\* Cement not elsewhere specified and manufactures of cement.

*Consumption of Cement.*—Although the exports of cement have been increasing during the past two years, the value is still comparatively small, and as the quantity has not been recorded, the consumption has been estimated on the basis of the Canadian production and the imports.

The total consumption of Portland cement in Canada in 1910 was 5,103,285 barrels (893,075 tons), made up of: 4,753,975 barrels (831,946 tons) of Canadian cement, or 93 per cent; and 349,310 barrels (61,129 tons) of imported cement, or 7 per cent.

In 1909 the total consumption was 4,209,903 barrels (736,733 tons), of which 97 per cent was made in Canada, and 3 per cent imported.
