Third Division of Profits!

MINERVA
LIFE ASSURANCE COMANY
OF LONDON,
ESTABLISHED, 1836.

AT the Third Quinquennial Meeting of this Company, held in London, 24th June, 1852, a Surplus of £82,400 Sterling, (being four-fifths of £53,000 Sterling) was declared distributable amongst the Policy holders entitled to participate. This sum allows of a reduction of Premium for the next five years, of £9,633 18s. 3d. Sterling, per annum, or an equivalent reversionary Bonus payable at Death, of £68,939 10s. 7d.
The reduction of Premium averages 25.22 per cent. on the Premiums payable during the next five years.
The reversionary Bonus averages 60 per cent. on the Premiums received during the last five years, or 9 per cent. on the sums Assured.
Upon the Policies which had been full five years in existence, the reversionary Bonus averages 2 1-2 per cent. Premium on the sum assured, a result which has been seldom equalled, and will bear comparison with that of any Office.
The following Table illustrates the Bonuses declared:

		Average Reduction of Premium.	Average Reversionary Bonus
1st Division—	1832	16.833 per cent.	21 per cent.
2d. "	1837	21.233 "	33½ "
3d. "	1842	25.22 "	60 "

The 31st December last, the Assurance Funds were £1,699,843 10 2
The Capital Funds of the Company were - - 230,262 15 6
The Annual Income was - 47,721 2 6
The Divisable Surplus was - 53,000 0 0

The Directors consider, and trust the Policy holders will agree with them, that the position of the Company is highly satisfactory, and bespeaks that, taking into account the continually increasing competition they have to encounter, the progress of the Company has equalled their expectations, as the benefits actually realized equal, and in most cases surpass, those afforded by the largest established Offices.
Prospectuses, Forms of Proposal, and every information may be obtained from

MYERS' EXTRACT OF
ROCK ROSE.

FOR all cases of Scrofulous Diseases, Dyspepsia, Salt Rheum, Sick Headache, Canker & Burning Sore, Mouth, Gums of Debility, &c. &c. the persons who have been afflicted with the above named diseases, as the Rock Rose, *Myers Extract* is an elegant preparation, perfectly safe, and a wonderfully efficacious remedy. The extraordinary Medicinal properties of the Rock Rose Plant, have become known to some of the most eminent Medical practitioners of the country; others are fast becoming acquainted with its healing virtues, and desire to have it more extensively known and used.
The following is an extract from a note on the title page of a work published by D. A. Tyler, M. D., New Haven, Conn. on the efficacy of Rock Rose. These pages were penned without any expectation of their ever being presented to the public—since which time the plant (Rock Rose) under consideration has been more fully tested its virtues developed, and their character more fully established. They are published by with the consent of several medical friends. The object of this dissertation is to lay before the members of the profession and the public, the virtues of a plant too much neglected which undoubtedly (as an order member of the profession once remarked to me) possessed far more attractive hours than the popular sarsaparilla. I ask for the plant an impartial trial.'
ITS MEDICAL HISTORY AND PROPERTIES
Are far the most important, since upon these depends its value to the community. Dr. Loudon says, that in 1799, it was so valuable in England, that it was cultivated from seeds. Ever since 1806.
PROF. IVES, OF YALE COLLEGE,
Has habitually used it with great success in *Scrofula*, and *Chronic Disease*, and through him its virtues were made known until, as Dr. Tyler says, "it is now in this section [New Haven] a common article in domestic practice, for the cure of *Scrofula* and cutaneous diseases." Dr. Whitlaw, a Scotch botanist of notoriety, while traveling in America, in 1814, learned its use in Canada. Returning to England, he employed it in medicating his baths, when became greatly celebrated for the cure of similar diseases.
DR PARISH, OF PHILADELPHIA.
Remarks that it has been successfully used in bad cases of *Scrofulous Diseases*.
DR. J. H. THOMPSON, OF THE SAME PLACE,
Prescribed it in bad cases of Scrofulous patients a Wells' Hospital. His success attracted the attention of senior physicians. He reports the following remarkable cases of White Swelling of the right hip, in February, 1841. The lad was seven years old, and had the disease for three years. The bone was dislocated upward and outward. There was a large opening on the hip leading to the bone, into which I could thrust my fingers. I counted twelve ulcers. He had been under several physicians, who had given him up. I ordered a decoction of the *Rock Rose*. In two days his night sweats ceased; I then ordered a tea spoonful of the tincture of Rock Rose, three times a day. *Thirty-nine* days after he was *entirely well*.
For sale by *Druggists Generally*, where Circulars and Certificates of cases may be obtained.
