THE FARM.

TWO CONUNDRUMS.

Prof. E. W. Stewart answers two questions in that most valuable of agricultural papers, the *Cultivator and Country Gentleman*, as follows: "What is the difference between Guernseys and Jerseys?"

The difference between the Guernseys and Jerseys consists mostly in difference in rearing and general treatment. Guernsey is rougher and more rocky than Jersey, and has 30,000 cultivated acres to Jersey's 25,000. The cattle on Guernsey were, no doubt, of the same blood originally, but the land being less fertile, and the people making less a specialty of their cattle, did not take as much pains in rearing them. Guernsey cattle were somewhat larger, rougher and more irregular in outline. The demand for Channel Island cattle set in, first and strongest, in Jersey. This caused greater attention to be paid to the breeding and feeding of the Jerseys. The Jersey farmers first introduced the individual merit system, and this soon branched out to the family and line system. The Guernsey farmer is just fairly beginning to consider individual merit as a basis of value. American breeders, as yet, have made very few tests for actual butter yields. They still rely upon the purity of the pedigree. Some Guernseys have been proved to yield very rich milk. There is no doubt that untested Guernseys and Jerseys have equal supposititious value. But wise purchasers will not buy either of these breeds without proof of merit. The time should be considered as past when these breeds can be sold simply on supposed purity of blood.

"Which is the breed of sheep for mutton and wool combined?" Well this conundrum has not yet been answered conclusively in practice. The admirers of the dainty, choice little South-Down will exclaim: Behold your model! The Shropshires would have much approval as the desired breed. The large Leicester and Cotswold breeds are thought by many to be the best breeds combining both mutton and wool; and perhaps, in the present state of the case, this may be considered the best practical solution of the question. But, on the contrary, some experiments with Merinos go to show that the true breed. On the wool side of the account, this breed certainly stands at the head—but how about mutton? The best feeders in Vermont and in Washington county, Pa., have shown that the Merino can be gradually changed into a first-class mutton sheep. French experiments have proved the Merino to be a mutton sheep. When the Merino is fed systematically, as the mutton breeds are fed, there is every reason to believe that it will completely fill the bill. And there certainly is no reason to suppose that the best feeding will injure the wool.

HORSES FEET.

What makes your horse wear out in one-third of his natural life? What makes his feet full of corns? What causes the navicular trouble? What brings on a bog spavin? Why do horses have string-halt? What is the cause of a scody-toe that many horses have? What makes them have thrush, canker of the foot, laminitis and weak heels? The shoe, Mr. Editor, makes and causes all the many troubles I have mentioned. Still owners of horses insist on having their horses shod the old way, with a heel and a toe shoe; with corks big enough for jack-screws. How to prevent all the above trouble that our poor horses have to suffer: Do not allow the smith to use a knife on the foot of your horses at all, simply rasp the foot off, just enough to get even bearing; then apply a tip, or a thin, flat shoe, should you use the tip never rasp the heel at all; should you have your horses feet shod with plain, flat shoes, keep the heels down low enough to get a frog pressure; three nails on each side is enough to hold it in place on any driving horse until the shoe is worn out. Never allow the smith to rasp the outside of the foot at all. If you follow these instructions you will save many horses from going lame. The roads are not too hard for any horse's feet if you will give the feet any show whatever. If you let the smith cut the sole and frog to suit his will and pleasure, then fill it full of nails, rasp it off until it is as thin as paper, you must expect lame horses, and you will have them. Only think of the horse in his natural state. He will travel over any road day in and day out barefoot; still as soon as he is brought to the city he is sent to the smith, then trouble commences. Any horse that is shod with a big, heavy shoe, never should be allowed to go out of a walk. A driving horse for road pleasure has no more use for a calk than the writer has for thirteen toes. Any man who tells you that a foot which is strong and healthy requires a shoe to protect the frog and heels tells what is not so, and he can't prove it by showing results.—*Rural World.*

RELATIVE COST OF MUTTON.

