HAVE the satisfaction of announcing the completion of the *Second Edition* of the Reference Book—the first edition having been destroyed on Christmas Eve by the Centre street fire.

By the employment of eight of the largest printing establishments in the United States—six in New York, one in Philadelphia and one in Boston—a feat in typography has been accomplished which has no parallel in this or any other country, viz: that of printing in a little over a month a huge volume containing the name of every Merchant, Banker, Manufacturer, Trader and Business Man in the United States and Dominion of Canada, together with the location, trade, estimate of means and credit standing in each case.

The numerous and important changes which occurred during January are included in the new volume, and subscribers get a better book than ever before, though somewhat later.

HARPER & BROTHERS have published Reclus's great work, "The Ocean," a companion volume to his masterly dissertation on "The Earth." For thorough research, rich attainments, and graphic style, M. Reclus holds high rank among the scientists of the day. It should be borne in mind that this work and its predecessor are written not for those already thoroughly versed in science, so much as for that much larger class of persons who seek to relieve the monotony of daily routine by the acquisition of some degree of knowledge, and who need books which, while accurate and in some sense profound, shall be free from technicalities and open to general understanding. Such books M. Reclus has furnished in these two volumes, which, taken jointly, cover a wide range of discussion.—(Boston Journal.
