Ayer's Cathartic Pills,

For the relief and cure of all derangements in the stomach, liver, and bowels. They are a mild aperient, and an excellent purgative. Being purely vegetable, they contain no mercury or mineral whatever. Much serious sickness and suffering is prevented by their timely use; and every family should have them on hand for their protection and relief, when required. Long experience has proved them to be the safest, surest, and best of all the *Pills* with which the market abounds. By their occasional use, the blood is purified, the corruptions of the system expelled, obstructions removed, and the whole machinery of life restored to its healthy activity. Internal organs which become clogged and sluggish are cleansed by *Ayer's Pills*, and stimulated into action. Thus incipient disease is changed into health, the value of which change, when reckoned on the vast multitudes who enjoy it, can hardly be computed. Their sugar coating makes them pleasant to take, and preserves their virtues unimpaired for any length of time, so that they are ever fresh, and perfectly reliable. Although searching, they are mild, and operate without disturbance to the constitution, or diet, or occupation.

Full directions are given on the wrapper to each box, how to use them as a Family Physic, and for the following complaints, which these *Pills* rapidly cure:—

For **Dyspepsia** or **Indigestion, Listlessness, Languor** and **Loss of Appetite**, they should be taken moderately to stimulate the stomach, and restore its healthy tone and action.

For **Liver Complaint** and its various symptoms, **Bilious Headache, Sick Headache, Jaundice** or **Green Sickness, Bilious Colic** and **Bilious Fevers**, they should be judiciously taken for each case, to correct the diseased action or remove the obstructions which cause it.

For **Dysentery** or **Diarrhœa**, but one mild dose is generally required.

For **Rheumatism, Gout, Gravel, Palpitation of the Heart, Pain in the Side, Back** and **Loins**, they should be continuously taken, as required, to change the diseased action of the system. With such change those complaints disappear.

For **Dropsy** and **Dropsical Swellings**, they should be taken in large and frequent doses to produce the effect of a drastic purge.

For **Suppression**, a large dose should be taken, as it produces the desired effect by sympathy.

As a *Dinner Pill*, take one or two *Pills* to promote digestion and relieve the stomach.

An occasional dose stimulates the stomach and bowels, restores the appetite, and invigorates the system. Hence it is often advantageous where no serious derangement exists. One who feels tolerably well, often finds that a dose of these *Pills* makes him feel decidedly better, from their cleansing and renovating effect on the digestive apparatus.

"44"

A NEW THING AND A GOOD THING

THE invention of the paper collar was of positive benefit to the world, furnishing as it did, a neat, clean, and most economical article of apparel. But it never did answer all the purposes for which it was designed, owing to the frail nature of the material. The problem has been to make a cloth collar as cheap as paper that would last longer and could be made always fresh and bright. The new "44" collar, now upon the market, fills these requirements perfectly. It is made entirely of cloth, three thicknesses being used; it so closely resembles the finest linen that it might be sold anywhere for linen; and, no matter how much it may be soiled, it can be cleaned and made as bright as ever by the application of a damp sponge or cloth.

Protection for Sugar—Dorion to be Chief Justice.

OTTAWA, April 13.

On the representation of Redpath, of the Montreal Sugar Refinery, that he would close that establishment unless the Government gave him some protection, the Minister of Finance has ordered a reduction of one quarter per cent. on all sugar imported below 13 Dutch standard.

Hartney, of Stationery Department, is shortly to be appointed Clerk of the Commons, the present Clerk to be superannuated.

It is pretty generally believed now that Hon. A. A. Dorion will be appointed Chief Justice of the Supreme Court, and Hon. M. Fournier one of Pusine Judges, making the required number from Quebec.

The Fire Investigation.

Continued from First Edition.

Wm. Kirby, an employe in McConnell's stables, deposed to Dr. Berryman bringing the horse to the stable on the night in question, at about two o'clock. He heard a noise during the night. It was going on all the time, but he did not pay special attention to it as it was election time. The policeman came into the stable office after one and went out soon after. There was noise at that time. The witness said he was a sober man and had never been in the engine house.

John Morrison, another of McConnel's employés, deposed being in the stable from about nine o'clock for the remainder of the night. He went to bed a little after ten and did not hear any noise. He was tired and slept well.

David Hall, private watchman for Mr. Peters, deposed that on the night in question he saw Briggs at different times. The witness went on duty at nine o'clock. There was a great deal of loud talk around the engine house during the night, but the witness did not pay much attention to it until somewhere between one and two o'clock when Briggs who had been talking with him went up towards the engine house and the witness went on around his beat. There was noise at the engine house then. This took about half an hour and then about twenty-five minutes of three he came up Union to Charlotte street. He heard considerable noise but did not know whether it was inside or outside of the engine house. Two men came from the engine house and went east down Union st. They were on one side of the street and the witness was on the other. There was not much noise at that time. At twenty minutes past four the witness was in Hopkins's barn, and from there he turned to go in the alley to Betts's blacksmith shop. As he did so he saw a man turning the other corner to come out. There is a small gate between the two alleys in that block. The man made a few quick steps and went through this gate, down Case's alley, and up Union street towards the engine house. Witness went up the alley and saw the fire in Babbitt & Nelson's window. Witness ran up to the engine house and gave the alarm. Saw or heard no person around the engine house at that time. After he had sounded the alarm and started for the fire, he turned back to tell the men where to go. Met two men and gave them directions. When he went back to the fire he saw several men on the sidewalk but none in the alley. The person seen running from the alley when the fire was discovered was a short man, something over five feet, dressed in dark clothes, with some kind of a hat. He was pretty light on foot in running. He did not see any man in shirt sleeves after the alarm was given. He could not identify the man he saw at the alley.

The Magistrate, at the conclusion of the testimony remarked that it was a matter to be greatly regretted that the man had not been "spotted" so that he could be afterwards known. The evidence had shown that two incendiary fires had been set, and had also shown a state of things existing around these engine houses which should be sufficient to arouse the Common Council and citizens. He believed that while the Chief Engineer should be appointed by the Council, he should have complete control of his subordinates and be held strictly responsible for their acts. As it was now, the engineer had no control over his men, they did not respect his authority, and when they had so little regard for his position as to blackguard and abuse him at fires, it could not be expected the department would be efficient. His Worship deplored the state of things developed under the present system and believed in establishing a strict responsibility throughout, and it was useless to look for a better state of things until such responsibility was established.

The Court was adjourned until some more witnesses could be found.