It appears by a well determined fact that while the sheep requires more food for 1,000 pounds of live weight than the steer, it makes more flesh out of a given amount of food than the steer does. Sir J. B. Lawes got 6.2 pounds of water-free nutritive material, and 8 pounds of water-free mutton out of the same amount of food—a difference of one-third in favor of the sheep. In live weight the figures stood 9 pounds of steer to 11 pounds of sheep out of 100 pounds of dry food eaten. The reason why more food per pound of live weight is required not only because of the digestion and assimilation of a larger proportion of it, but because of more radiating surface on the number of sheep required to make the live weight of a 1,000 pound steer, thus calling for more food of respiration, or for the keeping up of the temperature of the animals. It also appears to be a fact that fine-blooded sheep require more food per pound of live weight than coarse-wooled. Prof. Sanborn, of the Missouri Agricultural College, estimates the demand of sheep for food to exceed, for each 1,000 pounds of live weight, that of cattle by 25 to 35 per cent. But let it be remembered that the sheep not only produces mutton, but a fleece of wool at the same time, while the steer converts its food into meat only. In another way the sheep is more economical than the steer. It feeds largely on what is rejected by the steer, and would otherwise go to waste. Randall tells us that in trials as to the relative shrinkage from cooking between mutton and beef, the retult was in favor of the mutton. Prof. Sanborn makes other comparisons thus: "Given 100 pounds each of live steer and sheep at 4 cents a pound, live weight, if we subtract 8 pounds of wool at 20 cents a pound from cost of the sheep, the dressed carcass of the steer, at 60 per cent, shrinkage, will cost 6.66 per pound; the dressed carcass of the sheep will cost 4.61 cents per pound; or the former costs 42 per cent more than the latter." It would seem, from all the evidence, that there can be no doubt of the greater economy in growing mutton than in growing beef.

AN ORCHARD HINT.

The longevity of a tree is largely a question of food. A tree which, with plenty to eat and drink, may be kept in good health for 200 or 300 years, is old and decrepid at less than 100 or 200 when it grows where food is scarce. On lawns and in gardens the tidy person keeps leaves and litter nicely cleaned up and this material is what the wild trees love. There is generally nothing for a nice lawn tree to feed upon but the minerals it can get from the soil. If the roots are kept strong with good living there will be no dead tops. There is much more waste of moisture from dead and dying branches than from the healthy living ones, and cutting away these simply stops the drain on the weak roots for a little while. In a very dry time or a very cold period the weakest branches suffer first. The weakest, from poverty of food or drink, are always at the upper portion of the trees or at the extreme ends of the branches.

CORN MEAL.

Corn meal is a convenient, and we might say staple, article of food in the barn yard and poultry yard, yet it is not the best food for young chickens. It is a very good food in winter, as it is heating, but for young chickens it is not sufficiently growing. Very young chickens that are fed on corn meal exclusively are liable to be troubled with bowel diseases. Give a variety of food, give plenty of range, and, above all, give clean quarters.

GOSLINGS.

The first few months of a calf or colt are more important than any other period of its life. Young stock that has been stunted in its earlier days never fully recover the loss, or become as large and well developed as if it had been kept growing steadily from the beginning.

Straw will soon be used for building purposes. It is estimated that straw may be closely pressed into bales 14 to 16 inches, or of any size desired, and the bales be used for building walls. The walls can be plastered over, or be arranged to suit the convenience of the builder. What about the insurance companies?

Setting hens should not be fed while on the nest. They need all the exercise they are likely to get. Too constant sitting makes them of bad disposition and difficult to manage when they come off with the brood. Eggs will stand a wide range of temperature with injury.

It is a fact that water is more essential to fall crops than manure, and it is also more abundant in natural supply. The trouble is that no means are employed to save it for use, and the difference between a fair and a bumper yield is the measure of scarcity for improvidence.

It will surprise old poultry growers to learn that the common hawk is regarded as a valuable bird. He destroys 1 chicken where every chicken, and of there is a fair amount of shrubbery around the vineyard very few chickens will be lost from his depredations.

Farmers who have kept a strict account with their poultry say that a pound of poultry can be made for less than a pound of pork, yet the housekeeper who has to buy both feels that he cannot afford to buy poultry often, as it costs more than other meats.

If your hogs begin to cough look out for malignant lung troubles. If they mope and be about their beds intestinal difficulties may be suspected. Plenty of pure air, pure water, and varied food will keep away malignant diseases.

