stantial reasons have been urged by the Members of the Executive who have resigned, for vacating office, and embarrassing the Governor—and we have endeavoured to show, upon good and sufficient grounds, that public opinion, and not Mr. Almon's appointment, forced upon them the alternative of changing their sentiments, or resigning their seats in the Council.

Particulars of the Loss of Brig Sarah Lovett.—A gentleman who arrived on Saturday from Barrington states as of the following particulars:—The brig Sarah Lovett, of and from St. Stephens, John W. Abbott, master, sailed from L'Etang on the 4th December, and when 3 days out was capsized in a heavy gale of wind from N.; cut deck load fastenings and lopped rigging, when she righted, with lower masts standing and waterlogged; Capt. A. persisted same day. The crew succeeded in getting a barrel of bread, damaged with salt water, from below, which, with some ice and snow found about deck, afforded their only sustenance during the time they continued on the wreck. On the 13th day after the disaster, 2 of the crew died, and on the 15th (or the 22d of the month) the mate perished—on which day the wreck was happily fallen in with by the brig Ann, Capt. Todd, of Shelburne, and the two survivors, Thos. Cutler, of St. Stephen, and John B. Lawrence, of Philadelphia, taken on board in almost exhausted condition, and landed a day or two after at Barrington. The mate (whose name our informant did not learn) has left a wife and two children at St. Stephen.—*Yarmouth Her.*

Advertising.—Rely upon it, notoriety is the way to succeed in life. Ask whether the late Mr. Day, if he had not made his liquid as black in the newspaper as it was white upon the walls, would have died worth half a million of money. People do not know their wants, till they are reminded of them; advertising is as healthy and wholesome as quick circulation of the blood;—all, therefore, who desires to sell, should appear in the highway which the columns of a popular newspaper afford.

MARQUIS OF WATERFORD.—The famous Marquis of Waterford who figured conspicuously in this country a few years ago, has resolved to quit his country seat at Tipperary. He says, "in 1841 my hounds were poisoned. In January, 1843, they were again poisoned. In 1843 my stables were burnt, and but for the prompt conduct of my servants the whole establishment would have been destroyed. The burning was malicious. I immediately determined to leave Tipperary, feeling that such a system of annoyance more than counterbalanced the pleasures of fox hunting."—*American paper.*

A NEW COMET.—At one o'clock in the morning of the 22nd inst., a comet, visible through a telescope, was discoved near the star Gamma, of Orion, by M. Faye, the astronomer attached to the Royal Observatory at Paris. Notwithstanding the clouds and vapours which impeded the view, and rendered the observation uncertain, the position of the star was ascertained to be as follows:—On the 22nd of November, 1843, at 14 hours 44 minutes 11 seconds medium time of Paris, reckoned from mid-day, the right ascension of the comet was 81 deg. 5 min., and the boreal declension was 6 deg. 56 min. The sky was so cloudy on the following night, that it was only on the 24th that the comet was again seen, when its position was ascertained with complete precision. On the 24th of November, 1843, at 17 hours 4 minutes 43 seconds medium time of Paris, counted from mid-day, the right ascention of the comet was 30 deg. 50 min. 42 seconds. Boreal declension of the comet 6 deg. 20 minutes 35 seconds. Thus the apparent right ascension of the comet diminished by seven minutes of a degree within about 24 hours, and in the same interval of time the declension likewise by 12 minutes. This comet presents a head so distinctly that the observations are singularly facilitated. From the head slight trains of light diverge nearly opposite to the sun. The tail is at present in length about four minutes of a degree.

BACK OF THE PREMIER.—The Quebec *Canadian* states that twenty four of the men of the 1st regiment of Royals, who had remained with the wrecked transport, had returned by land from Cape Chat, and entered that city in a very distressed condition, having suffered much from the severe cold of the last few days.

HISTORY OF THE INFLUENZA.—In 1580 it prevailed in Europe, and is spoken of as a pestilential and epidemic cough. In 1743 (just a century since) it prevailed the world over, and received its present cognomen. In many districts of Europe scarcely a family escaped. It was never fatal except to aged persons, or those affected with pulmonary disease. The French called it LA GRIPPE—hourseness. It appeared again in Europe and America, as we learn from a writer in the Troy Whig, in 1762. Also in 1775, when dogs and horses were also affected. In 1782 it was equally universal, and followed severe atmospheric changes. It met its victims on land and sea. In St. Petersburg, 10,000 were affected by it in one day.—In 1789 it appeared again, and was followed by the cholera. In 1803 it succeeded that fearful disease. Its progress is like the progress of most epidemics, from east to west, and is preceeded by great atmospheric changes.

AMNESTY.
