A MILLION WORTH A MONTH

Continued from Page 4.

The work of erecting the mill building will be started as soon as the weather is favorable.

The ore at present being taken from the drifts and from the bottom of the shaft keeps up its uniform grade of richness. Between two and three hundred feet of drifting has been done, and a double shift of miners are now at work in the drifts at the 120 foot levels.

Work has also been started on another shaft some 250 feet south of the present one, and about 200 feet from the intersection of the big Hammond reef, which crosses the Sawbill property at right angles to the vein now under development.

Hawk Bay

The Ledgerwood hoist and boiler have been successfully transported to the mine, besides all the other machinery and supplies that have so far reached Bonheur Station. The compressor plant is expected to reach Bonheur Station this week, and by the end of next week the company expect to have all the machinery and supplies on the ground.

A large sleeping camp for the accommodation of 50 to 60 men has been erected; also a new dining camp, which has just been used for the first time. The blacksmith shop is well under way, and will be a commodious building and used as a machine shop in connection with repairs.

No. 2 shaft has now reached a depth of 25 feet and is at present being timbered. No. 1 shaft is also being timbered with a view to having everything in shape at the earliest possible moment so the men may be able to operate both shafts with the compressor plant, which it is intended will be located between the two shafts, which are some 350 feet apart and will be connected by drifts.

Both shafts are looking exceedingly well, and the ore is highly mineralized, with occasional specks of free gold showing. The vein in No. 2 shaft is steadily increasing in width as depth is gained, and at present is almost four feet wide. The progress up to date is fully as satisfactory as at Sawbill.

Between 80 and 90 men are now on the pay roll of these two mines.

Toronto Men Buy Stock.

Says The Vancouver, B.C., World: "Probably the largest sale of stock was consummated by P. W. Charleson, who sold a block of 500 Cariboo Hydraulic stock to Toronto people for $5125, equal to $10.25 a share."

CINNABAR MINE.

Quicksilver Property in British Columbia Said to be Turning Out Well.

Mr. C. E. McPherson, Assistant General Passenger Agent of the C.P.R., with offices at the corner of King and Yonge-streets, is one of the owners of the only cinnabar or quicksilver mines in the British Empire. It is located near Savona, B.C., and is apparently turning out well. The report presented to the annual meeting of the company, held in Vancouver last week, is looked upon as very satisfactory. In brief it stated that the diamond drill has struck a large body of ore on the Yellow Jacket claim, estimated to be sufficient to keep a furnace going for many months. On the Big Dyke there is apparently an inexhaustible body of ore. There being sufficient ore in sight, a furnace was constructed, and it will be ready for use in about a week. With it in operation, the directors think that within a few months the company will be producing sufficient quicksilver to more than pay the expenses of the operation of the mine and plant.

THIRTY MINES COULD SHIP

From Grand Forks Country if the District Only Had a Railway.

With a railroad to Grand Forks there are at least 30 properties that could ship ore from within a radius of 10 miles of this point. In six months—and it will take that long to get a road built here—this number could be easily increased to 50, with an addition of several producers on the Boundary Creek side and from the reservation country. I will mention the Winnipeg, in Wellington camp; R. Bell, Emma and Denero Grande, in Summit camp; Minnie, Wolverine, Twins, Jennie May and Great Eastern, in Brown's camp; at least five on Pass Creek; the Monte Cristo group and Gold Drop, on Hardy Mountain; the Pathfinder, Volcanic, English and French group, on the east side of North Fork; Stemwinder, Old Ironsides, Gold Drop and Nobb Hill, in Greenwood camp; Skylark Nightingale and Crown, in Skylark camp; Lincoln, City of Paris, No. 7 and Star and Crescent, in White's camp; La Fleur group on the reservation, and the Bonita, Riverview and Grey Eagle, near town. These properties are actually able to ship ore were they supplied with railroad facilities, and with the least sign of a railroad heading this way in earnest no one can tell how many more might be added to the list.

New Mining Companies.

Letters patent have been issued incorporating the following mining companies:

The Comstock Gold Mining & Development Company of Ontario; capital, $600,000, in $1 shares. The incorporators are: Daniel O'Connor, lumberman, and Frank Cochrane, merchant, both of Sudbury; Valentine Bedford, Toronto, accountant; John Lawrence Donovan, broker; George Hartas Hedley, capitalist, and Joseph Jas. Gunnell, bookkeeper, all of Buffalo.