GOLDEN MEDICAL DISCOVERY

CURES ALL HUMORS,

from a common **Blotch**, or **Eruption**, to the worst **Scrofula. Salt-rheum, "Fever-sores," Scaly or Rough Skin**, in short, all diseases caused by bad blood are conquered by this powerful, purifying, and invigorating medicine. **Great Eating Ulcers** rapidly heal under its benign influence. Especially has it manifested its potency in curing **Tetter, Rose Rash, Boils, Carbuncles, Sore Eyes, Scrofulous Sores and Swellings, Hip-Joint Disease, White Swellings, Goitre, or Thick Neck, and Enlarged Glands.** Send two cents in stamps for a large treatise, with colored plates, on Skin Diseases, or the same amount for a treatise on Scrofulous Affections. **"THE BLOOD IS THE LIFE."** Thoroughly cleanse it by using **Dr. Pierce's Golden Medical Discovery**, and good **Digestion, a fair skin, buoyant spirits, vital strength, and soundness of constitution**, will be established.

CONSUMPTION,

which is **Scrofulous Disease of the Lungs**, is promptly and certainly arrested and cured by this God-given remedy, if taken before the last stages of the disease are reached. From its wonderful power over this terrible fatal disease, when first offering this now celebrated remedy to the public, Dr. Pierce thought seriously of calling it his **"Consumption Cure,"** but abandoned that name as too limited for a medicine which, from its wonderful combination of tonic, or strengthening, alterative, or blood-cleansing, anti-bilious, pectoral, and nutritive properties, is unequaled, not only as a remedy for consumption of the lungs, but for all

CHRONIC DISEASES
OF THE
Liver, Blood, and Lungs.

If you feel dull, drowsy, debilitated, have sallow color of skin, or yellowish-brown spots on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills, alternating with hot flashes, low spirits and gloomy boredoms, irregular appetite, and coated tongue, you are suffering from **Indigestion, Dyspepsia, and Torpid Liver, or "Biliousness."** In many cases only part of these symptoms are experienced, as a remedy for all such cases, **Dr. Pierce's Golden Medical Discovery** has no equal.

For **Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Severe Coughs, Consumption**, and kindred affections, it is a sovereign remedy. Send ten cents in stamps for Dr. Pierce's book on Consumption. **Sold by Druggists.**

PRICE $1.00, OR 6 BOTTLES FOR $5.00.

World's Dispensary Medical Association,
Proprietors, 663 Main St., BUFFALO, N.Y.

Pierce's Pleasant Purgative Pellets LITTLE LIVER PILLS.

ANTI-BILIOUS and CATHARTIC. Sold by Druggists. 25 cents a vial.

$500 REWARD

is offered by the proprietors of Dr. Sage's Catarrh Remedy for a case of catarrh which they cannot cure.

If you have a discharge from the nose, offensive or otherwise, partial loss of smell, taste, or hearing, weak eyes, dull pain or pressure in head, you have Catarrh. Thousands of cases terminate in consumption.

Dr. Sage's CATARRH REMEDY cures the worst case of **Catarrh, "Cold in the Head," and Catarrhal Headache.** 50 cents.

PILES. Instant relief. Final cure and never returns. No indelicacy. Neither knife, purge, salve or suppository. Liver, kidney and all bowel troubles—especially constipation—cured like magic. Sufferers will learn of a simple remedy free, by addressing, J. H. REEVES, 78 Nassau St., N. Y. 11-G

EASTER

CAPITAL PRIZE, $150,000

"We do hereby certify that we supervise the arrangements for all the Monthly and Quarterly Drawings of the Louisiana State Lottery Company, and in person manage and control the Drawings themselves, and that the same are conducted with honesty, fairness and in good faith toward all parties, and we authorize the Company to use this certificate, with fac-similes of our signatures attached, in its advertisements."

G. T. Beauregard
Jno. A. Early
COMMISSIONERS.

We the undersigned Banks and Bankers will pay all Prizes drawn in the Louisiana State Lottery which may be presented at our counters.

J. H. OGLESBY, Pres. Louisiana Nat'l Bank.
J. W. ALLBRIGHT, Pres. State National Bank.
A. BALDWIN, Pres. New Orleans Nat'l Bank.

