kills the germs, wherever they are, and the results are inevitable. By destroying the cause of the trouble, it invariably ends the disease, and forever.