The Premier Gold Mining Company of Ontario; capital, $400,000, in $1 shares. The incorporators are: John Piper Martin, broker; Henry Lindop, contractor; James Henry Coyne, Registrar of Deeds; Charles Norsworth, iron founder, and John Stacey, hardware merchant, all of St. Thomas.

The Original Swede Boys Prospecting Company of Rainy River; capital, $90,000, in $1 shares. The incorporators are: John Berg, merchant, and George Asplund, John Franson, August Franson and Erik Franson, prospectors, all of Rainy Lake City, Minnesota.

The Equitable Mining & Developing Company of Ontario; capital, $1,000,000, $1 shares. The incorporators are: John Baird Laidlaw, insurance manager; Hillyard Cameron Dixon, merchant; William Henry Hall, insurance agent, and John Richardson Roaf, solicitor, all of Toronto.

Bannockburn Ore.

Reference has frequently been made in the columns of The World to the richness of the ore in the Bannockburn mine, near the village of the same name, in Hastings County. Some fine specimens are now on exhibition in the window of the tailoring establishment of Mr. R. J. Hunter at 33 King-street west.

Spokane-Kaslo Mining and Milling Co.

Kaslo, B.C., March 11, 1897.

W. M. Bleasdell & Co., 50 Yonge-street, Toronto, Ont.:

Dear Sirs,—Will just state to you that I came down from the mines last night, and that Mr. Scott, president of the company, was up to see them and expressed himself as very much pleased with the outlook of the mines as a whole, and in particular the showing in the tunnel and drifts. We ran the drift or crosscut to the left 20 feet, and did not get through the lead. Were compelled to drop it for a few days, as we were short a couple of hands. Will replace them in a few days, when we will continue drift to wall. Will also push work in tunnel as fast as possible under circumstances. The last few feet have shown quite a change in tunnel and would not be surprised if we strike ore in considerable quantity any minute, though I expected to have to go about 100 feet further at least. We have a tremendous lead and rich for so near the surface (100 feet), do not know the exact width, but have cut it 42 feet. I think it is at least 60 feet wide. Have driven tunnel in on vein over 200 feet. Will write you again in a few days. Yours respectfully,

[Signed.] W. A. Davies,
Superintendent of Mines.

The Allison Ranch Hydraulic Mines.

Special attention is drawn to the advertisement of the Allison Ranch Hydraulic Mining Company, whose first announcement appears in this issue.

This company has a large tract of gold-bearing gravel on the Tulameen River, in southern British Columbia, about half-way between Rossland and the coast. Their claims extend for two miles along the river bank and half a mile back. The gravel is from 50 to 150 feet deep, lying on bedrock, which appears along the bank of the stream for the full length of the claims. From the very handsome prospectus of the company, one cannot help being struck by the conservative manner in which the various good points of these properties are brought out. The company seems to have not relied upon the report of one expert, but has had two well-known mining engineers report upon the property, and, in addition, has submitted these reports to J. H. Chewett, Esq., M.E., Toronto, and Charles H. Mitchell, Esq., hydraulic engineer, Niagara Falls, both of whom consider the properties excellent.

The company has also protected, as far as possible, the interests of investors by pooling all its stock with the Trusts Corporation of Ontario, who are registrars of the company. All the receipts from the sale of stock go in development of the property, and the profits of the present shareholders depend entirely upon the property becoming a paying one. The Eastern Board of Directors is composed of Mr. H. C. Dixon of the wholesale firm of Gillespie, Ansley & Dixon; Mr. J. H. Chewett, the well-known mining engineer, and Mr. John B. Laidlaw, manager for Canada of the Norwich Union Fire Insurance Society, who is also the vice-president of the company. These names are a guarantee of good faith to those that purchase the stock of this company.

Mr. Charles R. Townley of Vancouver, who is the manager of the company, has devoted his entire time to mining for several years, and is a stockholder in many well-known big British Columbia mines, and one of the shareholders of the famous Cariboo hydraulic mines. Mr. Townley has numerous gold nuggets taken from the gravel on these claims, which he will be pleased to show to any intending investors who will call at the company's office, 56½ King-street east.

Anyone at all interested in hydraulic mining should obtain a copy of the fine prospectus which this company has published, containing maps and many half-tone engravings from photos of the company's properties at Princeton, B.C., also half-tone engravings showing hydraulic mines in operation. These will be mailed to anyone upon application.

Good Report of the Juliet.

S. J. Sharp, secretary-treasurer for the Juliet Gold Mine, is just in receipt of a letter from their superintendent, who says they are now in 100 feet and the ore is looking very rich. The promoters of the company expect to have the machinery in position and under operation by April 20. They have only got 5000 more shares to sell at 15 cents.