UNPRECEDENTED ATTRACTION!
OVER HALF A MILLION DISTRIBUTED

Louisiana State Lottery Company.

Incorporated in 1868 for 25 years by the Legislature for Educational and Charitable purposes—with a capital of $1,000,000—to which a reserve fund of over $800,000 has since been added.

By an overwhelming popular vote its franchise was made a part of the present State Constitution adopted December 2nd, A.D. 1879.

The only Lottery ever voted on and endorsed by the people of any State.

It never sells or postpones.

Its Grand Single Number Drawings take place Monthly, and the Semi-Annual Drawings regularly every Six months (June and December).

A SPLENDID OPPORTUNITY TO WIN A FORTUNE. THIRTEENTH GRAND DRAWING, CLASS A, IN THE ACADEMY OF MUSIC, NEW ORLEANS, TUESDAY, January 11, 1887—240th Monthly Drawing.

Capital Prize, $150,000.

Tickets: Whole Tickets are Ten Dollars only. Halves, $5. Fifths, $2. Tenths, $1.

LIST OF PRIZES.

1 CAPITAL PRIZE OF	$150,000	$150,000

The Steamers of the Liverpool Mail Line sailing from Liverpool on THURSDAY, from Portland on THURSDAYS, and from Halifax on SATURDAYS, calling at Lough Foyle to receive on board and land Mail and Passengers to and from Ireland and Scotland, are intended to be despatched

FROM HALIFAX:

Sardinian ..... Saturday, Dec. 4
Parisian ..... Saturday, Dec. 18
Carthaginian ..... Saturday, Jan. 1
AT TWELVE o'clock P.M.
or on the arrival of the Intercolonial Railway Train from the West.

FROM PORTLAND TO LIVERPOOL, VIA HALIFAX

Sardinian ..... Thursday, Dec. 2
Polynesian ..... Thursday, Dec. 16
Parisian ..... Thursday, Dec. 30
AT ONE o'clock, P.M.,
or on the arrival of the Grand Trunk Railway Train from the West.

Rates of passage from Montreal, via Halifax: Cabin $58.75, $70.00, $81.25 (according to accommodation). Intermediate, $45.00. Steerage, $25.00.

Rates of passage from Montreal, via Portland: Cabin $57.50, $72.50 and $82.50 (according to accommodation). Intermediate, $45.00. Steerage, 25.00.

NEWFOUNDLAND LINE.

The Steamers of the Halifax Mail Line from Halifax to Liverpool, via St. Johns, N.F., are intended to be despatched FROM HALIFAX:—

Caspian ..... Monday, Dec. 6
Carthaginian ..... Monday Dec. 20

Rates of passage between Halifax and St. John's—Cabin $20.00, Intermediate, $15.00, Steerage $6.00.

GLASGOW LINE.

During the season of Winter Navigation a steamer will be despatched regularly from Glasgow for Boston (via Halifax when occasion requires), and regularly from Boston to Glasgow direct, as follows, FROM BOSTON:—

Prussian ..... about Nov.
Mediterranean ..... about Dec.
Siberian ..... about Dec.
Scandinavian ..... about Dec. 1
Hibernian ..... about Jan.
Prussian ..... about Jan.

The steamers of the Glasgow, Londonderry and Philadelphia Service are intended to be despatched from Philadelphia for Glasgow. FROM PHILADELPHIA:

Norwegian ..... about Dec. 22
Manitoban ..... about Jan. 19

THROUGH BILLS OF LADING

granted in Liverpool and Glasgow, and at all Continental Parts, to and from points in the United States and Canada, and from all stations in Canada and the United States to Liverpool and Glasgow, via Boston, Portland or Halifax.

Connections by the Intercolonial and Grand Trunk Railways, via Halifax; and by the Central Vermont and Grand Trunk Railways (National Despatch), and by the Boston and Albany, New York Central and Great Western Railways, (Merchants' Despatch), via Boston and by the Grand Trunk Railway Company, via Portland.

Through Rates and Through Bills of Lading for East bound Traffic can be obtained from any of the Agents of the above-named Railways.
