NOVA-SCOTIA.

SHORTLY will be published for Schools and private instruction, a comprehensive GEOGRAPHY AND HISTORY OF NOVA SCOTIA, written in plain and easy language, with biographical and explanatory notes and illustrated by A NEW MAP OF NOVA SCOTIA and the adjacent Provinces.

Upwards of two years since, the benefits of a work like that proposed above, were publicly suggested by the author. Though approved of generally and forcibly reiterated by a talented gentleman of the Mechanics' Institute, the suggestion was not followed up by a practical effort, and as the want which was then felt is daily becoming more urgent—the subscriber has been induced to prepare a small work which he trusts will supply the deficiency.

The object kept in view has been to afford assistance to those who are engaged in the honorable task of instructing the rising generation, in their efforts to inculcate a branch of knowledge with which all should be intimately acquainted—to present to the youth of Nova Scotia a succinct, yet complete and comprehensive outline of the History of the Country, with a clear view of its principal Geographical features.

The subjects will be arranged in short chapters, upon the universally approved plan of Pinnock's Catechisms—with this peculiar deviation—that although the questions come in their proper places, the answers will be independent of them, and being printed in type one size larger than the questions) can be read successively without interruption.

The book will contain 72 or more closely printed pages, and will be sold at the lowest possible price not higher than 1s 6d. A liberal deduction will be made to Booksellers, Schoolmasters, and others taking several copies, who will oblige by forwarding their opinion of the number they may require, in order that the demand may be easily ascertained.

NOTICE.