The Mines Development Co.

This company is meeting with marked success in the sale of the first hundred thousand shares of treasury stock. The straightforwardness of the plan of the company's operations, and the fact that no less than four members of the directorate are practical mining men, has created a confidence in the ultimate success of the company as a money-maker that will stamp it as one of the safest and most successful development companies floated in Canada.

On the English Market.

The Canada Mutual Mining and Development Company have made arrangements for placing their stock on the English market at 25 cents, after Thursday.

George Oke Rowe of 262 Bathurst-street died on Saturday at the age of 61. He was for many years connected with Queen-street Methodist Church, and had been ill a long time. The funeral takes place to-day at 2 p.m.

ATTO
DRY GOODS ONLY

Monday, March 22, 1897.

MINING STOCKS

If you want to invest in gilt-edged Mining Stocks call or write for prospectus. We recommend as good investments:

MINNEHAHA—Camp McKinney, Free Milling. Extension of the famous Cariboo 15c
ST. PAUL—Extension of White Bear, has La Roi vein 12½c
KELLEY CREEK—$30,000 plant in position; good as Golden Cache ..... —
IRON COLT—Immense body of ore in sight 20c
LILY MAY—Shipping mine 20c

Silver Bell, St. Elmo, Northern Bell are good properties.

CAMPBELL, CURRIE & CO.

ON TO THE KOOTENAI!

The call of 1897 is "On to the Kootenai," the wonderfully rich mining country of Montana, Idaho and British Columbia, where so many mines of gold, silver, copper, lead, iron, etc., have been discovered during the last summer or two and new towns and industries established. The Town of Rossland grew from 200 to 6000 in twenty months. Maps and descriptive matter of the entire territory sent free by

H. G. M'MICKEN, Gen. Agt.,
No. 2, King-street east, Toronto.

TO TORONTO INVESTORS.

A block of shares in a dividend-paying mine for sale, which will place investor on the footing of a director of the company.

This snap will be open for a few days only.

PROVISIONAL DIRECTORS

PRESIDENT—JAMES L. HUGHES, ESQ., Toronto.
FIRST VICE-PRESIDENT—Charles T. Lyon, Esq., Manager Canadian Mining Investment Company, Toronto.
SECOND VICE-PRESIDENT—Ewen Morrison, Esq., M.E., Sandon, B.C.
SECRETARY and EASTERN MANAGER—Frederick S. Pope, Esq., late of B. C.
WESTERN MANAGER—E. Morrison, Esq., M.E., Sandon, B.C.
REGISTRAR and TRUSTEES of COMPANY'S STOCK—Trusts Corporation of Ontario, Toronto.
BANKERS—Bank of British North America.

The first operations of the Company will be in proved and dividend paying camps. The Company has under contract for purchase and has made the first payment on three valuable silver claims, the Rosedale, Flower and May, adjoining the famous Payne group in the Slocan District of B.C., and four rich placer claims on Canadian Creek, Cariboo, B.C.

This is the most valuable combination of mining properties offered to the public to-day, and one from which early and satisfactory returns may be confidently expected.

The Company is empowered by its Charter to carry on in all its branches the business of a Mining, Milling, Reduction, Prospecting and Development Company, also to conduct any other business which may directly or indirectly enhance the value of the Company's properties or rights.

A limited number of shares are now offered for sale at TEN CENTS each and allotment will be made strictly in the order in which applications are received.

For Prospectus, Application Forms, Etc., apply to any of the Company's Agents or to

The Company's Claims Consist of Six Hundred and Forty Acres of Auriferous Gold-Bearing Gravel.

This property has been personally tested and examined by Messrs. W. S. N. Wills, Mining Engineer, and R. C. Lowry, A.M.I.C.E., both of whom have reported very favorably. Following are brief extracts from their respective reports:

"In conclusion I would say that I consider this one of the best hydraulic propositions that I have seen in British Columbia."
W. S. N. WILLS, M.E.

"The line of ditch is an easy one; no rock cutting will, most probably, be required, and very little fluming will be needed. I think the property an excellent one."
R. C. LOWRY, A.M.I.C.E.

Six shafts have been sunk, aggregating one hundred and ninety-seven feet. A limited number of shares are now offered to the public at par. Illustrated prospectus, giving full information as to the company's properties, and also interesting details of hydraulic mining, will be furnished on application to

W. H. HALL, or C. R. TOWNLEY, at the Company's Offices, 56½ King-St. E., Toronto.
